The Local Development Plan sets out policies and proposals to guide development.

The Action Programme sets out actions to deliver the Plan.

The Report of Conformity explains how engagement informed the Plan.

The Habitats Regulations Appraisal assesses the Plan’s impact on internationally important bird habitats.

The Transport Appraisal identifies transport actions to support the Plan.

The Education Appraisal identifies new and expanded schools to support the Plan.

The Equalities & Rights Impact Assessment checks what impact the Plan will have on people.

The Environmental Report assesses the impact of the Plan and explains the selection of new housing sites.

The Housing Land Study sets out the assumption on housing land availability which inform the Local Development Plan.

Foreword

Edinburgh is a successful, growing city. This growth continues even in this time of economic challenges. It is driven by the city’s assets, which include its citizens, its centres of employment and learning, and its quality of life. This growth needs to be guided and shaped in order to maintain and promote those assets and to deliver the Council’s objectives. That is what this plan is for.

We will use this plan to provide a clear and fair basis for planning decisions, which in turn provides a stable framework for investment in Edinburgh. This adopted Plan has been shaped by the thousands of responses received at earlier stages of the project. We wish to thank everyone for their contributions so far, and now ask that everyone works together to deliver the Plan and its aims.

Introduction

1. For the first time in over 30 years, Edinburgh has one plan covering the whole of the Council area. Across Edinburgh’s Old and New Towns, from the Waterfront areas of Granton and Leith to the Pentland Hills, from Queensferry and Kirkliston to Craigmillar and Newcraighall and many other places in between, the Edinburgh Local Development Plan (LDP) provides a clear and consistent planning framework. Now adopted, the LDP replaces two local plans - the Edinburgh City Local Plan and the Rural West Edinburgh Local Plan.

2. The LDP sets out policies and proposals relating to the development and use of land in the Edinburgh area. The policies in the LDP will be used to determine future planning applications. The planning system rests on the powers which planning authorities have to manage development and to take enforcement action against breaches of planning control. When appropriate, the Council will remove, modify or stop unauthorised developments and changes of use. These powers are used at the discretion of the Council.

3. The LDP will also inform decisions on investment opportunities and the provision of infrastructure and community facilities. It is hoped that local residents and community groups use the LDP to better understand and get involved in the planning issues affecting their areas.

4. There are two main parts to the LDP:
Part 1
Strategy and Proposals
This explains what the LDP means for Edinburgh over the next 5 to 10 years. It sets out the plan’s five core aims and anticipated land use changes – the main development proposals and where they are expected to take place. It also includes site briefs and development principles to guide some proposals. Part 1 highlights which areas and features of the city will be protected and, where possible, enhanced.

Part 2
Policies
This sets out the policies which the Council will use to ensure that development helps meet the core aims of the LDP. Planning applications will be assessed against relevant policies. The policies are presented in 8 sections:

• Delivering the Strategy
• Design Principles for New Development
• Caring for the Environment
• Employment and Economic Development
• Housing and Community Facilities
• Shopping and Leisure
• Transport
• Resources and Services

The LDP also includes a Proposals Map which illustrates the policies and proposals on an Ordnance Survey base map.

5 The LDP itself cannot make development happen. Investment is needed from private sector developers and a range of public sector organisations to bring forward development proposals and supporting infrastructure. The LDP is accompanied by an Action Programme which sets out how the Council intends the plan to be implemented. It includes a list of actions required to deliver the policies and proposals, including who is to carry out the action and the timescales involved.

6 In Scotland’s four city regions, the development plan is made up of a Strategic Development Plan (SDP) as well as the LDP. The SDP for the Edinburgh city region has been prepared by SESPlan, the Strategic Development Planning Authority for Edinburgh and South East Scotland. SESplan comprises six member authorities – The City of Edinburgh, East Lothian, Fife, Midlothian, Scottish Borders and West Lothian.

The SDP vision is that:

7 ‘By 2032, the Edinburgh City Region is a healthier, more prosperous and sustainable place which continues to be internationally recognised as an outstanding area in which to live, work and do business’.

It includes eight aims and a spatial strategy aimed at meeting three key challenges - climate change, demographic change and sustainable economic growth.
8 Edinburgh’s LDP is consistent with the SDP and its Supplementary Guidance on Housing Land and has a key role in helping to meet its aims and deliver its strategy.

9 The Council is preparing supplementary guidance in connection with:
   - Policy Emp 2 Edinburgh BioQuarter
   - Policy Ret 9 in relation to alternative uses in town centres
   - Policy Del 1 in relation to developer contributions
   - Policy RS 1 in relation to heat mapping.

This approach allows more detailed consideration of these topics in consultation with all interested parties. Once adopted, this supplementary guidance will form part of the development plan and be treated as such in determining planning applications.

10 In addition, the Council will continue to prepare, use and review its non-statutory guidelines (referred to collectively as Council guidance in this plan), development briefs and frameworks to provide detailed advice on a range of planning matters.

The first Proposed LDP (March 2013) was prepared on the basis of the Proposed SDP. A representation period followed in 2013. Scottish Ministers approved the Strategic Development Plan in June 2013 and required SESplan to prepare Supplementary Guidance to distribute an increased overall housing requirement amongst the six Council areas. These changes led to the preparation of the Second Proposed Plan, which was published for representations from August to October 2014. An examination to deal with the representations ran from June 2015 to June 2016. It recommended modifications, leading to the adopted Plan.

The main stages in the LDP programme are summarised below.
Part 1

Strategy and Proposals
Figure 1 LDP Spatial Strategy Summary Map

- Major new development in Strategic development area
- New housing allocations elsewhere
- Employment centre
- Large area of regeneration
- Green belt controlling outward growth of city
- Greenspace
- Tram line safeguards
- Watercourse
1 Aims and Strategy

The challenge for this Local Development Plan (LDP) is to help make Edinburgh the best place it can be, for everyone, now and in the future. This is not an easy challenge. We are living in tough economic times when difficult choices have to be made between competing priorities. In facing this challenge, the LDP aims to:

1. support the growth of the city economy
2. help increase the number and improve the quality of new homes being built
3. help ensure that the citizens of Edinburgh can get around easily by sustainable transport modes to access jobs and services
4. look after and improve our environment for future generations in a changing climate and
5. help create strong, sustainable and healthier communities, enabling all residents to enjoy a high quality of life.

These aims are inter-linked and each can have impacts, both positive and negative, on the other four. The role of the LDP is to balance these aims to maximise the benefits of development for the good of Edinburgh. The LDP aims support the vision and outcomes outlined in the Council’s Strategic Plan 2012-2017.

The Strategic Development Plan for Edinburgh and South East Scotland (SDP) identifies four Strategic Development Areas in Edinburgh. These will be the biggest areas of change over the next 5-10 years, providing a focus for new housing development, investment opportunities and job creation in locations with good accessibility to existing or planned public transport services. The LDP includes significant development proposals in these areas. It also supports change elsewhere in the city, for example, regeneration opportunities, redevelopment of vacant sites, green network improvements, new uses for empty commercial units and increased densities in appropriate locations.

The LDP supports Edinburgh’s role as Scotland’s capital city and recognises its importance as a key driver of the Scottish economy. Whilst the LDP promotes change and supports the growth of the city, it also places considerable importance on retaining and where possible enhancing Edinburgh’s built and natural assets for future generations. The green belt plays an important role in directing the planned growth of the city and supporting regeneration. The quality of Edinburgh’s buildings, streets and spaces influences the wellbeing of people living and working in the city and helps attract investment and create jobs. The LDP policies to protect and enhance the built and natural environment are therefore an integral part of the overall strategy. Figure 1 summarises the LDP’s spatial strategy and shows what it means for different parts of the city.
Edinburgh is a successful and growing city. The LDP strategy directs future growth to four Strategic Development Areas – major redevelopment opportunities in the City Centre, continuing regeneration at Edinburgh Waterfront, urban expansion with new tram and rail infrastructure at West Edinburgh and housing and business development on a range of sites in South East Edinburgh. In addition to new greenfield housing allocations in West Edinburgh and South East Edinburgh Strategic Development Areas, new sites have also been identified at Queensferry, Currie and Balerno.

The plan continues to promote the reuse of previously developed land and relies on windfall sites to contribute to meet the city’s housing requirement. Potential large scale regeneration opportunities are shown on Figure 1. These are supported by the LDP’s policies and some have master plans or development briefs to guide their development. Prior to identifying additional greenfield housing sites, consideration has been given to potential new brownfield opportunities within the existing urban area. The LDP maintains a green belt around Edinburgh whilst ensuring the strategic growth requirements of the SDP can be accommodated. Key elements of the green belt controlling the outward growth of the city are identified on Figure 1.

The LDP strategy directs new housing to sites which best meet a range of assessment criteria including landscape impact, green belt boundaries, accessibility to public transport and infrastructure capacity. One of the new housing sites (at Brunstane) will result in further coalescence between Edinburgh and Musselburgh. Whilst development resulting in the coalescence of settlements is not normally supported, it is justified in this instance because this site compared favourably to other possible options in the housing site assessment - see Volume 2 of the Environmental Report Second Revision.
2 A Plan to Protect and Enhance the Environment

1) Climate Change

17 The Climate Change (Scotland) Act 2009 and the Planning etc. (Scotland) Act 2006 place a duty on the Council to act in the best way to reduce emissions, adapt to climate change and prepare development plans to further sustainable development. Scottish Planning Policy (SPP) also requires development plans to ensure that the siting, design and layout of all new development will limit likely greenhouse gas emissions.

18 The Council’s commitment to fulfilling these duties is evident throughout the LDP, with policies addressing both the reduction of greenhouse emissions and the ability to adapt to a changing climate. The LDP:

• promotes development in sustainable locations and requires new buildings to include carbon reduction measures

• promotes sustainable and active travel

• supports small to medium scale, decentralised and community based renewables, and the greater use of micro-generation of renewable energy

• supports the adaptation of existing homes to reduce energy use, including listed buildings and those located in conservation areas, provided there is no adverse impact on historic character and appearance

• aims to enhance the city’s green network by encouraging land management practices which capture, store and retain carbon, prevent and manage flood risk

• supports the delivery of facilities needed to divert waste away from landfill and promote the prevention, reuse, recycling and recovery of materials (including heat from waste), with disposal to landfill as the final option.

</table>

2) Edinburgh’s Environmental Assets

19 Edinburgh’s natural and historic environment contributes to its distinctive character, local appeal and world-wide reputation. The city lies between the internationally important habitat of the Firth of Forth and the dramatic backdrop of the Pentland Hills Regional Park. The Old and New Towns of Edinburgh World Heritage Site and Edinburgh’s conservation areas comprise
architecturally significant neighbourhoods and villages, together with many individual listed buildings. These interact with the city’s open hills and wooded river valleys, to create a unique and diverse townscape. The LDP area supports a range of protected plants and animals and also contains archaeological remains providing valuable evidence of how we used to live.

20 Edinburgh’s built, cultural and natural heritage are valuable assets which contribute to broader strategic objectives of sustainable economic development, regeneration and community development and provide the context for good urban design. The proper conservation and management of these assets is an integral part of the wider planning function of the Council.

21 The detailed policies in Part 2 Section 3 (Caring for the Environment) will be used to ensure development proposals protect and, where possible, enhance the important features of the historic and natural environment.

Historic Environment

22 Edinburgh contains the greatest concentration of built heritage assets in Scotland. There are many elements of Edinburgh’s built heritage worthy of protection. The Edinburgh Built Heritage Strategy aims to ensure an understanding of Edinburgh’s heritage assets in order that they can be protected and conserved for existing and future generations, and managed in a co-ordinated and structured manner.

World Heritage Sites

23 Two of Edinburgh’s most widely acclaimed assets are its World Heritage Sites. World Heritage Sites are places of outstanding universal value, recognised under the terms of the 1972 UNESCO Convention concerning the Protection of the World Cultural and Natural Heritage. The ‘Old and New Towns of Edinburgh’ became a World Heritage Site in 1995, and the ‘Forth Bridge’ became a World Heritage Site in 2015. The boundaries are shown in Figure 3a and Figure 3b and on the Proposals Map.

24 UNESCO requires every world heritage site to have a management plan which says how the Outstanding Universal Value (OUV) of the Site will be protected. OUV is the collection of attributes which make the area special and give Edinburgh its international importance.

Figure 3a - The Old and New Towns of Edinburgh World Heritage Site
Edinburgh’s World Heritage Site Management Plans have been prepared by a partnership of the Council, Historic Environment Scotland and Edinburgh World Heritage. They provide a link between the international requirements of World Heritage, the planning process and the wider management issues involved in protecting complex Sites in Edinburgh. The Management Plans informs separate Action Plans and may be a material consideration for decisions on planning matters.

Listed Buildings

Listed Buildings are buildings of special architectural or historic interest. Edinburgh has the greatest concentration of listed buildings in Scotland - around 5,000 listed items comprising 31,500 individual buildings. 75% of buildings in the World Heritage Site are listed.

Listed buildings have statutory protection, which means that listed building consent is required for the demolition of a listed building, or its alteration or extension in any manner which would affect its character. Some proposals may also require planning permission. Development plan policies have a role to play in helping to protect listed buildings, their setting and features of special interest.

Conservation Areas

Across Edinburgh there are a number of designated conservation areas. These are areas of special architectural or historic interest, the character or appearance of which should be conserved or enhanced. A quarter of Edinburgh’s urban area lies within a conservation area. Each conservation area has its own unique character and appearance that is identified in a character appraisal. The underlying principle behind the designation of the conservation areas is to maintain the variety of character that illustrates the history of Edinburgh. An ongoing review of conservation areas will consider amendments to boundaries, opportunities for enhancement, and the designation of new conservation areas. In conservation areas, consent is required for changes such as demolitions and window alterations, which elsewhere in the city wouldn’t require permission. This additional level of control helps to ensure that small scale incremental changes do not damage the character of the conservation areas. The Proposals Map and Appendix A show which parts of the city are covered by conservation areas.

Inventory of Gardens and Designed Landscapes

The national Inventory of Gardens and Designed Landscapes is compiled by Historic Environment Scotland and includes 21 sites in Edinburgh. The
Inventory sites are identified on the Proposals Map and the Council is required to consult Historic Environment Scotland on proposals affecting these. The Council will protect Inventory sites and consider whether restoration or improvement of historic landscape features can be achieved through development proposals.

Archaeology

30 Edinburgh has a wealth of archaeological resources, from buildings to buried remains and marine wrecks, dating from earliest prehistory to the 20th century. This archaeological resource is finite and non-renewable. It contains unique information about how the city’s historic and natural environment developed over time. In addition to providing a valuable insight into the past, archaeological remains also contribute to a sense of place and bring leisure and tourism benefits. Care must be taken to ensure that these are not needlessly destroyed by development.

31 The Council maintains a Historic Environment Record of known designated and non-designated archaeological remains which in 2013 contains 63 nationally important scheduled monuments protected by the Ancient Monuments and Archaeological Areas Act 1979.

32 There may also be many potentially important archaeological features which have not yet been discovered. These are therefore not included in national or local records. Scottish Planning Policy sets out the Government’s approach to protecting archaeological remains and the weight to be given to archaeological considerations when assessing against the benefits of development. Detailed advice is provided in Planning Advice Note 2/2011 Planning and Archaeology.

Natural Environment

33 Edinburgh’s open spaces and landscape features contribute to the structure and identity of the city, enhance the quality of life of residents and the city’s appeal as a place for tourism and investment. The city’s natural environment also supports a diversity of habitats, flora and fauna.

Green Belt

34 The Edinburgh Green Belt extends beyond the City of Edinburgh Council area, into East Lothian and Midlothian. Its purpose is to:

- direct planned growth to the most appropriate locations and support regeneration
- protect and enhance the quality, character, landscape setting and identity of the city and neighbouring towns
- protect and give access to open space within and around the city and neighbouring towns.

Green belt designation can also be used to prevent the coalescence of settlements.

35 The LDP defines green belt boundaries to meet these purposes, ensuring that the strategic growth requirements of the SDP can be accommodated. The boundaries of the green belt shown on the Proposals Map are largely unchanged from previous local plans. However, some areas have been taken out of the green belt for the following reasons:

- land in West Edinburgh and South East Edinburgh Strategic Development Areas to meet SDP strategic housing requirements
To ensure the Edinburgh Green Belt continues to meet its objectives in terms of directing planned growth, protecting landscape setting and providing access to open space, the LDP controls the types of development that will be allowed in the green belt. The LDP also promotes opportunities to enhance the appearance of the green belt and to increase countryside access.

**Landscape**

37. The Council’s Natural Heritage Strategy sets out how planning can help meet the objectives of national landscape policy and the commitments of the European Landscape Convention and Scotland’s Landscape Charter.

38. Special Landscape Areas (SLAs) are designated to protect locally important landscapes from development which would harm their character and appearance. 22 SLAs are identified on the Proposals Map due to their distinctive characteristics and qualities, which contribute to the city’s unique setting and sense of place. These include examples of Edinburgh’s coastal margin, hills, valleys and designed landscapes, which are described in the ‘Statements of Importance’ prepared for each SLA.

39. Outwith the SLAs, a range of design and environmental policies and guidance highlight the value and potential of all landscapes. The LDP recognises that development can bring benefits through conserving and enhancing landscape character and important topographical features and creating future landscapes of quality and character in the provision of new green infrastructure.

**Trees and Woodland**

40. Trees and woodland make an important contribution to the character and quality of the urban area and countryside providing biodiversity, landscape and cultural benefits. Specific legislation protects trees in conservation areas and those covered by a Tree Preservation Order. The Edinburgh and Lothians Forestry and Woodland Strategy provides a long term vision for woodland creation and management to increase woodland cover and create better
links. Opportunities will be taken to deliver the Strategy through greenspace proposals and management of the woodland resource throughout the city.

**Biodiversity**

41 The Council’s Natural Heritage Strategy sets out how planning can meet the objectives of national policy on biodiversity and fulfil the commitments of the Biodiversity Duty and the Scottish Geodiversity Charter. Planning decisions must comply with environmental legislation on international and national protected sites and species. In addition, Local Nature Reserves and Local Nature Conservation Sites are identified to protect biodiversity at the local level and are shown on the proposals map. The plan includes policies relating to a range of biodiversity designations.

42 LDP policies and Council guidance also recognise the value and potential of biodiversity outwith designated areas and set out key principles for enhancing habitat and ecosystems.

**Water and Air**

43 The water environment is a key natural resource which requires stringent protection from the potentially harmful effects of new development, both on ecological quality and in adding to flood risk. Within the urban area, some built and some unbuilt areas have experienced flooding in extreme weather conditions. The Council, with others, has a responsibility to reduce overall flood risk. It has completed a flood prevention scheme for the Braid Burn and is implementing one for the Water of Leith. It has also identified unbuilt areas of land which fulfil an important flood function, and which should be allowed to flood in order to protect other, built-up areas from floodwater. These are shown on the Proposals Map as areas of importance for flood management. A flood map published by the Scottish Environment Protection Agency shows some areas on Edinburgh’s waterfront potentially at medium to high risk of coastal flooding, taking into account climate change. The LDP does not prevent development in such locations but will require all proposals to consider and address any potential risk of flooding.

44 The planning system has a role to play in the protection of air quality, by ensuring that development does not adversely affect air quality in Air Quality Management Areas (AQMAs) or, by cumulative impacts, lead to the creation of further AQMAs in the city. These are areas where air quality standards are not being met, and for which remedial measures should therefore be taken. AQMAs have been declared for five areas in Edinburgh - the city centre, St John’s Road, Corstorphine, Great Junction Street in Leith, Glasgow Road (A8) at Ratho Station and Inverleith Row/Ferry Road junction. Poor air quality in these locations is largely due to traffic congestion. The Council has prepared an action plan setting out measures intended to help reduce vehicle emissions within these areas. The Council monitors air quality in other locations and may need to declare further AQMAs.

3) **Creating Successful Places**

**Place-making and Design**

45 Edinburgh’s distinct geography and rich and varied heritage of buildings and urban design combine to create a cityscape of excellence. New development, through its design and contribution to place-making, should enhance not detract from the city’s overall character and quality of environment. Good
design can help achieve a wide range of social, economic and environmental goals, creating places that are successful and sustainable. The design of a place can define how people live, how much energy they use, how efficient transport systems are and whether businesses succeed. The LDP’s design related policies aim to raise design quality and create successful places. Council guidance supports these policies and provides more detailed information and advice.

