

Proposed Restricted Roads (20mph Limit) (Scotland) Bill

Page 2: About you

Are you responding as an individual or on behalf of an organisation?

an individual

Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Member of the public

Please select the category which best describes your organisation

No Response

Please choose one of the following; if you choose the first option, please provide your name or the name of your organisation as you wish it to be published.

I would like this response to be anonymous (the response may be published, but no name)

Please insert your name or the name of your organisation. If you choose the first option above, this should be the name as you wish it to be published. If you choose the second or third option, a name is still required, but it will not be published.

Please provide details of a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number. We will not publish these details.

Page 7: Your views on the proposal

Q1. Which of the following best expresses your view of the proposal to replace the current 30mph default speed limit on restricted roads with a 20mph limit.

Fully opposed

Q1. Which of the following best expresses your view of the proposal to replace the current 30mph default speed limit on restricted roads with a 20mph limit.

Please explain the reasons for your response

I think 20mph is needlessly low and will add unnecessary time to commuting. It will also not slow down those who would speed anyway.

Q2. Could the aims of this proposal be better delivered in another way (without a Bill in the Scottish Parliament)?

Unsure

Please explain the reasons for your response

More advertisements around speeding and the associated dangers.

Q3. What do you think would be the main advantages, if any, of the proposal?

I don't see any true advantages to wasting money on this when I feel the current limits are fine as they are.

Q4. What do you think would be the main disadvantages, if any, of the proposal?

It's a waste of money, it will needlessly increase commuting times and not make a true difference to speeding.

Q5. What other measures do you think would be needed to maximise compliance with the new national 20mph speed limit on restricted roads, for example in relation to advertising signage and police enforcement.

If it were brought in I think it would need a lot of advertising and signage and this would waste further money and resources.

Page 12: Financial implications

Q6. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have?

	Significant increase in cost	Some increase in cost	Broadly cost-neutral	Some reduction in cost	Significant reduction in cost	Unsure
Scottish Government	X					
Local Authorities	X					
Motorists		X				

Q6. Taking account of both costs and potential savings, what financial impact would you expect the proposed Bill to have?

Other	X					
Police Scotland						

Please explain the reasons for your response

The proposal states that this will save money compared to every council adopting an Edinburgh-style system. However, this is a completely unfair comparison as every council in Scotland would never have spent the money adopting this individually. Therefore, this is increasing the cost significantly and is not providing any savings in returns. I don't think there is a call for this in any council I have lived in and seems an unnecessary waste of money.

Q7. Do you believe there will be any other benefits to reducing the speed limit from 30mph to 20mph?

No.

Page 14: Equalities

Q8. What overall impact is the proposed Bill likely to have on the following protected groups (under the Equality Act 2010): race, disability, sex, gender re-assignment, age, religion and belief, sexual orientation, marriage and civil partnership, pregnancy and maternity?

Slightly negative

Please explain the reasons for your response

In the case of those who can't make longer journeys due to having to have rest breaks (i.e. Disabled or pregnant) this will increase travel times so have a negative impact.

Q9. Could any negative impact of the proposed Bill on any of these protected groups be minimised or avoided?

No Response

Page 16: Sustainability of the proposal

Q10. Do you consider that the proposed Bill can be delivered sustainably i.e. without having likely future disproportionate economic, social and/or environmental impact?

Unsure

Page 17: General

Q11. Do you have any other comments or suggestions on the proposal to establish a 20mph default speed limit on restricted roads?

No Response