This LDP is also supported by a wide range of area and site specific design guidance aimed at promoting high quality place-making and design. These frameworks, development briefs and master plans can be viewed on the Council’s website. Their role is to guide and control development, taking account of the particular characteristics of a site or area and addressing matters such as mix of uses, form and height of buildings, streets and public spaces. In creating high quality places, the spaces between buildings i.e. streets, civic squares and public realm, should be given as much consideration as the design of buildings.

The site briefs and development principles included in Part 1 Section 5 set out key design requirements to guide the development of new housing sites and other major development opportunities. Master plans should be prepared by developers as part of the planning application process to demonstrate how their proposals meet the LDP’s design and place-making objectives and any site specific requirements. Master plans should also provide information on the mix of uses, how a development relates to the surrounding area and, where relevant, proposals on an adjacent site and development phasing.

### Green Network

The green network is the linking together of natural, semi-natural and man-made open spaces to create an interconnected network that provides recreational opportunities, improves accessibility within the urban area and to the surrounding countryside and enhances biodiversity and the character of the landscape and townscape, including the setting of new development. Edinburgh’s green network forms part of a wider Central Scotland Green Network (CSGN), which is identified as a national development in National Planning Framework 3. The Council is a signatory to the CSGN declaration and is working in partnership with neighbouring authorities and other stakeholders to support and deliver a range of projects.

Some parts of the green belt contribute to Edinburgh’s green network. Key elements include the Pentlands Hill Regional Park, Bonaly Country Park, Cammo estate, the Water of Leith, the Union Canal, Waterfront Promenade and the proposed South East Wedge parkland.

Through various policies, the LDP aims to protect, promote and enhance the wildlife, recreational, landscape and access value of the green network. Developments are expected to incorporate elements that positively contribute to the green network through, for example:

- providing new open space and/or improving the quality of, or access to existing public open space, thus, reducing areas of deficiency
- incorporating existing landscape features in new development and providing new landscape planting and other green infrastructure along water courses, coast and urban edge
Part 1 Section 2 - A Plan to Protect and Enhance the Environment

- extending and linking to the existing path and active travel network where opportunities arise
- providing for a range of different recreational uses which promote healthy living
- providing new and/or enhancing existing wildlife habitats through building and landscape design, thus, preventing habitat fragmentation where possible
- managing surface water drainage, treatment and flood risk through sustainable urban drainage, providing amenity and biodiversity benefits e.g. green roofs, swales and ponds
- mitigating and adapting to the impacts of climate change e.g. resource efficient design, planting trees to capture carbon, intercept and absorb rainfall.

Enhancements of the green network will be required to mitigate any impacts from development on existing wildlife habitats or potential connections between them, or other features of value to natural heritage, green space, landscape and recreation. Developers must ensure that green networks are considered in the preparation of future planning applications. Figure 5 is an indicative map of Edinburgh’s green network illustrating existing provision and opportunities to improve and/or extend the network.

Development on greenfield housing sites provides opportunities to extend existing green corridors into the wider countryside. Green network enhancement should be an integral part of the new LDP housing proposals. Green network opportunities are highlighted in the housing site briefs in Part 1 Section 5.
In 2010, the Council prepared an Open Space Strategy based on an audit of open space resources across Edinburgh. Its purpose is to ensure a co-ordinated and consistent approach to meeting Edinburgh’s open space needs and protecting and developing the city’s network of open spaces. The Strategy sets standards for the provision of different types of open space and identifies where these standards are not currently met. The Strategy, together with 12 accompanying action plans, identifies opportunities to improve the quantity and quality of open space provision in Edinburgh. A replacement strategy was published in draft in 2016.

The LDP includes 11 greenspace proposals (Table 1). The majority of these relate to the creation of major new greenspace in conjunction with wider redevelopment proposals. These will play an important role in meeting the open space needs of new residents and will also bring benefits for neighbouring existing communities. Where possible, these proposals will be incorporated into Edinburgh’s green network by creating and improving connections to other spaces.

<table>

<th>Proposal</th>
<th>Comments</th>
</tr>
</thead>
</table>
| Reference: GS 7  
Name: Gogar Burn  
Proposal: Diversion of Gogar Burn | Proposed diversion of the Gogar Burn as shown on the Proposals Map. This will bring benefits in terms of reducing flood risk, improving water quality and enhancing biodiversity. |
| Reference: GS 8  
Name: Inverleith Depot  
Proposal: Conversion of service depot into greenspace | The Council is keeping the operational role of its service depots under review. If that process determines that the depot at Inverleith Park is no longer required for depot functions or other services, it can be converted into green space. The type(s) of greenspace should be identified at that stage in consultation with the local community and should take account of local and citywide needs. |
| Reference: GS 9  
Name: Broomhills Park  
Proposal: New large park in housing-led development site | The centre of the Broomhills housing site (Proposal HSG 21) is a raised knoll which must remain undeveloped to reduce impact on the landscape setting of the city. This is an opportunity to create a new community park which benefits from attractive views. It should be landscaped and maintained to meet the Council’s large greenspace standard. |
| Reference: GS 10  
Name: Clovenstone Drive  
Proposal: Greenspace enhancement | Proposals to enhance existing greenspace in conjunction with housing development on adjacent site (Proposal HSG31). Will include provision of play space and upgrading of football pitch. |
| Reference: GS 11  
Name: Newmills Park  
Proposal: New linear park | Proposal to create a new 3 hectare linear park in conjunction with housing development on adjacent site (Proposal HSG 37). It should be landscaped and maintained to meet the Council’s large greenspace standard. |
3 A Plan to Provide Jobs, Homes and Services in the Right Locations

1) Economic Development

The Council’s economic strategy seeks sustainable growth through investment in jobs – focussing on development and regeneration, inward investment, support for businesses and helping unemployed people into work or learning. A successful Edinburgh economy will have wider implications across the city region and for Scotland as a whole. The LDP has a key role in helping to deliver this strategy.

The strength of Edinburgh’s economy is based on a range of key sectors, for example tourism, financial services, life sciences and higher education. Edinburgh also has a wide range of cultural, arts and sports venues which bring economic benefits as well as enhancing the wellbeing of residents and visitors. The LDP supports existing businesses, makes specific provision for a growing student population, continues to promote previously identified economic proposals and highlights new investment opportunities.

There are many economic development opportunities across the city, available to accommodate businesses of varying types and sizes (see Figure 6). These include seven special economic areas, strategic office locations in the city centre, Leith and Edinburgh Park, and planned industrial estates and areas such as Newbridge.

Economic growth is a key aim of the Strategic Development Plan. The SDP requires the LDP to retain existing levels of strategic employment land and provide a generous range and choice of employment sites in accessible locations. It also recognises the important role of the Edinburgh city region as a key driver of the Scottish economy. Strategic enhancement of Edinburgh...
Airport has the status of a national development along with associated provision for business space/mixed use and a new National Showground Facility. In this context the plan identifies land for the expansion of Edinburgh Airport, proposals for business and mixed use at the International Business Gateway and a safeguarded site to the south of the A8 for a new National Showground Facility. The Scottish Government has also identified two enterprise locations in Edinburgh in recognition of their importance to the national economy - Leith Docks (low carbon/renewables) and Edinburgh BioQuarter (life sciences).

**Edinburgh's Special Economic Areas**

The LDP identifies seven ‘special economic areas’ (see Table 2), all of which are of national or strategic economic importance, providing or with the potential to provide a significant number of jobs. The plan includes individual policies for six of these sites (Policy Emp 2 – Emp 7) to ensure development proposals realise their economic potential. A slightly different approach is taken for Leith Docks where economic proposals will be assessed using the general Policy Emp 8 and the area based Policy Del 3.

<tbody>
<tr>
<td>RBS Headquarters, Gogarburn</td>
<td>The main purpose of the site is for office development in a high quality landscape setting. A tram stop is to be provided to the north east of the site, increasing accessibility by public transport. Part of the site remains undeveloped and provides the opportunity for additional office and ancillary development.</td>
</tr>
<tr>
<td>Leith Docks</td>
<td>The main purpose of this area is for business and industry. The National Renewables Infrastructure Plan highlights the potential of Leith Docks as a suitable location for the manufacturing and servicing of wind turbines and other equipment to support the off-shore renewables industry.</td>
</tr>
</tbody>
</table>

2) Housing and Community Facilities

Edinburgh is a growing city as a result of increased birth rates, residents living longer and people moving into the area for work or study. Its population is now 477,000 (National Records of Scotland, 2011 Census). Population and household changes have implications for housing need which in turn influences the amount of housing land to be identified in LDPs. Providing more and better homes for people is one of the overall aims of the plan, to help meet housing need and support economic growth. The LDP also recognises that a growing population increases the need for local shops and community facilities such as schools, health care services and community centres.

A housing needs and demand assessment (HND A) for South East Scotland...
was undertaken as part of the preparation of the Strategic Development Plan and local housing strategies across the SESplan area. The SESplan area, which covers Edinburgh, the Lothians, Scottish Borders and part of Fife, functions as one housing market area. This means that some of the housing demand generated by the city can and will be met in the wider city region.

The approved SDP indicates that land for a total of 107,560 new homes will be required across the SESPlan area in the period up to 2024. SESPlan has prepared Supplementary Guidance which sets out how much of this requirement should be met in each Council area. The requirement for the City of Edinburgh Council area is:

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>22,300</td>
<td>7,210</td>
<td>29,510</td>
</tr>
</tbody>
</table>

The rate at which housing sites are developed is constrained by a variety of factors including market conditions. The SDP accepts that the required housing targets will be challenging to deliver. It stresses the importance of ensuring growth is accompanied by the appropriate infrastructure. It also requires greenbelt release to be minimised. Current programming assumptions are subject to consultation with the house-building industry and are monitored and updated through an annual housing land audit. Figure 7a shows the current programming assumptions (drawing on the 2015 housing land audit) for existing sites and new sites as identified through this plan. Alternate figures presented by the house-building industry assume a more significant on-going shortfall extending over the plan period and beyond. There has been a recent increase in completions and the Council considers it has identified land with sufficient total capacity overall. However Figure 7a signals a shortfall in the effective housing supply to 2019 and potential on-going difficulties in maintaining a 5 year land supply.

The Council has a clear role in working with developers and other agencies to ensure that there are no land use planning barriers to an increased take up of its identified stock of housing land. This will be facilitated through Supplementary Guidance to set out a realistic approach to enabling infrastructure provision taking into account financial viability and looking at innovative approaches to forward and gap funding. This will be particularly important if the considerable potential of the waterfront is to be realised.

It may take time for any increase in the uptake of the identified land supply and this may create pressure for the release of additional land through Policy Hou 1. However any shortfall in the housing land supply, whilst carrying considerable weight, does not over-ride other considerations such as directing development to sustainable locations, securing green belt objectives and the appropriate provision of infrastructure.

The current housing target is based on a ten year period and the development plan is to be reviewed every five years. The process of preparing a new SDP is already underway and the plan will be due for replacement in 2018. An early review of this local development plan is proposed in order to ensure a timeous response to any revised strategic housing target and to secure an ongoing sufficient supply of housing land.

The City Housing Strategy 2012-2017 was approved in December 2011. It aims to deliver three outcomes:

- People live in a home they can afford
- People live in a warm, safe home in a well-managed neighbourhood; and
- People can move if they need to.

This LDP can help meet these outcomes through the identification of sites to increase the housing supply and the inclusion of policies on affordable housing, sustainable building and design and place-making.

The proposals listed in Tables 3 and 4 provide a generous supply of land for housing development on a range of sites across the city. Proposals HSG 1 – HSG 18, EW 1a-c, EW 2a-d, CC 2 – CC 4 relate to sites which already have planning permission for housing development or were identified as housing proposals in previous local plans. Sites HSG 19 – HSG 37, Del 4 and Emp 6 are new housing opportunities identified to meet Edinburgh’s housing requirement. Detailed information on these proposals is provided in Part 1 Section 5. Apart from sites identified for development in this plan to deliver the planned growth of the city, housing on greenfield land is unlikely to be supported.
The plan aims to ensure that housing development on the sites listed in Tables 3 and 4 and any other site that emerges during the period of the plan, provides for a range of housing needs, meets climate change and sustainable development objectives and is of a high quality in terms of site layout and design. It also includes policies to ensure development doesn’t detract from the appearance of or cause nuisance or disturbance in existing housing areas.

Since its introduction in 2001, the Council’s affordable housing policy has delivered nearly 700 new affordable homes. The availability of affordable housing continues to be a major issue in Edinburgh and the Council and its partners are using a range of innovative and flexible approaches to increase the supply of new affordable homes. More information is available in the Council’s Housing Strategy 2012 -2017. One element is the LDP requirement for all private development of 12 or more homes to include 25% affordable housing (Policy Hou 6).

In addition to providing affordable housing, the LDP also recognises the housing needs of particular groups such as students, gypsies, travellers and travelling showpeople.

East Edinburgh (SCH 7, SCH 8 and SCH 9) and Queensferry (SCH 10). The LDP Action Programme sets out the mechanisms for delivering new and expanded education facilities where required in conjunction with LDP housing proposals.

Anticipated population growth in Edinburgh and the housing proposals identified in Tables 3 and 4 will have implications for the provision of primary care and other community health services. The Council and NHS Lothian will work in partnership to identify actions to adjust existing health care facilities and services to meet the future needs of Edinburgh’s population. This could mean services being provided in a different way or the provision of new facilities.

### 3) Shopping and Leisure

Shopping and leisure uses are major providers of jobs, especially for young people, and have strong links with other economic activities, particularly tourism. In Edinburgh, shopping and leisure uses are mainly provided in a network of centres distributed across the city.

- **City Centre**: The retail core of the city centre is the largest shopping centre in the Edinburgh City Region with a wide range of shops and other entertainment, leisure and cultural uses and excellent public transport services.

- **Town Centres**: The other eight town centres serve as a focal point for their local communities providing a diverse mix of shopping facilities and other commercial and community services. Each of the town centres is characterised by traditional shop units under tenements located on main roads with good bus services.

- **Commercial Centres**: Seven shopping malls and retail parks of varying size and character. The individual characteristics of each centre are described in Table 7.

- **Local Centres**: There are 61 local centres (with four more proposed) located across the city. These contribute to the quality of life and sense of identity of neighbourhoods by providing local shops and other services within walking distance. Sizes vary from larger local centres such as Wester Hailes, Easter Road and Davidson’s Mains to smaller parades of shops in the villages of Currie and Queensferry.

Figure 8 Shopping Centres
The LDP continues to support the existing network of city, town and local centres. These are important focal points for people who live and work in Edinburgh, providing shopping, leisure and community facilities in locations which can be easily accessed by walking, cycling or public transport. It also recognises the valuable role of commercial centres as popular destinations for shopping and leisure activities.

The recession has had a significant adverse impact on many conventional retail businesses. Growth in consumer spending has slowed and it is unlikely that spending rates will increase again in the next five years. Some high street brands have gone into administration, leaving empty units. Others are considering cutting floorspace targets or reducing their number of stores. How customers make purchases is also changing, with more on-line spending, which also has implications for how we plan for retail uses.

Prioritising the city centre remains a key objective of the LDP. The Council aims to strengthen the position of the city to maintain its shopping role within the region and to attract more investment. The planned redevelopment of the Edinburgh St James will bring major benefits to the city centre providing additional retailing floorspace, significant environmental improvements and a more vibrant mix of uses (Proposal CC 1). A change in policy from previous plans aims to improve the overall shopping experience in the city centre by allowing uses other than shops in ground floor units in the retail core. Supplementary Guidance will set out how this change of policy will be applied.

Policies will continue to direct new development to existing centres, with town centres being given priority over commercial centres. There is not expected to be sufficient growth in retail spending over the next five years to support further expansion of commercial centres (over and above that which already has planning permission), whilst also sustaining the existing network of town and local centres. Despite recent economic improvements and some increase in retail spending, the view of retail analysts is that the rate of spending growth will be well below that experienced in recent decades and largely offset by factors such as more efficient use of sales space and the continued increase in internet shopping. Justification for any net increase in retail provision in Edinburgh is expected to come mainly from population growth. However, there may also be opportunities to improve the quality of shopping and leisure facilities, including changes to layout of the centre and unit sizes. Table 7 takes account of these considerations and provides information on each of the commercial centres, including its characteristics, current expansion proposals and anticipated future role.

The factors affecting retail spending and provision will be kept under review, particularly as Edinburgh is a growing city where the population is expected to increase. Whilst the city and town centres are likely to remain the preferred locations for new shopping and leisure development, the policies relating to commercial centres may be revised in future plans.

**Proposed Use:** Creation of a new local centre  
**The site brief proposes a new local centre to meet local convenience needs centrally located within the site. The indicative location of this new centre is shown on the Proposals Map and should comprise of commercial units located under flatted development.** |

### 4) Transport

Reducing the need to travel and promoting use of sustainable modes of transport are key principles underpinning the LDP Strategy. Future growth of the city based on excessive car use and dependency would have serious consequences in terms of congestion and deteriorating air quality. This will have a knock on effect on the economy and environment and would also disadvantage people who do not have access to a car. An improved transport system based on sustainable alternatives to the car is therefore a high priority for Edinburgh. This is the central objective of the Council’s Local Transport Strategy, which proposes continued investment in public transport (including tram), walking and cycling.

The policies in Part 2 Section 7 support the transport strategy, by seeking to minimise travel demand and encourage a shift to more sustainable forms of travel. Major travel generating developments should take place in locations well served by public transport, walking and cycling networks, and development in non-central locations with limited sustainable travel options will be resisted. The LDP also helps reduce car dependency by encouraging higher densities in accessible locations and mixed use developments which
bring homes, shops and work places closer together, and by paying careful attention to the design of development and to the supply and quality of car and cycle parking provision.

86 A number of public transport improvements have been introduced in recent years, for example, bus priority measures on main roads and park and ride facilities. Other projects have started and will be completed over the next few years. Scottish Government, Network Rail and the Council are all committed to investing further in public transport infrastructure in and around Edinburgh.

87 The re-introduction of tram services will be an important part of an integrated transport network in Edinburgh. The tram link between the city centre and the Airport became operational in summer 2014. The Proposals Map safeguards two routes to extend the tram network. Work is underway on the Edinburgh and Glasgow Improvement Programme to improve rail connections between Scotland’s two main cities and includes the new Edinburgh Gateway Station and improvements at Waverley and Haymarket Stations. The Borders railway opened in 2015. A new Forth Road crossing is due to be completed in 2017. This will become the main route for general traffic allowing the existing Forth Road Bridge to become a dedicated public transport/walking/cycling corridor.

88 Edinburgh is a compact city and well suited to travel by cycle or on foot. As part of its Active Travel Action Plan, the Council is looking to increase the number of people walking and cycling, both as a means of transport and for pleasure. This takes into account the need to provide for people with limited mobility. The LDP includes safeguards for a number of public transport improvements, footpaths and cycleways. The implementation of these proposals will further improve accessibility across the city by sustainable transport modes.

89 There is a clear link between new development and impact on the transport network. As part of the LDP preparation, a transport appraisal has been undertaken to understand the transport effects of the new strategic housing sites and to identify the transport interventions needed to mitigate these. This work builds on previous transport studies which have identified a number of key measures necessary to support existing proposals. For example, the West Edinburgh Transport Appraisal undertaken in 2010 identified the transport measures required to support development proposals at Edinburgh Airport, the Royal Highland Centre and International Business Gateway (policies Emp 3 – Emp 5). These include the tram, Edinburgh Gateway Station and new and widened roads and junction improvements. The North East Edinburgh Transport Appraisal identified the need for a new east-west street at Leith Waterfront to support environmental improvements and accommodate additional traffic. Proposals T16 - T20 are required in conjunction with new housing proposals in West and South East Edinburgh.

</tbody>
</table>
5) **Resources and Services**

The LDP has a role in supporting development which meets needs vital to modern life. These include the use of natural resources such as energy and materials, and the provision of network services such as water supply, drainage and telecommunications.

### Sustainable Energy

The Council requires new buildings to include carbon reduction measures. This will help meet climate change targets but only by a small amount, at least in the short term. There is also a need to help make existing buildings more efficient and to support new low and zero carbon energy generation developments.
The majority of on-shore capacity for meeting national targets will come from large-scale developments such as wind farms. These are not appropriate for location in Edinburgh’s urban area or surrounding countryside, much of which is green belt and/or is in close proximity to Edinburgh Airport. The LDP instead supports small-scale wind turbines and other forms of low and zero carbon energy generation, including solar panels, combined heat and power, district heating, ground source heat pumps, energy-from-waste and biomass.

Waste

Scotland’s national waste strategy, the Zero Waste Plan, is based on a waste hierarchy. This means that waste should be:

- prevented,
- reused,
- recycled or
- recovered, and that the
- landfilling of waste is the last resort.

The waste hierarchy is being implemented through the Waste (Scotland) Regulations 2012. These will lead to a significant increase in the number and range of waste management facilities needed in order to collect, sort and treat all waste (municipal, commercial and industrial) which would otherwise have gone to landfill.

The main types of installation that will be needed are: composting and anaerobic digestion facilities; transfer stations; materials recycling facilities; and plants for mechanical, biological and thermal treatment. There will also be opportunities to capture heat and power generated through the waste recovery process. Some developments may include a combination of the above processes.

Figure 10 Waste Management Safeguards
The Zero Waste Plan identifies the total operational capacity for waste management at both national and regional level. In the Edinburgh city region, some of the need will be met by a new waste management facility at Millerhill in Midlothian, dealing mainly with household waste.

Edinburgh’s household waste is only a quarter of total waste produced in the city, so more new facilities will be needed in the city region. The location of these facilities will depend mainly on the procurement of services from private waste management operators. However, the European Waste Framework Directive establishes the proximity principle. This aims to limit the environmental impact of transporting waste by ensuring all waste is managed as near as possible to its place of production.

Proximity can be relative – currently some waste types have to be transported elsewhere because the particular material recovery processes do not take place in Scotland. Edinburgh, as a concentration of homes and businesses, generates a significant amount of waste and so, where possible, should make some provision to deal with its own waste. Accordingly, this plan supports existing and new waste management facilities.

**Other Resources and Services**

The plan also:

- safeguards extraction of economically viable mineral deposits
- ensures that new development is adequately served by water supplies and drainage
- supports expansion of modern telecommunications, including the introduction of public wireless connectivity in public areas.
4 A Plan That Can Deliver

A successful plan is one that achieves the right balance between ambition and pragmatism. This plan is visionary and aims to make Edinburgh the best it can be. But it also takes account of the resources available to implement the policies and proposals, particularly in the context of current economic uncertainty.

In identifying new housing proposals, consideration was given to whether the sites can be made available for development and whether any necessary enhancements, in terms of accessibility or infrastructure are feasible.

The growth of the city, through increased population and housing, business and other development, will require new and improved infrastructure such as schools, public transport, changes to the road network and access to suitable greenspace. To ensure the city grows in a sustainable way, the infrastructure provision and enhancements associated with new development must be delivered. Otherwise future generations will have to deal with unacceptable levels of traffic congestion and housing areas with poor access to public transport and local services.

The plan will help in two ways. Firstly, it provides opportunities for business and service uses to locate close to new housing. The housing site briefs identify suitable locations for commercial units which could be occupied by a range of uses including healthcare practices and local services. Secondly, it is accompanied by an Action Programme which sets out how the infrastructure and services required to support the growth of the city will be delivered.

The timeous delivery of this infrastructure to address the individual and cumulative impacts of development is an important consideration. Policy Del 1 sets out a policy requirement to ensure that appropriate developer contributions are sought to enable this delivery at the appropriate time. Part of this approach will include the establishment of cumulative contribution zones.

In these zones contributions will be sought to address the impact of a number of sites within areas defined relative to schools, transport infrastructure, public realm and green space requirements. These will be based on the transport and education appraisals and the Open Space Strategy carried out by the Council during the plan preparation process. The relative zones will be mapped and defined through Supplementary Guidance. The geographical extent of a contribution zones relates to the type and nature of the action in relation to transport, education, public realm and green space.

Developer contributions must be proportionate and attributable to the impacts of the development. They also have to be realistic in light of current economic circumstances otherwise they may impede development. This is particularly important given the emphasis placed on securing the required uplift in housing completions. In this context mechanisms for forward and gap funding may also have to be considered.

To address the detail of these matters within the development plan statutory Supplementary Guidance is to be prepared. This should enable a clear understanding of what is required at the outset, provide the required basis for the Council’s approach to developer contributions, define cumulative contribution zones in mapform and address community concerns about the timeous provision of the required infrastructure. This should set a clear foundation for future action programmes which will be updated annually to provide a framework for the implementation of the specific actions required to ensure delivery.
A Plan for All Parts of the City

This plan provides support for four major development opportunities in the City Centre which were identified in previous plans or through the planning application process (Proposals CC1 – CC4). Table 10 summarises the main elements of these proposals. With the exception of Quartermile where development is well underway, it sets out key development principles to guide any new or revised proposals on these important sites.

Other major changes expected to take place in the City Centre in the next five or so years include the introduction of tram services running between York Place and the Airport, further investment and redevelopment along Princes Street, and at Haymarket, West Port/King's Stables and Dewar Place. A number of major public realm projects are also likely to be implemented. All future proposals in the city centre will be assessed in relation to Policy Del 2. Figure 11 illustrates the city centre locations where major change is either proposed or anticipated. There are not expected to be many other large scale redevelopment opportunities in the City Centre in the next five or so years. However, the cumulative effect of a number of smaller developments could bring significant benefits for the City Centre and Edinburgh as a whole.

The LDP strategy focuses the growth of the city on four Strategic Development Areas. This approach is consistent with the SDP and the Council’s economic strategy. This section of the plan sets out the main proposals, anticipated changes and key investment opportunities in each of the four Strategic Development Areas. It also explains what the plan means for others parts of the city, smaller settlements and the countryside.

City Centre

Edinburgh’s city centre is the vibrant hub of the city region – it’s the regional shopping centre and an important tourist destination with a wide range of entertainment and cultural attractions. It has excellent public transport connections and provides employment for over 80,000 people. Edinburgh city centre’s stunning setting and iconic architecture is celebrated internationally. It incorporates Scotland’s only urban World Heritage Site and many listed buildings and important green spaces. The city centre is also an area where people live, with a wide range of housing types and styles contributing to its character.

The plan aims to ensure that development in the city centre achieves the right balance between a number of competing priorities – from realising its economic potential, to protecting its built and natural heritage, from promoting its role as a capital city to making it an attractive place to live.
Figure 11 City Centre Overview Map

Indicative only - not part of the Proposals Map
Table 10 City Centre Proposals - Development Principles

Reference: CC 1
Location: Edinburgh St James
Description: Comprehensive redevelopment of the existing shopping mall, hotel, vacant offices and multi-storey car park. A development brief was approved in 2007.

Development Principles
Proposals should create the opportunity for:
- a more outward-looking and less dominating form of development than currently exists, with new buildings that are well integrated into the surrounding townscape, for example by re-establishing an active frontage to Leith Street
- a significant expansion of retail floorspace
- provision of offices, hotel, housing, leisure and cultural uses
- replacement provision of off-street short stay car parking for public use
- a new civic space and public pedestrian routes to strengthen links with the surrounding area, especially St Andrews Square and Princes Street
- development that enhances local views into and across the site and contributes positively to the historic skyline from more distant views.

Reference: CC 2
Location: New Street
Description: Mixed use redevelopment to create a sustainable and integrated city quarter in the heart of Edinburgh’s Old Town. A Master Plan was approved in 2006. Redevelopment is underway.

Development Principles
Proposals will be expected to provide for:
- a mix of uses including housing, offices, small business units, hotels, shops (including a small supermarket), food and drink premises and community facilities
- a close-grained layout which reflects the distinctive spatial pattern of the Old Town, provides a new strategic route between East Market Street and Canongate and includes a
new civic space within the site.

- new buildings, including landmark buildings, which respect the form and contours of the Waverley Valley and which preserve or enhance important existing views and the potential to create new views into and across the site.

Reference: CC 3
Location: Fountainbridge
Description: Comprehensive mixed use redevelopment of the land previously occupied by the Fountainbridge Brewery. Located close to the city centre and includes the Edinburgh terminus of the Union Canal. There are two approved development briefs for the site (Fountainbridge, 2005 and Tollcross, 2006). Development is underway.

Development Principles
Proposals will be expected to:

- provide mixed use development including a local centre, residential, office, small business units, retail, leisure, community and tourist/visitor facilities

- create a layout which integrates with adjoining neighbourhoods in Dalry, Tollcross and Viewforth

- improve north-south linkages, in particular provide a strong pedestrian/cycle link to Haymarket that reduces the barrier effect of the West Approach Road

- create new public spaces and streetscape consistent with the approved Fountainbridge Public Realm Strategy

- proposals should explore potential for expansion of water space and should provide attractive frontages to the canal, safeguarding its nature conservation. Proposals should also take the opportunity, where appropriate, to enhance the use, physical appearance and condition of the canal, where this would be of benefit to development implemented through Proposal CC 3.

- contribute to the improvement of Dalry Community Park (Proposal GS 1).

- protect and enhance key townscape views.

Reference: CC 4
Location: Quartermile
Description: Redevelopment of the historic Edinburgh Royal Infirmary site to create a sustainable, mixed-use urban community is well underway. The development involves a network of pedestrian routes and landscaped public spaces to draw the park directly into its heart. New development is combined with refurbishment of the historic buildings. On completion, Quartermile will be home to almost 2000 residents with 3000 people employed in its offices, shops, restaurants and a hotel.
North Edinburgh has seen 40 years of decline in industrial activity and port-related use of land. This has created an opportunity for mixed-use regeneration on the largest scale and has started to help meet the city’s growth needs, particularly for new housing. The regeneration of Edinburgh Waterfront has been guided by master plans and frameworks prepared in collaboration with the principal landowners.

These documents have set out long-term strategies which aim to:

- transform the waterfront into one of the city’s landmark features
- attract high quality developments which will contribute towards economic prosperity in the city region
- create distinctive high density urban quarters and build exemplar sustainable communities with a reduction in the influence of the car in design and layout
- support regeneration in adjoining areas and provide an incentive for the construction of the tram.

For much of the waterfront, the basis for the current vision remains unchanged. There is no identified demand for large-scale industrial uses in Granton or Central and Western Leith. There is still an overall housing need, and the Council still aspires to realise the waterfront’s potential as a series of attractive and memorable places.

This plan therefore continues to support the regeneration of Granton Waterfront and part of Leith Waterfront for housing and other uses. However, current economic conditions mean that progress on the ground will be slower than envisaged. Policy Del 3 sets out the principles which development must implement, if the full potential of the city’s waterfront is to be realised.

A new opportunity has emerged in the northern and eastern parts of Leith Waterfront (Leith Docks). The national renewable energy targets referred to in Figure 2 create the prospect of a much larger off-shore renewable energy industry in the North Sea. New large-scale industrial development in suitable ports will be needed to construct and service wind turbines and other equipment. The National Renewables Infrastructure Plan (2010) identifies Leith as the best location to accommodate major operations, supported by other east coast ports.

This is an opportunity to realise several LDP aims, in particular growing the number and range of jobs in the city and helping address climate change. The LDP therefore designates the north and eastern docks as a Business and Industry Area in which proposals are assessed using Policy Emp 8 in Part 2 Section 4. Other plan policies will also be relevant, including those which protect nationally and internationally designated nature conservation sites and key views across the city.

This change in policy designation means that the docks area of Leith Waterfront will now be unavailable for housing development. The short term implications of this change are addressed partly through the identification
of additional housing opportunities in Leith Waterfront and Granton as described in Table 11. Any longer term implications for the housing land supply across the city region will be considered through the SDP. Figure 12 shows how Edinburgh Waterfront has been subdivided for the purposes of the plan. Proposals in areas EW 1a-e should be guided by the Leith Waterfront Development Principles and in areas EW 2a-d by the Granton Waterfront Development Principles.

The Council recognises that only part of the housing capacity within the Edinburgh Waterfront will be delivered within the plan period, but considers that the local development plan should retain the proposals in full, because the longer term strategic importance of the waterfront outweighs the limited deliverability of the housing within the plan period.

Edinburgh Local Development Plan

November 2016

Part 1 Section 5 - A Plan for All Parts of the City
Table 11 Edinburgh Waterfront Development Principles

Leith Waterfront

Reference: EW 1a
Location: Leith Western Harbour
Description: Housing-led mixed use development with an approved master plan. Around a third of the estimated maximum housing capacity has been implemented.

Development Principles
Proposals will be expected to:
- complete the approved street layout and perimeter block urban form
- revise the housing mix towards a greater number of townhouses than identified in the master plan, where it would be appropriate in terms of place-making and would accelerate completions,
- meet the Council’s Large Greenspace Standard by delivering the Western Harbour Central Park (Proposal GS2)
- complete the partly implemented new local centre by providing smaller commercial units under flatted development on the other corners of the centre’s junction
- deliver school provision as specified in the Action Programme
- create a publicly-accessible waterside path around the perimeter of the area, connecting east and west
- design new housing to mitigate any significant adverse impacts on residential amenity from existing or new general industrial development
- review the flood risk assessment that has already been provided for this site.

Reference: EW 1b
Location: Central Leith Waterfront
Description: Area of commercial and housing-led mixed use development sites in various ownerships. Forth Ports Ltd has decided to retain land at the Britannia Quay and south of Edinburgh Dock in port related use, and therefore a modified approach to the development of this area from what is included in the Leith Docks Development Framework (2005) is required. The bullet points below within the development principles remain applicable, but the development framework will be reviewed in order to provide a revised approach to the development of the area, including a revised diagram representing this approach. The feasibility and route of the east-west cycle path shown on the Proposals Map will be further considered within the review of the development framework.

Development Principles
Proposals will be expected to:
- locate any major office development within the strategic business centre identified on the Proposals Map
- create a publicly-accessible waterside path connecting east and west
- help meet the Council’s open space standards through financial contributions to major improvements to or creation of off-site spaces
- design new housing to mitigate any significant adverse impacts on residential amenity from existing or new general industrial development
- review the flood risk assessment that has already been provided for this site

LDP provisions relating to Ocean Terminal are set out in Table 7 and Policy Ret 4.
Reference: EW 1c

Location: East of Salamander Place

Description: Housing-led mixed use development on sites in various ownerships. Housing shown in the Salamander Place Development Brief (2007) is under construction. There is now also an opportunity for housing to the east of the Leith Links Seaward Extension (Proposal GS 3). This land was identified for industry in the previous local plan and the development brief, but is no longer needed due to the increase in industrial land elsewhere in Leith Waterfront.

Development Principles

Proposals should provide for:

- (west) the key streets and frontages set out in the approved development brief
- implementation of the park extension
- (east) the key streets and frontages identified in the above diagram
- streetscape improvements along Salamander Street
- the design of new housing to mitigate any significant adverse impacts on residential amenity from existing or new general industrial development
- review the flood risk assessment that has already been provided for this site.

Reference: EW 1d and e

Location: Seafield (EW 1d) and Northern and Eastern Docks (EW 1e)

Description: Area of general industrial, storage and business development and port-related uses. Identified in this plan as a Special Economic Area. Identified nationally as an Enterprise Area, which has implications for tax and a speedier development management process. There is potential for new deep water berth(s) outside the current port lock gates. In order to provide a flexible context for renewable industry-related developments, this LDP does not set detailed layout or design principles.

Development Principles

Proposals should take account of the following:

- within the Northern and Eastern Docks (EW 1e), proposals will be assessed to ensure there are no adverse impacts on the nature conservation interests of the Firth of Forth Special Protection Area or other relevant Natura 2000 sites. Policy Env 13 will apply.
- the character and sense of place in The Shore is important to the tourism potential of Leith. Views from The Shore will be a factor in considering proposals for new larger buildings.
- the Seafield area (EW 1d) is the subject of a waste management / combined heat and power safeguard (see Policy RS 3).
- existing pedestrian footpaths at Marine Esplanade and Albert Road have the potential form part of a coastal cycle route and be extended to Salamander Street and Leith Links. These routes avoid the secure port area, which is no longer expected to be available as a section of the wider Edinburgh Promenade.
- review the flood risk assessment that has already been provided for this site.
### Table 11 Edinburgh Waterfront Development Principles

<table>
<thead>
<tr>
<th>Granton Waterfront</th>
</tr>
</thead>
</table>

**Reference:** EW 2a  
**Location:** Forth Quarter  
**Description:** Housing-led mixed use development on land primarily owned by National Grid. An approved master plan has been partly implemented, with several housing blocks, a major office development, a college and a new large park. A proposed new Local Centre to meet the convenience shopping needs of local residents and workers has been delivered in the form of a large foodstore. Additional housing capacity is now available on land formerly designated as part of a strategic business centre.

**Development Principles**

Proposals will be expected to:

- complete the approved street layout and perimeter block urban form
- provide housing-led development on sites formerly identified for major business-led development
- provide a housing mix that is appropriate to the site in terms of place-making and would maximise completions within this urban regeneration proposal within the plan period
- deliver school provision as specified in the Action Programme
- provide a strategic flood risk assessment

---

**Reference:** EW 2b  
**Location:** Central Development Area  
**Description:** Housing-led mixed use development on land assembled by a joint-venture regeneration company. Some housing development has been completed along a new avenue in accordance with an approved master plan. Additional housing capacity is now available on land formerly designated as part of a strategic business centre.

**Development Principles**

Proposals will be expected to:

- complete the approved street layout and perimeter block urban form
- provide housing-led development on sites formerly identified for major business-led development
- provide a housing mix that is appropriate to the site in terms of place-making and would maximise completions within this urban regeneration proposal within the plan period
- deliver school provision as specified in the Action Programme
- expressly encourage the enhancement of employment and a ‘destination’ through existing and new commercial, cultural, tourist and retail opportunities
- provide a strategic flood risk assessment.

---

**Indicative only - not part of the Proposals Map**

- Housing-led mixed use development
- Commercial-led mixed use
- Business & Industry area
- New green space
- Cycle/footpath safeguarded route
- New major streets
- Tram line safeguard
- School safeguard
- Cultural use or housing led regeneration

---

*Edinburgh Local Development Plan November 2016 Part 1 Section 5 - A Plan for All Parts of the City*
Table 11 Edinburgh Waterfront Development Principles

Granton Waterfront (continued)

Reference: EW 2c
Location: Granton Harbour
Description: Housing-led mixed use development on land owned by Forth Ports Limited and others. Some housing development has been completed in accordance with an approved master plan.

Development Principles
Proposals will be expected to:
• complete the approved street layout and perimeter block urban form
• provide a housing mix that is appropriate to the site in terms of place-making and would maximise completions within this urban regeneration proposal within the plan period
• meet the convenience shopping needs of new and future residents by implementing the proposed Local Centre (Proposed S2)
• complete the relevant section of the waterside Edinburgh Promenade
• provide for retained and improved mooring facilities and boat storage and retain Middle Pier as a ‘working pier’
• include tourism and waterfront-related leisure and entertainment uses
• provide a strategic flood risk assessment.

Reference: EW 2d
Location: North Shore
Description: Area identified for housing-led mixed use development in an approved master plan. However, the slower pace of development in the waterfront means that the North Shore area is unlikely to be available for residential development within the first half of this LDP period. Temporary consents for light industrial development would allow productive use of this area and address the small business needs targeted by Policy Emp 9 without prejudicing residential amenity in new development to the south.

Development Principles
Proposals will be expected to:
• be compatible with future residential development in Forth Quarter and the Central Development Area
• complete the relevant section of the waterside Edinburgh Promenade
• avoid prejudicing future housing-led redevelopment on their sites or on adjacent land
• provide a strategic flood risk assessment.
West Edinburgh

West Edinburgh focuses on land along the A8 corridor and new tram route and around the proposed Edinburgh Gateway inter-modal station at Gogar. It includes a number of major existing uses such as the Airport, Royal Highland Centre, Gyle and Hermiston Gait shopping centres and a range of employment/investment locations as shown on Figure 13. National planning policy identified the potential of this area for nationally important economic development through the enhancement of the Airport and Royal Highland Centre and opportunity for an International Business Gateway. The implementation of already committed public transport proposals, in particular the tram, will greatly enhance the accessibility of the West Edinburgh area.

This plan continues to support these important economic development opportunities and also major office development at Edinburgh Park/South Gyle and, previously identified, housing led regeneration proposals at Newbridge and Ratho Station. The Strategic Development Plan identifies West Edinburgh as a strategic growth area. A range of new opportunities for housing development are therefore being brought forward in the LDP. Transport assessments have been undertaken to identify key transport interventions, including measures to encourage public transport use, walking and cycling as well as junction upgrades and other road improvements required to support the proposed development.

Housing is proposed on two greenfield sites at Maybury and Cammo and as an integrated component of business led mixed use proposals in the IBG and Edinburgh Park/South Gyle. Proposals must accord with the relevant Site Brief or Development Principles to ensure high quality development consistent with the aims of the plan.
Figure 13 West Edinburgh Overview Map

Indicative only - not part of the Proposals Map
West Edinburgh - General Development Principles

122 All proposals will be required to make appropriate contributions to the delivery of the infrastructure necessary to support the development strategy. The general development principles below outline the anticipated main transport and education actions for West Edinburgh.

123 The Council's approach to infrastructure delivery is set out in Policy Del 1 and its associated Supplementary Guidance. Policy Tra 8 is also relevant in requiring cumulative and cross boundary transport impacts to be addressed. Development should only progress subject to sufficient infrastructure already being available or where it is demonstrated that it can be delivered at the appropriate time. Further assessment of individual and cumulative impacts may be required to further detail the required mitigation.

Transport Assessment

Contributions to address the area wide transport interventions, detailed below and as specified through Supplementary Guidance, will be applied through a cumulative contribution zone. Delivery will be monitored and managed through the Action Programme. The Council's approach to secure timeous delivery of the required infrastructure is to be detailed through its Supplementary Guidance.

Detailed Transport Assessments, where required, should include modelling of the cumulative effect of increased traffic flows on the trunk and local road networks (taking into account all known proposed development and any potential cross-boundary impacts). This should draw on the conclusions of the Council's Transport Appraisal and further work being carried out to assess the wider cumulative and cross-boundary impacts on the trunk road network and should show how mode share targets are to be met.

Education Appraisal

Contributions to the required education provision, as detailed below and as specified through Supplementary Guidance, will be applied where appropriate through a cumulative contribution zone drawing on the conclusions of the Council's Education Appraisal. The Council's approach to secure timeous delivery of the required schools capacity as outlined below is to be detailed through Supplementary Guidance. Delivery will be monitored and managed through the action programme.
The following sections indicate the main infrastructure requirements which were identified following initial assessment and should be considered in the context of Policy Del 1.

Scope of transport mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Del 1):

• Eastfield Road and Dumbells junction (T 9)
• Gogar Link Road (T 20)
• A8 additional junction (T 11)
• Improvements to Newbridge Roundabout (T 12)
• Bus Priority Measures on M8 and A89
• Improvements to Gogar Roundabout (T 13)
• Maybury Junction (T 17)
• Barnton Junction (T 19)
• Craigs Road Junction (T 18)

Scope of education mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Del 1):

• New Maybury (ND) primary school (SCH6)
• Extension to Gylemuir (ND) Primary School
• Extension to Hillwood (ND) Primary School
• Extension to Fox Covert (RC) Primary
• Extension at St Cuthbert’s RC Primary School
• High School Extension (ND) - Further detailed assessment is necessary to determine where the additional capacity would be best provided; either at The Royal High School, Craigmount High School or Forrester High School or a combination across some, or all, of these schools, and or
• Extension to St Augustines (RC) High School

All proposals will be required to make appropriate contributions to new and improved infrastructure as detailed in Part 2 Section 1 of the Plan.

Maybury and Cammo Site Brief

Edinburgh Local Development Plan
November 2016

Part 1 Section 5 - A Plan for All Parts of the City
Maybury and Cammo Site Brief - Development Principles

Description

The Maybury and Cammo sites lie within the Almond basin, set against the backdrop of Lennie Hill with views to the Pentlands to the south. These housing sites are served by bus, rail and tram connections and will be physically integrated with their surroundings by street design and green corridors linking to Cammo Estate Park and the River Almond to the north and the Gyle, Edinburgh Park and IBG to the south.

Comprehensive master planning and phasing of development will be required drawing upon place-making and street design principles to create distinctive and sustainable urban communities at the gateway to the City.

Maybury (HSG 19)

• development should start in the eastern part of the site forming an extension of the existing built up area.
• pedestrian/cycle bridge must be provided linking site with Edinburgh Gateway Station and providing onward connections to the Gyle and Edinburgh Park to the south and IBG to the west.
• new 30 m wide green network link is to be provided from new pedestrian/cycle bridge through the Maybury site to connect via Cammo Walk and Cammo Estate park to the north. This will provide a new, strategic, north-south green network link to the west of the City. No vehicular access should be taken through the green corridor.
• opportunity to change the character of Turnhouse Road through street design providing avenue trees, verges and incorporating existing stone walls. New residential development should be positioned to address Turnhouse Road. A new reduced speed limit will be required.
• the entirety of Craigs Road should be widened on the southern edge to facilitate all vehicle movements.
• opportunity for higher density development within 400 metres of pedestrian/cycle bridge.
• site layout must allow bus route to be formed linking Craigs Road with Turnhouse Road.
• development must respect the ridgeline of Craigs Road and elevated slopes within the site
• opportunity to create a community focal point providing local services in an accessible location close to new pedestrian/cycle bridge. This should include a new primary school, civic space and units suitable for local shopping (maximum 800 (gross) sq.m.) and healthcare facilities.
• provision of new woodland and grassland habitat (30m depth) to create a strong green belt boundary adjoining Craigs Rd along the northern edge of the site.
• provision of two new large greenspaces to meet the two hectare green space standard as required by the Open Space Strategy. There is potential to create local green space on the high point of the site next to Maybury Road.
• proposals should enable co-ordination with long term redevelopment opportunity of existing industrial/employment sites for high quality employment or residential uses, incorporating pedestrian, cycle and public transport safeguards
• Address the General Development Principles on transport and education for West Edinburgh (as set out in paragraphs 122-124)
• Address appropriate and safe access from Turnhouse Road and Craigs Road
• Proposals should address a new footway/cycleway along the south-west side of Turnhouse Road and upgrading of bus infrastructure on Turnhouse Road
• Address any identified impacts on the safe operation of the local road network
• Provision of new bus infrastructure on internal roads and Maybury Road
• High quality pedestrian and cycle routes within the site
• Further investigation/consultation is required to determine the nature of any flood risk on the site and whether further assessment and mitigation measures are required.

Cammo (HSG 20)

• the site layout should provide maximum accessibility by public transport, including direct pedestrian links to enhanced bus infrastructure and services on Maybury Road and to the north east corner of the site to minimise distance to bus stops for services along Queensferry Road.
• opportunity to change the character of Maybury Road through street design, to enable and improve path connections across Maybury Road and create residential frontage with reduced speed limit.
• proposals should enable views through the site to focal points of Mausley Hill, Cammo Water Tower, Cammo Estate Park and the Pentland Hills from within the site and Maybury Road by means of street design and open space provision.

• the context of the Designed Landscape should be enhanced through sensitively designed development and an appropriate landscape framework.

• provision of new woodland, grassland and wetland habitat (40 m depth) to create strong green belt boundaries along the southern and western edges of the site. This should include a multi user path overlooked by new housing.

• improve the quality of the water environment through works to realign and improve the bank side treatment of the Bughtlin Burn.

• provide green network connections through the site and enhance off-site links to improve the connectivity of the Cammo Estate from the Bughtlin, Drumbrae and East Craigs residential areas to the east and, via changes to Cammo Walk, to the south.

• Address the General Development Principles on transport and education for West Edinburgh (as set out in paragraphs 122-124)

• Appropriate access from Maybury Road including the potential for two junctions, with traffic signals

• Safe pedestrian crossing of Maybury Road including the potential for a signal controlled pedestrian crossing

• Address any identified impacts on the safe operation of the local road network

• The finalised site capacity, design and layout should be informed by an adequate flood risk assessment.

International Business Gateway - Development Principles

International business development and ancillary uses, hotel and conference facilities and potentially housing and education. A more detailed vision for the area is set out in the West Edinburgh Strategic Design Framework, approved in May 2010. Policy Emp 6 applies.

International Business Gateway

• the IBG must be master planned and developed in a phased manner. Master plans should incorporate an appropriate mix of uses to help support the main purpose of the IBG as a location for international business development.

• proposals should contribute to the creation of a sustainable extension of the city based on a grid pattern with a focus on place-making, good public transport and footpath and cycle connections, parkland (Proposal G S6) and a strong landscape structure (see West Edinburgh Landscape Framework).

• the preferred location for initial phases of development is within 250 metres of tram stops. Higher density development and uses which attract high volumes of visitors should be located close to a tram stop.

• the prevailing building height should be four storeys with some higher landmark buildings and lower building heights adjacent to structural green spaces.

• any necessary road infrastructure improvements should be identified, taking into account the general development principles for West Edinburgh and the relevant transport proposals listed in Table 9. Car parking provision for all uses should be set at levels which help achieve sustainable transport objectives in the context of Policy Tra 2.

• the central parkland area of open space will be of particular importance in meeting the Council’s large greenspace standard and should be designed and maintained accordingly

• a flood risk assessment shall be carried out in order to inform the capacity, design and layout of development proposals.
Edinburgh Park/South Gyle - Development Principles

The Vision

To create a thriving business and residential community, well integrated with the rest of the city through good public transport, pedestrian and cycle connections, a more balanced mix of uses and facilities and high quality public realm and green spaces. Policy Del 4 applies.

General

- Proposals should help contribute towards realising the long term vision for Edinburgh Park/South Gyle.
- Where possible, proposals should incorporate new cycle and pedestrian links through the site and consider how these connect to other uses and routes across the Edinburgh Park and South Gyle area.
- A flood risk assessment shall be carried out in order to inform the design and layout of development proposals. Consideration should be given to any culverted watercourses within the site and pluvial flooding.

Area EP 1

Description - development opportunities in this area include undeveloped land and the potential to reconfigure existing surface car parks to accommodate new buildings.

- proposals should incorporate a mix of business and residential uses and ancillary uses. The creation of a commercial hub adjacent to Edinburgh Park station is supported.
- development should work with and extend the existing grid layout to ensure a cohesive townscape framework and deliver sustainable movement through the site.
- the continuation of the existing north to south greenspace corridor and creation of new pedestrian and cycle links through the site are essential requirements. The potential exists to create a strategic pedestrian/cycle route linking Wester Hailes, Broomhouse and Sighthill to Edinburgh Gateway Station.

Area EP 2

Description - redevelopment opportunity on vacant land and adjacent sites currently occupied by vacant office buildings.

- proposals should incorporate a mix of business and residential uses and create an element of active commercial frontage onto South Gyle Broadway.
- a mixed use development provides the opportunity to create new pedestrian and cycle routes through the site.

Description - sites occupied by a variety of low density commercial property with the potential for some incremental change over time.

- in EP 3 and EP 4, commercial and mixed use proposals will be supported. Where practicable, development should provide increased permeability, create a direct relationship with South Gyle Broadway and improve the pedestrian and cycling environment along South Gyle Crescent.
- EP5 should remain in predominantly business and industrial use. Where opportunities arise, consideration should be given to improving accessibility for pedestrians and cyclists.

Gyle Centre

Description - commercial centre which currently has 75 units

- any expansion of the Gyle shopping centre to meet the needs of the expanding population in West Edinburgh should provide an active frontage to South Gyle Broadway, contribute to the green network and provide good pedestrian connections to the tram stop and wider area.
- the opportunity exists to create of a new green space incorporating the tram halt and a north-south pedestrian cycle route, framed by additional development to help the centre contribute to the long term vision for the area.
Edinburgh Park / South Gyle Development Principles

- Housing-led mixed use redevelopment
- Mixed use redevelopment (short/long term)
- Business led redevelopment (short/long term)
- Mixed use area, Business, residential and ancillary uses and commercial hub.
- Current development opportunity
- Business led redevelopment
- Business area

New green space
Tree lines movement corridor
Primary pedestrian/cycle route
Secondary pedestrian/cycle route
Enhanced pedestrian/cycle route
Heavy/light rail interchange
Tram halt
Potential vehicular access
Building line
South East Edinburgh

South East Edinburgh is expected to experience major change over the next five to seven years. The plan incorporates a number of existing proposals, some of which have started but are not yet completed and others that have still to be implemented. These include housing development at Greendykes, mixed use regeneration at Craigmillar and life sciences related business development at Edinburgh BioQuarter. The LDP allocates a number of additional housing sites across South East Edinburgh to meet SDP requirements – two sites within the existing urban area at Ellen’s Glen Road and Moredunvale, two sites along the Burdiehouse corridor, three sites along the Gilmerton corridor, one site north of Lang Loan, two sites at the south east wedge and three sites at Newcraighall/Brunstane. It includes sites briefs for the new LDP housing proposals and Development Principles for the BioQuarter.
Figure 14 South East Edinburgh Overview Map

Edinburgh Local Development Plan
November 2016

Part 1 Section 5 - A Plan for All Parts of the City
South East Edinburgh General Development Principles

All proposals will be required to make appropriate contributions to the delivery of the infrastructure necessary to support the development strategy. The general development principles below outline the anticipated main transport and education actions for South East Edinburgh.

The Council’s approach to infrastructure delivery is set out in Policy Del 1 and its associated Supplementary Guidance. Policy Tra 8 is also relevant in requiring cumulative and cross boundary transport impacts to be addressed. Development should only progress subject to sufficient infrastructure already being available or where it is demonstrated that it can be delivered at the appropriate time. Further assessment of individual and cumulative impacts may be required to further detail the required mitigation.

Transport Assessment

Contributions to address the area wide transport interventions, detailed below and as specified through Supplementary Guidance, will be applied through a cumulative contribution zone. Delivery will be monitored and managed through the action programme. The Council’s approach to secure timeous delivery of the required infrastructure is to be detailed through its Supplementary Guidance.

Detailed Transport Assessments, where required, should include modelling of the cumulative effect of increased traffic flows on the trunk and local road networks (taking into account all known proposed development and any potential cross-boundary impacts). This should draw on the conclusions of the Council’s transport appraisal and further work being carried out to assess the wider cumulative and cross-boundary impacts on the trunk road network and should show how mode share targets are to be met.

Education Appraisal

Contributions to the required education provision, as set out below and as detailed through Supplementary Guidance, will be applied where appropriate through a cumulative contribution zone drawing on the conclusions of the Council’s education appraisal. The Council’s approach to secure timeous delivery of the required schools capacity is to be detailed through Supplementary Guidance. Delivery will be monitored and managed through the action programme.

The following sections indicate the anticipated infrastructure requirements which were identified following initial assessment and should be considered in the context of Policy Del 1.

South East Edinburgh (South)

Scope of transport mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Del 1):

- Straiton junction on the A720
- T14 Sheriffhall Junction
- Gilmerton junction (A720)
- Burdiehouse junction (Proposal T 21)
- Gilmerton Crossroads (T 20) junction capacity upgrade
• Access and parking strategy for Drum Street

• Improved capacity and other enhancements to bus services.

Scope of education mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Del 1):

• A new Gilmerton primary school (SCH 7) and new Broomhill primary school (SCH 8), and/or

• Extension to Gilmerton (ND) primary school, Gracemount (ND) primary school and Liberton and Craigour Park if required due to catchment changes

• Extension to St John’s Vianney (RC) Primary School and St Catherine’s (RC) Primary School

and

• Extension to South East Edinburgh High Schools- subject to further detailed assessment as to whether the additional capacity would be best provided; either at Liberton High School or Gracemount High School.

South East Edinburgh (North)

Scope of transport mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Del 1):

• Sheriffhall roundabout (T 14)

• West of Fort Kinnaird Road to the Wisp (T 16)

• Gilberstoun link (T 8)

• Old Craighall Junction

Scope of education mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Del 1):

• Option 1 - New Brunstane Primary School (SCH 9)

• Option 2 - As option 1, but additional extension to Newcraighall Primary School

• New Greendykes Primary School (SCH 3)

• Extension to Castlebrae High School or Replacement Castlebrae High School (SCH 2)
Broomhills, Burdiehouse and Lang Loan Site Brief

- site boundary
- street improvement & frontage
- housing
- long term redevelopment opportunity
- commercial / retail opportunities
- bus route
- bus gate
- junction improvement
- proposed school (2ha)
- vehicular access

Green network:
- new woodland
- new greenspace
- existing footpath / cyclepath
- new footpath / cyclepath
- green corridor

Indicative only - not part of the Proposals Map.
Proposals for housing (including the finalised site capacity, design and layout), the school (if necessary), and any other uses provided on the site, should be informed by an adequate flood risk assessment. In addition, proposals should in particular avoid development in the area at risk of flooding in the south of the site, adjacent to the burn. Sustainable urban drainage will be required as appropriate, and as referred to in the bullet point relating to tree belts above.

Burdiehouse (HSG 22)

- address the relevant General Development Principles on transport and education for South East Edinburgh set out in paragraphs 126-128 above.
- vehicular access to be taken from Burdiehouse Road.
- opportunity to change the character of Burdiehouse Road through street design, to enable and improve path connections across Burdiehouse Rd, provide street verges and trees, upgrade bus stops and create residential frontage with a reduced speed limit.
- site layout should enable a bus route to be formed providing a link from 'The Murrays' to Burdiehouse Road, regulated by bus gate.
- active frontage should be provided onto Burdiehouse Road, incorporating streetscape enhancements.
- Tree planting to the south west of the site to form a new green belt boundary to the west of Burdiehouse Limekilns.
- Woodland planting along the south east boundary, which should enhance the connectivity of woodland habitat and incorporate a multi-user path link to Burdiehouse Burn Valley Park.
- off-site multi-user path connection to link with the paths network in Midlothian via Straiton Pond, with 4m wide landscape treatment to the west across open ground, including verge, hedgerow and hedgerow trees.
- local open space proposals should:
  a) provide amenity greenspace setting and retain views to the category B listed Limekilns
  b) improve semi-natural habitat and amenity value of the Local Nature Reserve, extend woodland along the southern bank of the Burdiehouse Burn and incorporate off-road path links to the Burdiehouse Burn Valley Park.
c) Integrate the design and layout of the open space with the Area of Importance for Flood Management and beyond this area, provide additional amenity and biodiversity benefits through SUDs. The design should recognise different management and maintenance requirements.

- the finalised site capacity, design and layout should be informed by an adequate flood risk assessment.
- land released from the greenbelt to the south east has potential for development subject to similar principles.

**North of Lang Loan (HSG 39)**

- Address the General Development Principles on transport and education for South-East Edinburgh (as set out in paragraphs 126-128)
- Pedestrian and cycle links with the housing areas to the west and north of the site and along Lang Loan
- Lasswade Road/ Gilmerton Dykes Street/Captain’s Road Junction Improvement
- Upgrading of bus stops on Lasswade Road
- Secure any required archaeological works
- Landscaping to achieve integration with adjacent housing areas and establishment of new green belt boundary along Lang Loan.

**Gilmerton and South East Site Briefs - Development Principles**

**Description**

A range of sites at Gilmerton of varying sizes and character provide the opportunity to provide new housing and local facilities, well served by public transport and with good connections to existing communities and the surrounding countryside. The new housing and associated landscape framework should enhance the quality and character of the urban edge and respond to the wooded grounds of The Drum and former Gilmerton House.

**Gilmerton Dykes Road (HSG 23)**

- Vehicular access to be taken directly from Gilmerton Dykes Road
- Appropriate boundary treatment and landscaping retaining scope for integration with the wider area and for potential pedestrian/cycle connections to potential future adjacent housing areas.
- Address the General Development Principles on transport and education for South-East Edinburgh (as set out in paragraphs 126-128)
- Address any identified impacts on the safe operation of the local road network
- Make appropriate provision for a cycle link from Gilmerton Road to Laswade Road
- Upgrade bus stops on Laswade Road/Gilmerton Road
- Enable enhanced peak period bus capacity on Gilmerton Road
- Make provision for a new footway along Gilmerton Dykes Road

**Gilmerton Station Road (HSG 24)**

- Address the General Development Principles on transport and education for South East Edinburgh (as set out in paragraphs 126-128).
- Address any identified impacts on the safe operation of the local road network
- Opportunity to change character of Gilmerton Station Road, through street design incorporating trees and verges and addressed by new residential development.
- Provide green network connections linking the site with existing local paths to the north and east.
• provision of a new multi-user path link from Gilmerton Dykes Road to Gilmerton Station Road (to connect to the transport safeguard along disused Edinburgh, Loanhead and Roslin branch line)
• create path connection to proposal site HSG 23
• provision of new 2ha public park in accordance with open space strategy standards.
• connect existing woodland habitat to north and south of site using street trees and design of new park
• appropriate boundary treatment to south-west, retaining scope for potential pedestrian/cycle connections and to allow integration with potential development in the future.
• existing industrial/employment land to south east of site could provide additional housing in longer term, subject to enhancement of existing wooded boundary.
• Land released from the greenbelt to the south west has potential for development subject to similar principles.

The Drum (HSG 25)

• address the General Development Principles on transport and education for South East Edinburgh (as set out in paragraphs 126-128).
• address appropriate and safe access from the site onto Drum Street
• address any identified impacts on the safe operation of the local road network
• provide cycle link – Gilmerton Road to Laswade Road and from Drum Street to the SE Wedge Parkland
• Upgrade bus stops and enhance peak capacity on Gilmerton Road

South-East Wedge South: Edmonstone (HSG 40)

• Address the General Development Principles on transport and education for South-East Edinburgh (as set out in paragraphs 126-128)
• Traffic signals at the Wisp/Old Dalkeith Road

South-East Wedge North: The Wisp (HSG 41)

• Address the General Development Principles on transport and education for South-East Edinburgh (as set out in paragraphs 126-128)
• Ensure appropriate grouting and mine entry treatment works are carried out prior to commencement of development
• Secure any required archaeological works
• Design and maintenance schedule to secure the green-space link on the western boundary of the site
• Pathways and cycle routes both internally and connected to the proposed development

• Speed limit restrictions on the Wisp
• Create a development layout that retains and enhances any elements of historic landscape structure
• Incorporate sizeable areas of open space and parkland and retain views and open aspects to the south and east
• Ensure the visual separation from Danderhall through sensitive design and screen planting
• Integrate a network of footpaths, cycleways and open space to be part of the wider Green network
• Ensure appropriate grouting and mine entry treatment works are carried out prior to commencement of development
• Achieve additional boundary planting along both road boundaries
• Address required local road and footway improvements and mitigation measures
• Secure any required archaeological works
Gilmerton & South East Site Brief

- site boundary
- junction improvement
- street improvement & frontage
- housing
- long term redevelopment opportunity
- proposed school (2ha)
- commercial / retail opportunities
- vehicular access

Green network:
- new woodland
- new footpath / cyclepath
- existing footpath / cyclepath
- cycle/footpath & possible public transport service
- green corridor

Indicative only - not part of the Proposals Map

Edinburgh Local Development Plan November 2016

Part 1 Section 5 - A Plan for All Parts of the City
Gilmerton & South East Site Brief

- **site boundary**
- **other developments in the LDP**
- **street improvement & frontage**
- **housing**
- **green space proposal (GS4 and GS5)**
- **vehicular access**

**Green network:**
- **new woodland**
- **new footpath / cyclepath**
- **existing footpath / cyclepath**
- **green corridor**

---

**Edinburgh Local Development Plan:**

**Part 1 Section 5 - A Plan for All Parts of the City**
Newcraighall and Brunstane Site Brief

- site boundary
- housing
- commercial / retail opportunities
- bus route
- street improvement & frontage
- proposed school (2ha) at Brunstane / school grounds extension at Newcraighall
- vehicular access
- local centre
- Scheduled Ancient Monument

Green network:
- green corridor
- new woodland
- new greenspace
- existing footpath / cyclepath
- new footpath / cyclepath

Indicative only - not part of the Proposals Map

Edinburgh Local Development Plan
November 2016
Part 1 Section 5 - A Plan for All Parts of the City
Newcraighall and Brunstane Site Brief - Development Principles

Description
These sites provide the opportunity for new housing together with new and improved school and local facilities on the eastern side of the Council area. The sites are well served by bus and rail connections with the opportunity for these to be further enhanced. Existing and enhanced footpath and cycle links and green corridor proposals will ensure development is well connected between sites and to existing communities.

Newcraighall North (HSG 26)
- vehicular access to be taken from Whitehill St / Newcraighall Road at two or three points. No vehicular access to be taken from Gilberstoun.
- layout should create pedestrian and cycleway connections through the site, including one along an east-west green corridor.
- opportunity for retail/commercial units as part of street frontage to Whitehill Street / Newcraighall Road.

Newcraighall East (HSG 27)
- address the relevant General Development Principles on transport and education for South East Edinburgh set out in paragraphs 126-128 above.
- new woodland should be provided along the southern boundary of the site as shown on the diagram.
- the finalised site capacity, design and layout should be informed by an adequate flood risk assessment.
- site layout should enable a bus route to be formed north-south through the site. It is intended that this connect to QMUC across land allocated for development in East Lothian. A bus gate at the site boundary should prevent general vehicular access through this route.
- layout should create pedestrian and cycleway connections through the site.
- a new green corridor should be created along the course of the power lines running through the site, extending grassland habitat with the opportunity for connections outwith the Council area. This greenspace should be fronted by new development in order to improve community safety and aid place-making.
- layout should make provision for an extension of Newcraighall Primary School’s grounds.
- opportunity for retail/commercial units as part of street frontage to Whitehill Street / Newcraighall Road.

Brunstane HSG 29
- address the relevant General Development Principles on transport and education for South East Edinburgh set out in paragraphs 126-128 above.
- transport assessments should identify any appropriate commensurate mitigation which may be required with respect to the A1/Newcraighall Road junction and to the junctions on the A199, taking into account any cumulative impact with traffic from other development sites. Particular attention should be given to the proposed new junction on Milton Road East, and the management of additional traffic generation onto Milton Road East and Newcraighall Road including associated improvements to pedestrian cycle crossing facilities.
- the site layout should allow for the proposed new bus route to be formed linking Milton Road East with Newcraighall Road. Appropriate consultation with service providers should take place in order to identify the bus service improvements which can be undertaken in the plan period, taking into account access, routes and frequency of service, and including the proposed new bus route. Proposals should provide for an appropriate upgrading of existing bus stops and an increase in cycle parking facilities at Brunstane and Newcraighall stations.
- vehicular access should be taken from Milton Road East and Newcraighall Road, forming a new vehicular crossing over the East Coast railway line. The potential for a new pedestrian/cycle bridge within the eastern part of the site should be investigated, together with an investigation as to whether or not a second vehicular crossing of the East Coast railway line should be provided in the interests of safety, as identified within the transport appraisal. Any crossings of the East Coast railway line should be on bridges over the railway line, and not at grade.
- no vehicular access to be taken from Gilberstoun area.
- opportunity to enhance existing core and other paths along the boundaries of the site, and in particular the Brunstane Burn Core Path (John Muir Way) on the northern boundary of the site.
including pedestrian crossing where vehicular access meets the path. New multi-user path links should be formed to the Innocent Railway Core Path, Brunstane Burn Core Path and the disused railway line to the north of Newcraighall, with path connections also to housing at Gilberstoun, Newcraighall and Brunstane railway station.

- the impact on the setting of Brunstane House should be minimised through the appropriate design and layout of housing on the site, including the provision of sufficient open space and landscaping to the north and east as shown on the diagram. The extent of the open space is indicative only and the exact area will depend on the design and layout of housing on the site. Sufficient open space should also be similarly provided in order to retain an open setting for the two scheduled monuments of Brunstane Moated Site and Brunstane Enclosure, also meeting a large greenspace deficiency to the south west of the site.

- a landscape framework should be provided to the boundary of Newhailes House garden and designed landscape inventory site, with a buffer as shown on the diagram (again indicative and depending on the design and layout of housing on the site) and detailed siting and design of dwellings should respect views to Arthur’s Seat from the grounds of Newhailes House.

- management proposals should have regard to the above stated historic environment assets. Historic Environment Scotland should be consulted on these matters when development proposals are being prepared.

- establish statutory safeguards to overhead powerlines to the north and south of the site. Design principles should seek to integrate overhead powerlines with site layout. To the south, allotment provision should compliment consented allotments at Newcraighall North. To the north, powerline way leave should be designed to provide for semi natural greenspace and habitat connectivity with informal recreation.

- expand grassland habitat (under pylons) and provide woodland connectivity across the site

- Streets and open spaces should be designed to benefit from views to the coast to the north, Arthur’s Seat to the west and Pentland Hills to the southwest.

- opportunity to create a community focal point including a new primary school and local centre.

- proposals for housing (including the finalised site capacity, design and layout), the school, and any other uses provided on the site, should be informed by an adequate flood risk assessment. Enhance sustainable urban drainage will be required as appropriate to address current/future water quality pressures and to ensure no detrimental impacts to the recently designated bathing waters at Fishers Row.

- proposals should fully address any necessary site remediation in relation to mining legacy constraints, and should take account of any need for prior extraction of minerals in the context of Scottish Planning Policy.
Ellen’s Glen Road Site Brief

Description
Proposal (HSG 28) to provide new housing on the site currently occupied by the relocating Scottish National Blood Transfusion Service and semi-natural green space adjacent to Malbet Wynd. The site currently occupied by Liberton Hospital could provide additional housing if the site becomes available in the future.

Development Principles

- No houses on the site to be occupied unless and until a direct vehicular access from Lasswade Road has been provided across the Liberton Hospital site.
- Additional vehicular access to be taken from Ellen’s Glen Road and Malbet Wynd.
- Address the General Development Principles on transport and education for South-East Edinburgh (as set out in paragraphs 126-128).
- A mix of housing types including detached, semi-detached, terraces, ‘colony style’ housing and flats.
- New pedestrian/cycle link on land near to Stenhouse Burn to compensate for the narrow footway on Ellen’s Glen Road.
- New pedestrian/cycle link from Malbet Wynd through the site to connect via Ellen’s Glen Road to the Burdiehouse Burn Valley Park Core Path.
- New local greenspace to meet the Council’s Greenspace Standard.
- Appropriate retention of trees around pedestrian/cycle link as informed by a tree survey.
- Development to provide residential frontage onto Ellen’s Glen Road.

If the site currently occupied by Liberton Hospital becomes available in the future, proposals would be expected to provide not only for a direct vehicular access from Lasswade Road to the HSG 28 site but also to ensure appropriate retention of trees along Lasswade Road and elsewhere across the site as informed by a tree survey.
Moredunvale Development Principles

Description - Proposal (HSG 30) to provide new housing on approximately half of the site and improve the quality of the remaining open space.

Development Principles

- Address the General Development Principles on transport and education for South East Edinburgh (as set out in paragraphs 126-128)
- The finalised site capacity, design and layout should be informed by an adequate flood risk assessment
- Land around the high rise flats to be kept as green space.
- Opportunity to provide play space, allotments and growing spaces as green space improvements.
- Opportunity to create links to the wider green network.
- Proposals should provide better pedestrian and cycle access between the site and the surrounding area.
- Remediation work may be required to develop the site due to the history of coal and limestone mining.
Edinburgh BioQuarter Development Principles

Description - Edinburgh BioQuarter is a partly-implemented urban extension focused on the Edinburgh Royal Infirmary and the associated medical school. Land has been allocated to create the potential for further clinical and teaching development and related commercial research and development - collectively known as life science uses.

The combination of a major teaching hospital, a leading university and sufficient developable land in one place is rare. It is a unique opportunity to establish a commercial life science centre of a scale comparable with others globally, with major benefits for the city and national economies. To reach that level, a floorspace target of 245,000sq.m. of life science uses has been estimated.

Development Principles

- a higher density, more urban form of development than previously planned, with less land taken up by surface car parking is required to realise the BioQuarter’s potential. A compact urban approach is also more likely to foster a sense of place, attractive to workers and visitors.

- supporting uses are appropriate to promote place-making and provide local services and evening and weekend activity. However, the type and quantity of ancillary uses must support, not jeopardise, the overall life science purpose of the BioQuarter.

- development at the BioQuarter must respect the site’s sensitive location within the wider landscape setting of the city. The extent of development and building heights, particularly on the upper slopes, must be carefully managed.

- the BioQuarter should front onto and connect with the adjacent South East Wedge Parkland (Proposal GS 4), a key element of the Plan’s Spatial Strategy (Figure 1)

- the BioQuarter may require to contribute to improvements to the A720 Sheriffhall junction improvements.

More detailed development principles are set out in Supplementary Guidance for Edinburgh BioQuarter and the South East Wedge Parkland.
Elsewhere across the LDP area

129 Out with the areas identified for strategic growth, the LDP has a role to play in promoting development opportunities and protecting and enhancing the environment.

130 An area where significant change is expected is Queensferry. In addition to the Queensferry Crossing due to open by the end of 2016 and development on a number of existing housing sites, the LDP identifies new housing allocations at Builyon Road, South Scotstoun and Dalmeny. New housing is also proposed on sites at Currie and Balerno and an opportunity for housing together with greenspace improvements has been identified at Curriemuirend. Where appropriate to guide development, site briefs and development principles have been prepared for these housing sites.

131 Throughout the LDP area, regeneration opportunities will continue to emerge as vacant and underused sites and buildings are brought back into beneficial use. Planning applications will be assessed using relevant policies to ensure these developments help meet LDP objectives.

132 A number of major transport projects, including the Queensferry Crossing and the tram, will be completed in the next few years. The LDP also includes a number of proposals and safeguards for other public transport, footpath and cycle links which, when implemented, will improve connections across the city.

133 Edinburgh’s Green Belt and Countryside Area will be protected and where possible enhanced. The LDP directs the planned growth of the city to specified sites and generally supports development within the urban area subject to relevant policy considerations. Development in the green belt and countryside will therefore only be permitted in exceptional circumstances.
South West Edinburgh and South Queensferry General Development Principles

134 All proposals will be required to make appropriate contributions to the delivery of the infrastructure necessary to support the development strategy. The general development principles below outline the anticipated main transport and education actions for South West Edinburgh and South Queensferry.

135 The Council’s approach to infrastructure delivery is set out in Policy Del 1 and its associated Supplementary Guidance. Policy Tra 8 is also relevant in requiring cumulative and cross boundary transport impacts to be addressed. Development should only progress subject to sufficient infrastructure already being available or where it is demonstrated that it can be delivered at the appropriate time. Further assessment of individual and cumulative impacts may be required to further detail the required mitigation.

Transport Assessment

Contributions to address the area wide transport interventions, detailed below and as specified through Supplementary Guidance, will be applied through a cumulative contribution zone. Delivery will be monitored and managed through the action programme. The Council’s approach to secure timeous delivery of the required infrastructure is to be detailed through its Supplementary Guidance.

Detailed Transport Assessments, where required, should include modelling of the cumulative effect of increased traffic flows on the trunk and local road networks (taking into account all known proposed development and any potential cross-boundary impacts). This should draw on the conclusions of the Council’s transport appraisal and further work being carried out to assess the wider cumulative and cross-boundary impacts on the trunk road network and should show how mode share targets are to be met.

Education Appraisal

Contributions to the required education provision, as set out below and as detailed through Supplementary Guidance, will be applied where appropriate through a cumulative contribution zone drawing on the conclusions of the Council’s education appraisal. The Council’s approach to secure timeous delivery of the required schools capacity is to be detailed through Supplementary Guidance. Delivery will be monitored and managed through the Action Programme.

136 The following sections indicate the anticipated infrastructure requirements which as identified following initial assessment:

South West Edinburgh

Scope of transport mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Del 1):

- Gillespie Crossroads
- Hermiston Park & Ride

Scope of education mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Del 1):

- Extension to Currie (ND) Primary School (SCH 10).
South Queensferry

Scope of transport mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Policy Del 1):

• The Queensferry and Scotstoun junctions on the A90
• Bus and rail service improvements (routes and frequency) which can be undertaken in the plan period
• Provision of additional parking facilities for cars and cycles at Dalmeny Station

Scope of education mitigation subject to further assessment and the detail to be included in Supplementary Guidance (Policy Del 1):

• New Builyeon Road (ND) Primary School (SCH 10)
• Extension to Queensferry (ND) High School
• Extension to St Margaret’s (RC) Primary School
• Extension to St Augustines (RC) High School

Curriemuirend Development Principles

Description

Proposal to provide housing and allotments on land at Curriemuirend Park (HSG 31) and to improve the quality of the existing green space at Clovenstone Drive (GS 10).

Development Principles

• Address the General Development Principles on transport and education for South West Edinburgh (as set out in paragraphs 134-136)
• a comprehensive approach to both sites is required, to ensure the allotments and green space improvements are delivered.
• development should create an active street frontage along Wester Hailes Road
• opportunity to create links to the wider green network
• proposals should provide better pedestrian and cycle access to both the allotments and Clovenstone Drive park
• opportunity to reduce the width of Wester Hailes Road to create a more attractive, safe environment for pedestrians.

Curriemuirend

- site boundary
- housing
- new and existing greenspace
- Green network:
  - new footpath / cyclepath

Curriemuirend Development Principles

Description

Proposal to provide housing and allotments on land at Curriemuirend Park (HSG 31) and to improve the quality of the existing green space at Clovenstone Drive (GS 10).

Development Principles

• Address the General Development Principles on transport and education for South West Edinburgh (as set out in paragraphs 134-136)
• a comprehensive approach to both sites is required, to ensure the allotments and green space improvements are delivered.
• development should create an active street frontage along Wester Hailes Road
• opportunity to create links to the wider green network
• proposals should provide better pedestrian and cycle access to both the allotments and Clovenstone Drive park
• opportunity to reduce the width of Wester Hailes Road to create a more attractive, safe environment for pedestrians.

Curriemuirend

- site boundary
- housing
- new and existing greenspace
- Green network:
  - new footpath / cyclepath
Builyeon Road and South Scotstoun, Queensferry

- site boundary
- housing
- other redevelopment opportunity
- street improvement and frontage
- vehicular access
- proposed school (2ha)
- junction improvement

Green network:
- new woodland
- existing footpath / cyclepath
- new footpath / cyclepath

Safeguarding zone for oil storage installation
Edinburgh Local Development Plan  
November 2016

**Queensferry South Site Brief**

**Builyeon Road Site Brief (HSG32)**

- address the General Development Principles on transport and education for South Queensferry set out in paragraphs 134-136 above
- vehicular access to be taken from Builyeon Road (A904).
- a substantial landscaped buffer, with additional tree planting, should be provided along the southern boundary of the site with the new approach road, as shown on the diagram. The landscaped buffer should be of sufficient width to soften the visual impact of development on the site from the new approach road, provide a robust green belt boundary and mitigate noise impact. Additional tree planting should constitute native woodland species, and have regard to any ecological mitigation measures specified as part of the replacement crossing and oil pipeline.
- the landscaped buffer should integrate with that provided within the western part of HSG 33, with an opportunity to incorporate a footpath/cycleway, including a bridge over the existing A90 carriageway (which is being retained as a public transport link only to the existing Forth Road Bridge) to the retail and housing area to the east of the site.
- Opportunity to change the character of Builyeon Road (A904), through street design, including new development frontage with the road where this is possible, upgrading or providing of new bus stops or shelters, roadside footpaths and traffic calming (including reducing the speed limit through traffic regulation orders).
- new pedestrian/cycle routes (taking into account the Forth Replacement Crossing as appropriate) should be provided, particularly forming north-south path connections by linking new pedestrian/cycle routes to the existing network north of the A904, thus allowing the new housing to integrate fully with the existing urban area including the town centre to the north of the site. The use of avenue tree planting and retention/re-use of the existing stone wall is encouraged.
- the residential amenity of existing housing should be taken into account in the design of all new pedestrian/cycle routes and links.
- landscape effects of any noise attenuation measures to be considered in terms of site design and appearance

- include a new primary school towards centre of site
- opportunity for commercial and community uses within the site, possibly in the north west and north east parts of the site where they could also form part of the frontage to the main road. There is also a possible redevelopment opportunity with respect to existing commercial uses to the north of the site (which could be incorporated into the development on the site) and with respect to the redundant northbound carriageway to the east of the site.
- provision of new local greenspace in accordance with open space strategy standards.

**South Scostoun Site Brief (HSG 33)**

- address the General Development Principles on transport and education for south Queensferry set out in paragraphs 134-136 above.
- vehicular access to be taken from B800 Queensferry to Kirkliston Road and Provost Milne Grove. However, there should be no provision for traffic through the site between B800 and Scostoun Avenue, apart from buses in the event that this is considered appropriate using a bus gate. There should be no vehicular access from the eastern end of the site into Dalmeny. Appropriate traffic calming measures may be considered for Scostoun Avenue.
- retain field trees and supplement the existing tree lined track along the southern boundary with new native woodland of minimum 20 metres depth to extend the existing green network along the whole southern boundary of the site as shown on the diagram, thus establishing a new robust green belt boundary along the A90, and connecting woodland habitat. Opportunity to replace coniferous plantation with mixed native woodland and provide street planting where appropriate.
- opportunity to provide a new footpath/cycleway extending from HSG 32, across the A90 and B800, along the western part of the southern boundary within the extended green network, linking to the existing footpath/cycleway (National Cycle Route 1) extending to Dalmeny to the east, and North Queensferry to the north.
- opportunity to change the character of the B800 through street design, also enabling path connections across the B800, thus facilitating the new footpath/cycleway referred to above
- new pedestrian/cycle routes should be provided, forming north-south path connections, thus

---

Part 1 Section 5 - A Plan for All Parts of the City  
83
allowing the new housing to integrate fully with the existing urban area including the town centre to the north of the site.

- the need to respect the residential amenity of existing housing should be taken into account in the design of all new pedestrian/cycle routes and links.
- bus stops should be upgraded as appropriate on Kirkliston Road, Scotstoun Avenue and in Dalmeny.
- careful consideration should be given to the layout and design of the proposed new housing and associated open space, in order to protect the residential amenity of the houses directly overlooking the site along the northern boundary and along the proposed access at Provost Milne Grove.
- landscape effects of any noise attenuation measures to be considered in terms of site design and appearance from A90.
- new development to front onto the green network and provide natural surveillance.
- provision of new local greenspace in accordance with open space strategy standards.
- proposals should take into account the restrictions resulting from the safeguarding zone for the oil storage installation shown in the diagram, where it may not be possible to build houses, or there may be a restriction on the number and location of houses. Any areas not developed for housing should be retained as informal open space.

### Dalmeny Development Principles (HSG 34)

- address the General Development Principles on transport and education for South Queensferry set out in paragraphs 134-136 above.
- upgrading of bus stops in Bankhead Road/Main Street
- vehicular access to be taken from Bankhead Road.
- pedestrian access to be provided from Main Street.
- street frontage and high quality stone boundary wall to be provided to Bankhead Road.
- retention of view corridors from Main Street to Forth Road and Rail Bridge.
- development subject to a height constraint of 1-1.5 storeys.
- the use of traditional materials and the continuation of traditional rural built form are considered essential.
- supplement tree and hedge planting to the north of the village to form a defensible green belt boundary.
Newmills Road, Balerno and Curriehill Road, Currie

- **site boundary**
- **street improvement & frontage**
- **housing**
- **commercial / retail opportunities**
- **vehicular access**

**Green network:**
- **new woodland**
- **new greenspace**
- **new footpath / cyclepath**
- **existing footpath / cyclepath**

**Riccarton Core Path, CEC 17, to Currie, Water of Leith and Bonaly**
Balerno and Currie Site Briefs

Curriehill Road Development Principles (HSG 36)

- address the General Development Principles for South-West Edinburgh (as set out in paragraphs 134-136)
- address any identified impacts on the safe operation of the local road network
- provide a new footway along the east boundary frontage (Curriehill Road) to link with existing footway network
- improve high quality pedestrian/cycle link to Curriehill Station (may involve upgrading existing link)
- help provide additional cycle parking at Curriehill Station
- upgrade existing bus stop facilities in Riccarton Avenue
- the finalised site capacity design and layout should be informed by an adequate flood risk assessment
- vehicular access to be taken from Curriehill Road.
- direct pedestrian links to be formed between Curriehill Road and Curriehill Station through the site. Connections also to be made to the Kirknewton Core Path to the west boundary of the site.
- development to provide a residential street frontage to the railway line and part way along Curriehill Road with part of the hedgerow removed.
- opportunity for flatted development and commercial/retail units to the north of the site by the railway line.
- retain hedgerow to the south and tree planting along the western edge of the site to provide an appropriate green belt boundary and undeveloped land adjacent to a minor watercourse.

Newmills Road Development Principles (HSG 37)

- address the General Development Principles for South-West Edinburgh (as set out in paragraphs 134-136)
- provide a new footway along the east frontage boundary
- address any identified impacts on the safe operation of the local road network
- improve pedestrian/cycle crossing facilities on A70, in vicinity of Newmills Road junction – may be requirement for signal control
- upgrade cycle routes between Newmills Road and Curriehill Station
- provide additional cycle parking at Curriehill Station
- provide a new bus stop facilities on A70, in vicinity of Newmills Road
- possible contribution to extended car park at Curriehill Station
- vehicular access to be taken from Newmills Road and Lanark Road West.
- new linear park (proposal GS11) of approximately 50m width to be formed to the western edge of the site as part of an off road, multi user path between the Water of Leith Walkway and Kirknewton, in addition to a local path connection to Addistoun Crescent. The new park will address the large greenspace deficiency to the north of Balerno, enhance connectivity of native broadleaf woodland habitat and integrate SUDs measures. It could also provide new allotments.
- access from Lanark Road West to run along outer eastern edge of linear park. Residential streets to front onto the proposed linear park to the west and Newmills Road to the east.
- new wooded green belt boundary to be formed on prominent break of slope to the north of the site of a minimum 30m depth.

Ravelrig Road Development Principles (HSG 38)

- address the General Development Principles on education and transport (as set out in paragraphs 134-136)
- address any required local road/junction improvements
- provide green network connections and a landscape framework with the layout and landscaping achieving integration with neighbouring housing sites
- create pedestrian and cycle connections to adjoining housing areas, particularly to the south and east
- substantial woodland edge to be retained with recreational access to form a new green belt boundary along the northern boundary of the site
- a Bird Hazard Management assessment and associated plan will be required to ensure the proposals address any required mitigation measures emerging
- secure any required archaeological works.
Part 2 Policies
Planning applications will be assessed against the following policies to ensure that future development helps to meet the core aims of the plan. All relevant policies will be considered in assessing each application. Part 2 of the plan is set out in eight sections.

1 Delivering the Strategy
2 Design Principles for New Development
3 Caring for the Environment
4 Employment and Economic Development
5 Housing and Community Facilities
6 Shopping and Leisure
7 Transport
8 Resources and Services

Policies are often expressed positively, in terms of what kinds of development will be permitted or encouraged. Where a policy states that certain types of development will be permitted, it should also be understood that failure to meet the Council’s expectations and aspirations may provide grounds for refusal of planning permission.
1 Delivering the Strategy

The policies in this section will play a key role in delivering the LDP strategy. It covers developer contributions towards the delivery of infrastructure provision and improvements, and provides specific area based policies for three parts of the city to guide major redevelopment and regeneration proposals – the City Centre, Edinburgh Waterfront and Edinburgh Park/South Gyle.

Objectives

- To implement the Council’s approach to infrastructure provision and improvements associated with development, taking account of current economic conditions.
- To ensure that developers make a fair and realistic contribution to the delivery of necessary infrastructure provision and improvement associated with development.
- To ensure that proposals for mixed use regeneration in the City Centre, Edinburgh Waterfront and Edinburgh Park/South Gyle are appropriate to the character of the area and bring maximum benefit to the city.

Developer Contributions

Policy Del 1 Developer Contributions and Infrastructure Delivery

1. Proposals will be required to contribute to the following infrastructure provision where relevant and necessary to mitigate* any negative additional impact (either on an individual or cumulative basis) and where commensurate to the scale of the proposed development:

   a) The strategic infrastructure from SDP Fig. 2, the transport proposals and safeguards from Table 9 including the existing and proposed tram network, other transport interventions as specified in Part 1 Section 5 of the Plan and to accord with Policy Tra 8. Contribution zones will apply to address cumulative impacts.

   b) Education provision including the new school proposals from Table 5 and the potential school extensions as indicated in Part 1 Section 5 of the Plan. Contribution zones will apply to address cumulative impact.
c) Green space actions if required by Policy Hou 3, Env 18, 19 or 20. Contribution zones may be established where provision is relevant to more than one site.

d) Public realm and other pedestrian and cycle actions, where identified in the Council’s public realm strategy, or as a site specific action. Contribution zones may be established where provision is relevant to more than one site.

2. Development should only progress subject to sufficient infrastructure already being available or where it is demonstrated that it can be delivered at the appropriate time.

In order to provide further detail on the approach to implementation of this policy and to provide the basis for future action programmes Supplementary Guidance** will be prepared to provide guidance including on:

a) The required infrastructure in relation to specific sites and/or areas

b) Approach to the timely delivery of the required infrastructure

c) Assessment of developer contributions and arrangements for the efficient conclusion of legal agreements

d) The thresholds that may apply

e) Mapping of the cumulative contribution zones relative to specific transport, education, public realm and green space actions.

f) The Council’s approach should the required contributions raise demonstrable commercial viability constraints and/or where forward or gap funding may be required.

* Further assessments may be required to detail the required mitigation

** This guidance should be submitted to Ministers within one year from the date of adoption of this Plan. In the event that timing of the findings of the Cumulative Impact Transport and Land Use Appraisal Working Group would delay inclusion of details on cross boundary issues an interim approach will be detailed through the Supplementary Guidance to be confirmed through the replacement development plan.

140 This policy is intended to ensure that infrastructure is provided to facilitate new development.

Developer Contributions

141 Anticipated transport and schools requirements relative to specific areas (General Development Principles) and sites (Development Principles) are set out in Part 1 Section 5 of the plan. Appendix C details the provisions for which contributions would be sought. These include:

- School capacity increases including new schools
- Traffic management and other transport improvements to address the individual and cumulative impact of proposed development including on the Trunk Road Network.
- Green Space Actions

142 The Council has already forward funded the completed section of the tram network and contributions will continue to be sought from future development which impacts on or creates a need for this infrastructure. This approach to developer contributions may apply to other items of required infrastructure such as schools where advance provision is necessary to enable the development strategy.

143 Further detail of anticipated requirements and the approach to delivery including the use of cumulative contributions zones, a framework for consideration of financial viability issues and possible approaches to forward and gap funding will be set out through the Supplementary Guidance as referenced in Policy Del 1.

144 An Action Programme will then be rolled forward annually to monitor timescales and identify the need for further action and the parties responsible.

145 The Council recognises that the scale of proposed development may also impact on other infrastructure including health and community facilities. Policy Hou 10
is relevant in this respect. However, there is a current lack of information on the scale of such requirements and how they should be addressed. Whilst it may be appropriate to seek contributions for such provision any requirement would need to be considered on a case by case basis where a clear justification can be provided in the context of Circular 3/2012. The feasibility of including such additional contributions and the impact on development viability would also have to be assessed.

Area Specific Policies - Opportunities for major mixed use development/regeneration

Policies Del 2 - Del 4 will guide development in three major regeneration areas, the City Centre, Edinburgh Waterfront and Edinburgh Park/South Gyle. These policies aim to ensure that development and regeneration proposals incorporate an appropriate mix of uses consistent with the character of the wider area and its role in meeting the objectives of the plan.

Policy Del 2 City Centre

Development which lies within the area of the City Centre as shown on the Proposals Map will be permitted which retains and enhances its character, attractiveness, vitality and accessibility and contributes to its role as a strategic business and regional shopping centre and Edinburgh's role as a capital city. The requirements in principle will be for:

a) comprehensively designed proposals which maximise the potential of the site in accordance with any relevant development principles, development brief and/or other guidance

b) a use or a mix of uses appropriate to the location of the site, its accessibility characteristics and the character of the surrounding area.

c) Where practicable, major mixed use developments should provide offices, particularly on upper floors. At street level, other uses may be more appropriate to maintain city centre diversity, especially retail vitality on important shopping frontages

d) the creation of new civic spaces and traffic-free pedestrian routes where achievable.

Housing as part of mixed use development will be encouraged on appropriate sites to help meet housing need and create strong, sustainable communities.

Policy Del 3 Edinburgh Waterfront

Planning permission will be granted for development which will contribute towards the creation of new urban quarters at Leith Waterfront and Granton Waterfront (specifically EW 1a, b & c and EW 2 a -d on the Proposals Map). The requirements in principle will be for:

a) comprehensively designed proposals which maximise the development potential of the area

b) the provision of a series of mixed use sustainable neighbourhoods that connect to the waterfront, with each other and with nearby neighbourhoods

c) proposals for a mix of house types, sizes and affordability

d) the provision of open space in order to meet the needs of the local community, create local identity and a sense of place
e) the provision of local retail facilities and leisure and tourism attractions, including water related recreation in and around retained harbours

f) transport measures agreed with the Council, including a contribution to the proposed tram network and other necessary public transport improvements, the eastwards extension of Ocean Drive and the provision of a network of paths for pedestrians and cyclists, including an east-west path that will form part of the city-wide coastal promenade (safeguarded routes for these are shown on the Proposals Map).

In Seafield and Leith’s northern and eastern docks (EW 1d and e), planning permission will be granted for industrial and port-related development and compatible uses provided it complies with other relevant policies in this plan.

Development should accord with the Leith Waterfront or Granton Waterfront Development Principles.

The purpose of this policy is to ensure the regeneration of Edinburgh’s Waterfront comes forward in a planned manner within the context of a long term vision. It sets out key development principles to guide housing led regeneration on large parts of the site, with more detailed guidance provided in the relevant site briefs. The policy also recognises that some parts of the Waterfront will remain in business and industrial uses. Development Principles for Leith Waterfront and Granton Waterfront are set out in Table 11 (Part 1 Section 5).

148

Policy Del 4 Edinburgh Park/South Gyle

Within the boundary of Edinburgh Park/South Gyle as shown on the Proposals Map, planning permission will be granted for development which maintains the strategic employment role of the area and also introduces a wider mix of uses. The requirements in principle will be for;

a) comprehensively designed proposals which maximise the development potential of the area

b) development for office and other business uses as part of mixed use proposals

c) housing as a component of business-led mixed use proposals

d) the creation of a new commercial hub adjacent to Edinburgh Park Station

e) additional leisure and community uses at Gyle shopping centre

f) an extension of the existing green space corridor (known as the Lochans) space

g) improved pedestrian and cycle links through the site and to provide strong, safe connections with services and facilities in the surrounding area

Development should accord with the Edinburgh Park/South Gyle Development Principles.

149 This policy aims to promote a better mix of uses in Edinburgh Park/South Gyle and still retain its important role as a strategic business location. The vision is to change the character of the Edinburgh Park/South Gyle area over time from a business dominated environment with limited evening and weekend activity to a thriving mixed use and well integrated part of the city. The Edinburgh Park/South Gyle Development Principles set out in Part 1 Section 5 provide guidance on how development can help deliver the long term vision for this area.
2 Design Principles for New Development

The Council encourages innovation and well designed developments that relate sensitively to the existing quality and character of the local and wider environment, generate distinctiveness and a sense of place, and help build stronger communities. Policies Des 1–Des 13 will be used to assess planning applications to meet the following objectives. More detailed advice on how to interpret and apply these policies can be found in Council guidance including in the Edinburgh Design Guidance document.

**Objectives**

- a) To ensure that new development is of the highest design quality and respects, safeguards and enhances the special character of the city
- b) To ensure that the city develops in an integrated and sustainable manner
- c) To create new and distinctive places which support and enhance the special character of the city and meet the needs of residents and other users

**Policy Des 1 Design Quality and Context**

Planning permission will be granted for development where it is demonstrated that the proposal will create or contribute towards a sense of place. Design should be based on an overall design concept that draws upon positive characteristics of the surrounding area. Planning permission will not be granted for poor quality or inappropriate design or for proposals that would be damaging to the character or appearance of the area around it, particularly where this has a special importance.

This policy applies to all new development, including alterations and extensions. The Council expects new development to be of a high standard of design. The Council’s policies and guidelines are not be used as a template for minimum standards. The purpose of the policy is to encourage innovation in the design and layout of new buildings, streets and spaces, provided that the existing quality and character of the immediate and wider environment are respected and enhanced and local distinctiveness is generated.
Part 2  Section 2 - Design Principles for New Development

Policy Des 2 Co-ordinated Development

Planning permission will be granted for development which will not compromise:

a) the effective development of adjacent land; or

b) the comprehensive development and regeneration of a wider area as provided for in a master plan, strategy or development brief approved by the Council.

152 This policy applies to all development involving one or more new buildings. The Council encourages a comprehensive approach to redevelopment and regeneration wherever possible, and the preparation of development frameworks or master plans, to identify the full design potential for creating successful places. Piecemeal development is less likely to lead to the creation of well-defined and cohesive networks of streets and spaces. In exceptional cases, it may be necessary for the Council to use its powers of compulsory purchase to assemble a site for development and enable a satisfactory outcome to be achieved.

Policy Des 3 Development Design - Incorporating and Enhancing Existing and Potential Features

Planning permission will be granted for development where it is demonstrated that existing characteristics and features worthy of retention on the site and in the surrounding area, have been identified, incorporated and enhanced through its design.

153 This policy is relevant for all new development involving one new building or more. Its aim is to ensure that development proposals are informed by a detailed analysis and understanding of the site. The incorporation of existing features including built structures, archaeology, trees and woodland, landscape character, views and biodiversity can enhance a development’s sense of place and contribution to the wider habitat and green network. Where practicable, proposals should provide new habitat to further the conservation of biodiversity.

Policy Des 4 Development Design – Impact on Setting

Planning permission will be granted for development where it is demonstrated that it will have a positive impact on its surroundings, including the character of the wider townscape and landscape, and impact on existing views, having regard to:

a) height and form

b) scale and proportions, including the spaces between buildings

c) position of buildings and other features on the site

d) materials and detailing

154 This policy applies to all new development of one or more buildings. Where the built environment is of high quality and has a settled townscape character, new development proposals will be expected to have similar characteristics to the surrounding buildings and urban grain. Where the surrounding development is fragmented or of poor quality, development proposals should help repair the urban fabric, establish model forms of development and generate coherence and distinctiveness – a sense of place. The siting and design of development should also be guided by views within the wider landscape and an understanding of local landscape character, including important topographical features, e.g. prominent ridges, valleys and patterns of vegetation.
**Policy Des 5 Development Design – Amenity**

Planning permission will be granted for development where it is demonstrated that:

a) the amenity of neighbouring developments is not adversely affected and that future occupiers have acceptable levels of amenity in relation to noise, daylight, sunlight, privacy, or immediate outlook

b) the design will facilitate adaptability in the future to the needs of different occupiers, and in appropriate locations will promote opportunities for mixed uses

c) community security will be promoted by providing active frontages to more important thoroughfares and designing for natural surveillance over all footpaths and open areas

d) a clear distinction is made between public and private spaces, with the latter provided in enclosed or defensible forms

e) refuse and recycling facilities, cycle storage, low and zero carbon technology, telecommunications equipment, plant and services have been sensitively integrated into the design

This policy applies to all new development for one or more new buildings. Buildings must meet the needs of users and occupiers, with consideration given to impacts on neighbouring properties to ensure no unreasonable noise impact or loss of daylight, sunlight or privacy. Buildings should be designed to be flexible in use and interact closely with the street, providing continuity of urban frontage and natural surveillance. Cul-de-sac and single access residential layouts and gated communities should be avoided to help the integration of new development into the wider neighbourhood. Ancillary facilities must be sensitively integrated into the design of buildings to avoid impacting upon the surrounding townscape.

---

**Policy Des 6 Sustainable Buildings**

Planning permission will only be granted for new development where it has been demonstrated that:

a) the current carbon dioxide emissions reduction target has been met, with at least half of this target met through the use of low and zero carbon generating technologies.

b) other features are incorporated that will reduce or minimise environmental resource use and impact, for example:

i. measures to promote water conservation

ii. sustainable urban drainage measures that will ensure that there will be no increase in rate of surface water run-off in peak conditions or detrimental impact on the water environment. This should include green roofs on sites where measures on the ground are not practical

iii. provision of facilities for the separate collection of dry recyclable waste and food waste

iv. maximum use of materials from local and/or sustainable sources

v. measures to support and encourage the use of sustainable transport, particularly cycling, including cycle parking and other supporting facilities such as showers.

This policy applies to all development involving one or more new buildings. The purpose of this policy is to help tackle the causes and impacts of climate change, reduce resource use and moderate the impact of development on the environment.

Buildings account for a substantial proportion of total carbon emissions through the energy they consume. Local authorities, through their planning and building standards responsibilities have a key role in helping to meet the Scottish Government’s target for nearly zero carbon homes and buildings by 2016. Scottish Building Standards set carbon dioxide emissions reduction targets. At March 2013,
the Building Standards target was a 30% carbon dioxide reduction from 2007 levels. This target figure is expected to rise over the LDP period.

158 To meet criterion a), proposals for new development must accord with the current carbon dioxide emissions reduction target (as set out by Scottish Building Standards) and also demonstrate that at least half of this reduction will be met through low and zero carbon technologies. This specified requirement linked to the anticipated rising Building Standards targets meets the Council’s obligations under Section 3F of the Town and Country Planning (Scotland) Act 1997.

159 Low and zero carbon technologies can be renewable energy sources such as solar panels and micro-wind, heat pumps, combined heat and power and district heating infrastructure, and equipment such as mechanical ventilation and heat recovery which uses fossil fuels but results in significantly lower carbon dioxide emissions overall. Existing technologies are able to meet half of the current Building Standards target and the above policy assumes that further innovation will enable such technologies to keep pace with the target as it rises.

160 The Council will set out the up-to-date requirement in the S1 Sustainability Form which applicants are required to complete to demonstrate compliance with the above policy. Further advice is available in Council guidance.

161 Steps must be taken to ensure that the rate of surface water run-off is not increased by the development proposed. This can be achieved by the use of sustainable urban drainage systems (SUDS) which is a comprehensive design approach to the management of water on a site, to delay run-off and encourage filtration through the use of porous surfaces, detention ponds, and swales in ways which enhance amenity and biodiversity and avoid pollution effects. Where ground SUDS cannot be provided for practical reasons, then building designs to manage heavy rainfall such as green roofs should be provided. It is also important that new developments create an environment that encourages more sustainable lifestyles, for example, by including waste management facilities that support recycling targets.

Policy Des 7 Layout Design

Planning permission will be granted for development where:

a) a comprehensive and integrated approach to the layout of buildings, streets, footpaths, cycle paths, public and private open spaces, services and SUDS features has been taken

b) new streets within developments are direct and connected with other networks to ensure ease of access to local centres and public transport and new public or focal spaces are created where they will serve a purpose

c) the layout will encourage walking and cycling, cater for the requirements of public transport if required and incorporate design features which will restrict traffic speeds to an appropriate level and minimise potential conflict between pedestrians, cyclists and motorised traffic

d) car and cycle parking areas and pedestrian and cycle paths are overlooked by surrounding properties

e) safe and convenient access and movement in and around the development will be promoted, having regard especially to the needs of people with limited mobility or special needs

f) public open spaces and pedestrian and cycle routes are connected with the wider pedestrian and cycle network including any off-road pedestrian and cycle routes where the opportunity exists.

162 This policy is relevant for all new development involving one or more new buildings. The layout of development should enhance community safety and urban vitality and provide direct and convenient connections on foot and by cycle. Where new road space is required as an integral and necessary part of new development, layouts should not encourage greater car use or cause or add to congestion in the surrounding area.
Policy Des 8 Public Realm and Landscape Design

Planning permission will be granted for development where all external spaces, and features, including streets, footpaths, civic spaces, green spaces boundary treatments and public art have been designed as an integral part of the scheme as a whole, and it has been demonstrated that:

a) the design and the materials to be used are appropriate for their intended purpose, to the use and character of the area generally, especially where this has a special interest or importance

b) the different elements of paving, landscaping and street furniture are coordinated to avoid a sense of clutter, and in larger schemes design and provision will be coordinated over different phases of a development

c) particular consideration has been given, if appropriate, to the planting of trees to provide a setting for buildings, boundaries and road sides and create a robust landscape structure

d) a satisfactory scheme of maintenance will be put in place.

This policy applies to all development proposing new public space as part of the overall scheme. High quality, well designed public spaces are crucial elements of the urban environment and in making successful places. The Council encourages the preparation of public realm strategies to coordinate design and provide information on future maintenance in other major development schemes.

Policy Des 9 Urban Edge Development

Planning permission will only be granted for development on sites at the green belt boundary where it:

a) conserves and enhances the landscape setting and special character of the city

b) promotes access to the surrounding countryside if appropriate

c) includes landscape improvement proposals that will strengthen the green belt boundary and contribute to multi-functional green networks by improving amenity and enhance biodiversity.

This policy applies to all new development situated at the edge of the urban area. A clear demarcation between town and country is important to the defensibility of the Green Belt boundary and its objectives.

Policy Des 10 Waterside Development

Planning permission will only be granted for development on sites on the coastal edge or adjoining a watercourse, including the Union Canal, where the proposals:

a) provides an attractive frontage to the water in question

b) where appropriate, maintains, provides or improves public access to and along the water’s edge

c) maintains and enhances the water environment, its nature conservation or landscape interest including its margins and river valley

d) if appropriate, promotes recreational use of the water.

This policy applies to all new development adjoining a watercourse. The city’s several natural water courses add to the variety of scenery within the urban area and the city’s biodiversity interest. They have considerable potential to enhance adjacent development by offering recreational value and contributing to the green network. Proposals along the Firth of Forth may also need to be assessed in terms of any impact on the internationally designated Natura 2000 site – see Policy Env13.
**Policy Des 11 Tall Buildings – Skyline and Key Views**

Planning permission will only be granted for development which rises above the building height prevailing generally in the surrounding area where:

a) a landmark is to be created that enhances the skyline and surrounding townscape and is justified by the proposed use

b) the scale of the building is appropriate in its context

c) there would be no adverse impact on important views of landmark buildings, the historic skyline, landscape features in the urban area or the landscape setting of the city, including the Firth of Forth.

166 Proposals for development that would be conspicuous in iconic views of the city will be subject to special scrutiny. This is necessary to protect some of the city's most striking visual characteristics, the views available from many vantage points within the city and beyond, of landmark buildings, the city's historic skyline, undeveloped hillsides within the urban area and the hills, open countryside and the Firth of Forth which create a unique landscape setting for the city. In addition, the height of new buildings may need to be suppressed where necessary so that the city's topography and valley features continue to be reflected in rooftops. This policy will play an important role in protecting the setting of the World Heritage Sites.

167 A study undertaken for the Council identifies key public viewpoints and is used in assessing proposals for high buildings. Further advice is provided in Council guidance.

---

**Policy Des 12 Alterations and Extensions**

Planning permission will be granted for alterations and extensions to existing buildings which:

a) in their design and form, choice of materials and positioning are compatible with the character of the existing building

b) will not result in an unreasonable loss of privacy or natural light to neighbouring properties

c) will not be detrimental to neighbourhood amenity and character

168 Every change to a building, street or space has the potential to enrich or, if poorly designed, impoverish a part of the public realm. The impact of a proposal on the appearance and character of the existing building and street scene generally must be satisfactory and there should be no unreasonable loss of amenity and privacy for immediate neighbours.

---

**Policy Des 13 Shopfronts**

Planning permission will be granted for alterations to shopfronts which are improvements on what already exists and relate sensitively and harmoniously to the building as a whole. Particular care will be taken over proposals for the installation of illuminated advertising panels and projecting signs, blinds, canopies, security grills and shutters to avoid harm to the visual amenity of shopping streets or the character of historic environments.

169 Shopfront design, shop designs and shopfront advertising play an important role in the visual environment of the city. Important traditional or original features on older buildings, such as stall risers, fascias and structural framing of entrances and shop windows, should be retained and incorporated into the design. In conservation areas and on listed buildings, design and materials used will be expected to be of a high standard, and not damaging to existing fabric of buildings or wider character. Detailed advice on shopfronts is provided in Council guidance.
### 3 Caring for the Environment

Protection of the historic and natural environment for the benefit of future generations is an important role of the planning system. The purpose and context of Edinburgh’s most important environmental designations including the World Heritage Site, Conservation Areas and Green Belt are explained in Part 1 of the plan. Policies Env 1 – Env 22 will be used in assessing planning applications to meet the following objectives;

#### Objectives

- To ensure that the unique qualities of the city, its historic environment and the character of its urban areas are safeguarded for the future
- To protect important landscape and natural features of the environment, including the city's Green Belt setting
- To protect and enhance the nature conservation and biodiversity interest of the city
- To protect natural resources

### The Historic Environment

171 Policies Env 1 – Env 6 will be used to assess proposals affecting Edinburgh’s world heritage sites, conservation areas and listed buildings. The Council’s guidance on Conservation Areas and Listed Buildings provide further advice. Policy Env 7 relates to historic landscapes and policies Env 8 and 9 cover archaeological resources.

#### Policy Env 1 World Heritage Sites

Development which would harm the qualities which justified the inscription of the Old and New Towns of Edinburgh and/or the Forth Bridge as World Heritage Sites or would have a detrimental impact on a Site's setting will not be permitted.

172 This policy requires development to respect and protect the outstanding universal values of the World Heritage Sites and their settings. Setting may include sites in the immediate vicinity, viewpoints identified in the key views study and prominent landscape features throughout the city.

#### Policy Env 2 Listed Buildings - Demolition

Proposals for the total or substantial demolition of a listed building will only be supported in exceptional circumstances, taking into account:

a) the condition of the building and the cost of repairing and maintaining it in relation to its importance and to the value to be derived from its continued use

b) the adequacy of efforts to retain the building in, or adapt it to, a use that will safeguard its future, including its marketing at a price reflecting its location and condition to potential restoring purchasers for a reasonable period.

c) the merits of alternative proposals for the site and whether the public benefits to be derived from allowing demolition outweigh the loss.
Policy Env 3  Listed Buildings - Setting

Development within the curtilage or affecting the setting of a listed building will be permitted only if not detrimental to the architectural character, appearance or historic interest of the building, or to its setting.

Policy Env 4  Listed Buildings – Alterations and Extensions

Proposals to alter or extend a listed building will be permitted where

a) those alterations or extensions are justified;

b) there will be no unnecessary damage to historic structures or diminution of its interest; and

c) where any additions are in keeping with other parts of the building.

In determining applications for planning permission or listed building consent, the Council is required to have special regard to the desirability of preserving the building, its setting or any features of special architectural or historic interest that it possesses. Applications for the demolition or substantial alteration of a listed building must be accompanied by a thorough structural condition report demonstrating that the proposals are necessary or justified. Information must be provided on the proposed replacement building; these should be of comparable quality in terms of construction and design. The loss of a listed building will only be justified in exceptional circumstances. Scottish Historic Environment Policy (SHEP) and Council guidance provide further advice for applications relating to Listed Buildings.

Policy Env 5 Conservation Areas – Demolition of Buildings

Proposals for the demolition of an unlisted building within a conservation area but which is considered to make a positive contribution to the character of the area will only be permitted in exceptional circumstances and after taking into account the considerations set out in Policy Env 2 above.

Proposals for the demolition of any building within a conservation area, whether listed or not, will not normally be permitted unless a detailed planning application is approved for a replacement building which enhances or preserves the character of the area or, if acceptable, for the landscaping of the site.

Policy Env 6 Conservation Areas - Development

Development within a conservation area or affecting its setting will be permitted which:

a) preserves or enhances the special character or appearance of the conservation area and is consistent with the relevant conservation area character appraisal

b) preserves trees, hedges, boundary walls, railings, paving and other features which contribute positively to the character of the area and

c) demonstrates high standards of design and utilises materials appropriate to the historic environment.

Planning applications should be submitted in a sufficiently detailed form for the effect of the development proposal on the character and appearance of the area to be assessed.

The purpose of the above policies is to protect and, where possible, enhance the character and appearance of Edinburgh’s many conservation areas. By controlling the demolition of buildings and ensuring new development is of appropriate design and quality, their aim is to protect the City’s heritage for future generations.

Applications for demolition will be permitted only where this does not erode the character and appearance of the conservation area. The general presumption will be in favour of retaining buildings that make a positive contribution to the conservation area, particularly where it can be demonstrated that the building is able to support a new viable use, or might be capable of such in the future. Conservation Area Consent may be subject to conditions or a legal agreement to link demolition works to the
provision of the proposed replacement building or, in exceptional circumstances, to require temporary landscaping.

176 Design statements are required for new developments in a conservation area. This statement should include reference to the relevant Conservation Area Character Appraisal and Council guidance on Conservation Areas and Listed Buildings and show how these have informed the proposed design.

Policy Env 7 Historic Gardens and Designed Landscapes

Development will only be permitted where there is no detrimental impact on the character of a site recorded in the Inventory of Gardens and Designed Landscapes, adverse effects on its setting or upon component features which contribute to its value. Elsewhere, adverse effects on historic landscape features should be minimised. Restoration of Inventory sites and other historic landscape features is encouraged.

177 This policy aims to protect sites included in the national Inventory of Gardens and Designed Landscapes (shown on the Proposals Map) and other historic landscape features elsewhere across the Council area. An understanding of how the landscape has evolved can help inform a development proposal. A historical landscape appraisal may be requested from applicants to allow full assessment of the implications of development and identify restoration opportunities.

Policy Env 8 Protection of Important Remains

Development will not be permitted which would:

a) adversely affect a scheduled monument or other nationally important archaeological remains, or the integrity of their setting

b) damage or destroy non-designated archaeological remains which the Council considers should be preserved in situ.

Policy Env 9 Development of Sites of Archaeological Significance

Planning permission will be granted for development on sites of known or suspected archaeological significance if it can be concluded from information derived from a desk-based assessment and, if requested by the Council, a field evaluation, that either:

a) no significant archaeological features are likely to be affected by the development or

b) any significant archaeological features will be preserved in situ and, if necessary, in an appropriate setting with provision for public access and interpretation or

c) the benefits of allowing the proposed development outweigh the importance of preserving the remains in situ. The applicant will then be required to make provision for archaeological excavation, recording, and analysis, and publication of the results before development starts, all to be in accordance with a programme of works agreed with the Council.

178 The objective of the above policies is to protect and enhance archaeological remains, where possible by preservation in situ in an appropriate setting. In some cases, depending on the nature of the remains and character of the site, the Council may require provision for public access and interpretation as part of the proposed development. When preservation in situ is not possible, recording and/or excavation followed by analysis and publication of the results will be required.

179 Developers should seek early advice from the Council’s Archaeologist for sites where historic remains are known or thought likely to exist. Where a development may affect a scheduled monument or its setting, early contact should be made with Historic Environment Scotland.
Part 2  Section 3 - Caring for the Environment

Natural Environment

Policies Env 10 to Env 16 will play an important role in ensuring development proposals protect and where possible enhance Edinburgh’s natural heritage. Further advice can be found in Council guidance.

Policy Env 10 Development in the Green Belt and Countryside

Within the Green Belt and Countryside shown on the Proposals Map, development will only be permitted where it meets one of the following criteria and would not detract from the landscape quality and/or rural character of the area:

a) For the purposes of agriculture, woodland and forestry, horticulture or countryside recreation, or where a countryside location is essential and provided any buildings, structures or hard standing areas are of a scale and quality of design appropriate to the use.

b) For the change of use of an existing building, provided the building is of architectural merit or a valuable element in the landscape and is worthy of retention. Buildings should be of domestic scale, substantially intact and structurally capable of conversion.

c) For development relating to an existing use or building(s) such as an extension to a site or building, ancillary development or intensification of the use, provided the proposal is appropriate in type in terms of the existing use, of an appropriate scale, of high quality design and acceptable in terms of traffic impact.

d) For the replacement of an existing building with a new building in the same use provided:

1) the existing building is not listed or of architectural / historic merit;
2) the existing building is of poor quality design and structural condition,
3) the existing building is of domestic scale, has a lawful use and is not a temporary structure; and
4) the new building is of a similar or smaller size to the existing one, lies within the curtilage of the existing building and is of high design quality.

It is necessary to control the type and scale of development in the green belt to enable it to fulfil its important role in terms of landscape setting and countryside recreation as described in Part 1. However, the purpose of the green belt is not to prevent development from happening. This policy sets out the circumstances in which development in the green belt can be supported.

In Edinburgh, Countryside areas i.e. land outwith existing settlements, which are not designated green belt are considered to be of equivalent environmental importance. For this reason, it is appropriate to apply the same level of protection to both green belt and Countryside areas.

The key test for all proposals in the green belt and Countryside areas will be to ensure that the development does not detract from the landscape quality and/or rural character of the area. The Council’s guidance ‘Development in the Countryside and Green Belt’ provides more detailed advice.

Policy Env 11 Special Landscape Areas

Planning permission will not be granted for development which would have a significant adverse impact on the special character or qualities of the Special Landscape Areas shown on the Proposals Map

This policy aims to protect Edinburgh’s unique and diverse landscape which contributes to the city’s distinctive character and scenic value. Special Landscape Areas (SLA) are local designations, which safeguard and enhance the character and quality of valued landscapes across the Council area.

A Statement of Importance has been prepared for each SLA and can be viewed on the Council’s website. This sets out the essential qualities and characteristics of the area and the potential for enhancement. The Statements of Importance should be
used to guide development proposals in SLAs and will be a material consideration in assessing planning applications. A landscape and visual impact assessment is likely to be needed in support of proposals affecting a SLA.

**Policy Env 12 Trees**

Development will not be permitted if likely to have a damaging impact on a tree protected by a Tree Preservation Order or on any other tree or woodland worthy of retention unless necessary for good arboricultural reasons. Where such permission is granted, replacement planting of appropriate species and numbers will be required to offset the loss to amenity.

This policy recognises the important contribution made by trees to character, biodiversity, amenity and green networks. In assessing proposals affecting trees, the Council will consider their value, taking into account current Scottish Government guidance – presently contained in its Policy on Control of Woodland Removal and UK Forest Standard – and their status such as Tree Preservation Order, heritage tree, Ancient Woodland and Millennium Woodland, along with information from tree surveys.

Where necessary to protect trees, the Council will use its powers to make and enforce Tree Preservation Orders.

**Nature Conservation**

**Policy Env 13 Sites of International Importance**

Development likely to have a significant effect on a ‘Natura 2000 site’ will be permitted only if either:

a) the development will not adversely affect the integrity of the area; or
b) it has been demonstrated that:
   c) there are no alternative solutions and
d) there are imperative reasons of overriding public interest for permitting the development, including reasons of a social or economic nature.
   e) compensatory measures are provided to ensure that the overall coherence of the Natura network is protected.

The Plan area covers internationally important sites known as ‘Natura 2000 sites’, designated under the Conservation (Natural Habitats, &c) Regulations 1994. These are the Firth of Forth, Forth Islands (part), and Imperial Dock Lock Special Protection Areas. Where a proposal may affect an internationally protected site, the Council will carry out a Habitats Regulation Appraisal. If it considers the proposal is likely to have a significant effect, the Council must then undertake an appropriate assessment. The appropriate assessment will consider the implications of the development for the conservation interests for which the area has been designated. Applicants will be required to provide information to inform the appropriate assessment. Development which could harm any of these internationally important areas will only be approved in exceptional circumstances.
Policy Env 14 Sites of National Importance

Development which would affect a Site of Special Scientific Interest will only be permitted where an appraisal has demonstrated that:

a) the objectives of the designation and the overall integrity of the area will not be compromised or

b) any significant adverse effects on the qualities for which the area has been designated are clearly outweighed by social or economic benefits of national importance.

189 Sites of Special Scientific Interest (SSSIs) are areas of land (including land covered by water) which are considered by Scottish Natural Heritage (SNH) to be of special interest by reason of their natural features, i.e. their flora, fauna or geological or geomorphological features. Development which could harm an SSSI will be required to demonstrate reasons which clearly outweigh the nature conservation interest of the site and justify a departure from the national policy to protect such sites.

Policy Env 15 Sites of Local Importance

Development likely to have an adverse impact on the flora, fauna, landscape or geological features of a Local Nature Reserve or a Local Nature Conservation Site will not be permitted unless it can be demonstrated that:

a) the reasons for allowing the development are sufficient to outweigh the nature conservation interest of the site

b) the adverse consequences of allowing the development for the value of the site have been minimised and mitigated in an acceptable manner.

190 The purpose of this policy is to protect sites of local nature conservation value and designated Local Nature Reserves from damaging development. The network of Local Nature Conservation sites and Local Nature Reserves is shown on the Proposals Map. Many of these provide connectivity between internationally and nationally important sites and contribute to green networks. A Site Report has been prepared for each LNCS.

Policy Env 16 Species Protection

Planning permission will not be granted for development that would have an adverse impact on species protected under European or UK law, unless:

a) there is an overriding public need for the development and it is demonstrated that there is no alternative

b) a full survey has been carried out of the current status of the species and its use of the site

c) there would be no detriment to the maintenance of the species at “favourable conservation status”*

d) suitable mitigation is proposed

191 European Protected Species (EPS) are covered by the Habitats Regulations. EPS found in the Edinburgh area are bats, otters, and great crested newts. Other species-specific legislation to be taken into account includes the Protection of Badgers Act 1992 and those species listed in the Schedules of the Wildlife and Countryside Act 1981. If the presence of an EPS or other protected species is suspected, appropriate survey work must be carried out to enable the Council to assess the likely impact of development on the species.

* The EU Habitats Directive defines ‘favourable conservation status’ as the distribution and population of the species being at least the same as when the Directive came into force in 1994.
Countryside Access and Open Space

Policy Env 17 Pentlands Hills Regional Park

Development which supports the aims of the Pentlands Hills Regional Park will be permitted provided it has no unacceptable impact on the character and landscape quality of the Park.

192 This policy aims to ensure that proposals for outdoor recreation activities, whilst likely to be supported in principle, do not detract from the special rural character of the Regional Park. Proposals will also be assessed in terms of other relevant policies such as Env 10 Green Belt and Env 11 Landscape Quality.

Open Space

193 The Proposals Map shows the significant areas of open space identified in an audit of the city. The criteria in Policy Env 18 will be applied to development proposals affecting all such open spaces citywide. Proposals affecting a playing field will be considered against relevant criteria in both Policy Env 18 and Policy Env 19.

Policy Env 18 Open Space Protection

Proposals involving the loss of open space will not be permitted unless it is demonstrated that:

a) there will be no significant impact on the quality or character of the local environment and

b) the open space is a small part of a larger area or of limited amenity or leisure value and there is a significant over-provision of open space serving the immediate area and

c) the loss would not be detrimental to the wider network including its continuity or biodiversity value and either

d) there will be a local benefit in allowing the development in terms of either alternative equivalent provision being made or improvement to an existing public park or other open space or

e) the development is for a community purpose and the benefits to the local community outweigh the loss.

194 This policy aims to protect all open spaces, both public and privately owned, that contribute to the amenity of their surroundings and the city, provide or are capable of providing for the recreational needs of residents and visitors or are an integral part of the city’s landscape and townscape character and its biodiversity. The Council will only support development on open space in exceptional circumstances, where the loss would not result in detriment to the overall network and to open space provision in the locality. Such circumstances tend to exist where large areas of residential amenity space have been provided without a clear purpose or sense of ownership. The Council’s Open Space Strategy sets the standards to be met for open space provision across Edinburgh and will be used to assess whether there is an over provision of open space in the immediate area (criterion b). To accord with criterion d), proposals for alternative provision or improvements to open space should normally address an identified action in the Open Space Strategy.

Policy Env 19 Protection of Outdoor Sports Facilities

In addition to the requirements of Policy Env 18, the loss of some or all of a playing field or sports pitch will be permitted only where one of the following circumstances applies:

a) The proposed development is ancillary to the principal use of the site as outdoor sports facilities

b) The proposed development involves a minor part of outdoor sports facilities and would not adversely affect the use or potential of the remainder for sport and training

c) An alternative outdoor sports facility is to be provided of at least equivalent...
Sporting value in a no less convenient location, or existing provision is to be significantly improved to compensate for the loss.

d) The Council is satisfied that there is a clear excess of sports pitches to meet current and anticipated future demand in the area, and the site can be developed without detriment to the overall quality of provision.

Outdoor sports facility provision must be considered as a city-wide resource and in terms of its contribution to local needs. The Council’s assessment of provision in the city as a whole has concluded that the amount of pitches, whether or not in public ownership or publicly accessible, is equivalent to the need. However, there needs to be significant improvements in quality. On this evaluation, the loss of pitches to development cannot be justified in principle. However, the loss might be acceptable if alternative equivalent provision is to be made in an equally convenient location. Development has been allowed where other pitches serving the local community are to be equipped with all-weather playing surfaces. The Open Space Strategy identifies the locations where such investment is to be concentrated in multi-pitch venues.

Policy Env 20 Open Space in New Development

The Council will negotiate the provision of new publicly accessible and useable open space in new development when appropriate and justified by the scale of development proposed and the needs it will give rise to. In particular, the Council will seek the provision of extensions and/or improvements to the green network.

This policy ensures that development proposals (other than housing which is covered by Policy Hou 3) include appropriate open space provision and, where the opportunity arises, contribute to Edinburgh’s green network. The term ‘open space’ covers green space and civic space.

Protection of Natural Resources

Policy Env 21 Flood Protection

Planning permission will not be granted for development that would:

a) increase a flood risk or be at risk of flooding itself

b) impede the flow of flood water or deprive a river system of flood water storage within the areas shown on the Proposals Map as areas of importance for flood management

c) be prejudicial to existing or planned flood defence systems.

This purpose of this policy is to ensure development does not result in increased flood risk for the site being developed or elsewhere. Identified areas of importance for flood management are identified on the Proposals Map. It is essential to maintain strict control over development in these areas. Proposals will only be favourably considered if accompanied by a flood risk assessment demonstrating how compensating measures are to be carried out, both on and off the site, and that any loss of flood storage capacity is mitigated to achieve a neutral or better outcome. In some circumstances, sustainable flood management or mitigation measures may not be achievable.

This can exacerbate flood risk and have a detrimental effect on biodiversity. Any further culverting across the city will be opposed, and the removal of existing culverts will be sought when possible.

New development can add to flood risk if it leads to an increase in surface water run-off. It is also at risk from water flowing over land during heavy rainfall. Policy Des 6 states that these risks should be avoided by the use of sustainable drainage techniques (SUDs).
Policy Env 22 Pollution and Air, Water and Soil Quality

Planning permission will only be granted for development where:

a) there will be no significant adverse effects for health, the environment and amenity and either

b) there will be no significant adverse effects on: air, and soil quality; the quality of the water environment; or on ground stability

c) appropriate mitigation to minimise any adverse effects can be provided.

Pollution can arise from many sources and activities including traffic and transport, domestic heating, industrial processes, agriculture, waste disposal and landfill. Air, soil and water quality can all be affected and harmed by some forms of development and land can present a potential pollution or safety threat if it has been contaminated or destabilised by previous activities. Air, noise and light pollution can also be a source of harm to health and amenity.

The potential risk and significance of pollution will be considered when assessing planning applications, in consultation where necessary with relevant agencies, such as Scottish Environment Protection Agency and the Health and Safety Executive. Proposals will be assessed to ensure development does not adversely affect air quality in identified Air Quality Management Areas (AQMAs) or, by cumulative impacts, lead to the creation of further AQMAs in the city.
Part 2  Section 4 - Employment and Economic Development

The following policies aim to help deliver the Council’s Economic Strategy by promoting economic development in sustainable locations, with a particular focus on opportunities for office development and Edinburgh’s ‘special employment areas’. The policies take full account of the need to protect and enhance environmental quality and to protect a range of existing business and industrial sites and premises.

**Objectives**

- To promote sustainable growth in jobs and investment in Edinburgh’s economy
- To protect a range of existing business and industry locations of importance for a mixed and varied economy
- To maintain and enhance the diversity of jobs available in the city, paying special attention to small business needs

**Offices**

High quality office developments, including major developments, will be supported:

a) in the City Centre as identified on the Proposals Map

b) in the other strategic business centres identified on the Proposals Map at Edinburgh Park/South Gyle, the International Business Gateway and Leith, preferably as part of business led mixed use proposals

c) in town or local centres as identified in Table 6 and on the Proposals Map (where of an appropriate scale).

Where it is demonstrated that sites in locations a-c above are unavailable or unsuitable, other accessible mixed use locations may be considered where:

- in proximity to public transport nodes, compatible with the accessibility of the location by public transport and with the character of the local environment and
- for any development exceeding 2,500 square metres an assessment of impact has been prepared which demonstrates that the impact on existing town centres is acceptable.

This policy supports a range of suitable locations for office development in recognition of the important role of the financial sector and other office based businesses in providing jobs and contributing to economic growth.

The city centre remains the prime location for office development, due to proximity to other office, service and transport hubs. There are a number of existing proposals
with planning permission which will provide additional office space in the City Centre including the Edinburgh St James, Caltongate, Haymarket, Fountainbridge and the Exchange District. To meet continuing demand for office space in the city centre, major redevelopment opportunities should include significant office provision, and where possible large, flexible floor-plates as part of the overall mix of uses. A development brief may be prepared when a redevelopment opportunity arises to ensure proposals incorporate an appropriate mix of uses to support economic growth and the important shopping and leisure role of the city centre.

205 The plan identifies three other strategic office locations at Edinburgh Park/SouthGyle, the International Business Gateway (IBG) and Leith. Each is different in character but all are in accessible locations providing readily available opportunities sites for office development. In order to create an attractive place in which to invest, work and visit, proposals should incorporate a mix of uses. Proposals in the IBG should be for international businesses.

206 To meet economic growth objectives, the plan applies a flexible approach to office proposals in other mixed use locations across the city. Such proposals will be supported provided the scale of development is appropriate in terms of accessibility by public transport and the character of the area.

Special Economic Areas

207 These are areas of national or strategic economic importance, providing or with the potential to provide a significant number of jobs. The ‘special economic areas’ are Edinburgh BioQuarter, Riccarton University Campus and Business Park, Edinburgh Airport, Royal Highland Centre, International Business Gateway and RBS Headquarters at Gogarburn. The growth of these areas, through new businesses and the expansion of existing businesses, will make a significant contribution towards meeting the plan’s economic development objectives. Ancillary uses are likely to be supported in these areas to meet place-making objectives, help attract investment and complement the business uses. However, other uses must not undermine the main purpose of these areas as set out in Table 2 in Part 1 Section 3 and their contribution to the economy of the city region and, in some cases, Scotland as a whole.

Policy Emp 2 Edinburgh BioQuarter

Development within the boundary of Edinburgh BioQuarter as defined on the Proposals Map will be granted provided it accords with the BioQuarter Development Principles (Part 1 Section 5) to be further detailed through Supplementary Guidance.

208 Supplementary Guidance will be prepared to support the future development of the Edinburgh BioQuarter for Life Sciences research and directly related commercial developments. Proposals within the BioQuarter will be assessed against this guidance. Proposals will also be assessed against the BioQuarter Development Principles (Part 1 Section 5) and other relevant local plan policies, for example on matters such as design, accessibility, landscaping, biodiversity and relationship with the neighbouring green belt and the South East Wedge Parkland Green Space Proposal GS4.
Policy Emp 3 Riccarton University Campus and Business Park

Development for the following purposes will be supported within the boundary of Riccarton University Campus and Business Park, provided proposals accord with the approved master plan and other relevant local development plan policies.

1) Academic teaching and research.
2) Uses ancillary to the University, including student residential accommodation and sport and recreational facilities.
3) Business uses, including the research and development of products and processes, where a functional linkage with the University’s academic activities can be demonstrated.

This policy support the future development of Heriot-Watt University and expansion of the adjacent business park for research and development and other business uses which have strong links to the University’s academic activities. Proposals will also be assessed against other relevant local plan policies, for example on matters such as design, accessibility, landscaping, biodiversity and relationship with the green belt. This policy also supports the development of the National Performance Centre for Sport and directly related development.

Policy Emp 4 Edinburgh Airport

The development and enhancement of Edinburgh Airport will be supported within the airport boundary defined on the Proposals Map. The approved master plan will inform this process. Proposals for ancillary services and facilities will only be permitted where it can be demonstrated that these have strong and direct functional and locational links with the airport and are compatible with the operational requirements of the airport.

All development proposals within the airport boundary must accord with the West Edinburgh Strategic Design Framework (WESDF) and other relevant local development plan policies. Supporting information will be required to demonstrate how proposals will contribute to meeting the mode share targets set out in the WESDF.

Land to the north of the existing airport boundary is safeguarded to provide a second main parallel runway, if required in the future, to meet air passenger growth forecasts. Within this area, green belt policy will apply (policy Env 10). Proposals which would prejudice the long-term expansion of Edinburgh Airport will not be supported.

210 The purpose of this policy is to guide proposals for airport expansion in accordance with National Planning Framework 3. Further planning guidance is set out in the West Edinburgh Strategic Design Framework (WESDF). The policy covers proposals for airport and related uses that require planning permission (some airport proposals are ‘permitted development’ i.e. planning permission is not needed). Compliance with the WESDF and other relevant local plan policies will ensure airport proposals are acceptable in terms of scale and location, accessibility by public transport, pedestrians and cyclists, traffic generation and car parking and other environmental considerations.

Policy Emp 5 Royal Highland Centre

The development and enhancement of the Royal Highland Centre (RHC) will be supported within the boundary defined on the Proposals Map, provided proposals accord with the approved master plan. Ancillary uses will only be permitted where it can be demonstrated that these are linked to the primary activities of the RHC.

All development proposals within the RHC boundary must accord with other local development plan policies, and the West Edinburgh Strategic Design Framework (WESDF) provides further guidance for such proposals. Supporting information will be required to demonstrate how proposals will contribute to meeting the mode share targets set out in the WESDF.

The site of the Royal Highland Centre may be required for airport uses in the long term to meet air passenger growth forecasts. Therefore, development which would...
prejudice the long-term expansion of Edinburgh Airport will not be supported, except where it is compatible with the current use of the site by the Royal Highland Centre, in the context of this policy.

Land at Norton Park as shown on the Proposals Map is safeguarded for the future relocation of the RHC and its development as Scotland’s National Showground. Within this area, green belt policy will apply (policy Env 10). Proposals which would prejudice the future development of the Norton Park site for showground purposes will not be permitted.

211 This policy guides proposals for the further development and enhancement of the Royal Highland Centre on land to the north of the A8. The policy also safeguards the site for the long term expansion of Edinburgh Airport, and in turn safeguards land at Norton Park to the south of the A8 for the long term relocation of the RHC, in accordance with National Planning Framework 3. Further planning guidance on the long term expansion of Edinburgh Airport is set out within the Edinburgh Airport Master plan. The Norton Park site will remain in the green belt until required for the relocation of the RHC. Compliance with the WESDF and other relevant local plan policies will ensure RHC proposals are acceptable in terms of scale and location, accessibility by public transport, pedestrians and cyclists, traffic generation and car parking, landscaping, sustainable building, drainage and flood management, habitat protection and enhancement, place-making and design and impact on setting and views, including wider townscape impacts.

Policy Emp 6 International Business Gateway

Proposals for the development of an International Business Gateway (IBG) within the boundary defined on the Proposals Map will be supported. The following uses are supported in principle:

- International business development (as described below)
- Hotel and conference facilities;
- Uses ancillary to international business development, such as child nursery facilities, restaurants and health and sports clubs.
- Housing as a component of a business – led mixed use proposal subject to further consideration through the master plan process, appropriate infrastructure provision and where consistent with the objectives of the National Planning Framework 3.

All IBG proposals must accord with the IBG development principles and other relevant local development plan policies. The West Edinburgh Strategic Design Framework (WESDF), supported by master plans where appropriate, provides further guidance for development proposals, including guidance about the required contributions towards meeting the mode share targets.

212 The purpose of this policy is to support the development of this nationally important economic development opportunity and ensure proposals accord with National Planning Framework 3. Further planning guidance is set out in the West Edinburgh Strategic Design Framework (WESDF). The main purpose of the IBG is to attract inward investment and create new jobs for Scotland. New housing will support place-making and sustainability objectives. International business development may take various forms, including the development of global/European/UK headquarters and accommodation supporting high-value corporate functions for international organisations. Compliance with the WESDF, the IBG Development Principles (Part 1 Section 5) and other relevant local plan policies will ensure IBG proposals are acceptable in terms of scale and location, accessibility by public transport, pedestrians and cyclists, traffic generation and car parking, landscaping, sustainable building, drainage and flood management, habitat protection and enhancement, place-making and design and impact on setting and views, including wider townscape impacts.
Part 2  Section 4 - Employment and Economic Development

Policy Emp 7 RBS Headquarters Gogarburn

Office and ancillary development will be supported within the boundary shown on the Proposals Map provided proposals are compatible with the existing function of the site, are acceptable in terms of impact on green belt objectives and accord with other relevant local development plan policies.

This policy supports the future development of this site for economic development purposes, in recognition of its importance to Edinburgh’s economy and financial sector in particular. Proposals will also be assessed against other relevant local plan policies, for example on matters such as design, accessibility, landscaping, biodiversity and green belt.

Other Business and Industry Sites

In addition to the special economic areas, other business and industry areas and individual sites play an important role in providing jobs, investment opportunities and valued local services. The plan supports proposals for economic development purposes on all existing employment sites, subject to relevant local development plan policies. A thriving city economy needs an adequate supply of land for business and industry. The plan therefore includes policies to control the redevelopment of employment sites for other uses. Policy Emp 8 covers business and industry areas identified on the Proposals Map. Policy Emp 9 relates to sites larger than one hectare last used for employment purposes - these are not specifically identified on the Proposals Map.

Policy Emp 8 Business and Industry Areas

Planning permission will be granted for business, industrial or storage development on sites identified on the Proposals Map as part of a ‘Business and Industry Area’. Development, including change of use, which results in the loss of business, industrial or storage floorspace or potential will not be permitted in these areas.

Policy Emp 9 Employment Sites and Premises

Proposals to redevelop employment sites or premises in the urban area for uses other than business, industry or storage will be permitted provided:

a) the introduction of non-employment uses will not prejudice or inhibit the activities of any nearby employment use;

b) the proposal will contribute to the comprehensive regeneration and improvement of the wider area;

c) and, if the site is larger than one hectare, the proposal includes floorspace designed to provide for a range of business users.

Planning permission will be granted for the development for employment purposes of business and industrial sites or premises in the urban area.

This policy applies to sites or premises in the urban area currently or last in use for employment purposes not covered by Policies Emp 2 – Emp 8. It provides support

215 This policy aims to retain a range of employment sites across the city where new and existing businesses can operate, expand or relocate. It applies to land at Leith Docks, large industrial areas such as Sighthill and Newbridge and other smaller estates dispersed across the city.

216 Leith Docks is of national economic importance, identified in the National Renewables Infrastructure Plan as an opportunity for manufacturing industry to support offshore renewable energy industry. Other business and industry areas are vital to the local economy and have been designed to cater for a diversity of uses and building sizes. Most are in locations which can be easily accessed by heavy goods vehicles which use the trunk road network. Small scale proposals for ancillary uses which support local businesses and provide services for their employees may be supported as an exception to this policy.
218 The policy aims to help meet the needs of small businesses by ensuring that if where large (i.e. greater than one hectare) business or industry sites are to be redeveloped for other uses, proposals must include some new small industrial/business units. The justification for this criteria lies in the Edinburgh Small Business Study, updated in 2011, which identified that businesses with fewer than 10 employees, account for around 14% of the city’s employees and that the current supply of suitable premises is insufficient to meet market demand.

219 Redevelopment proposals on all employment sites, regardless of size, need to take account of impact on the activities of neighbouring businesses and any regeneration proposals for the wider area.

Policy Emp 10 Hotel Development

Hotel development will be permitted:

a) in the City Centre where developments may be required to form part of mixed use schemes, if necessary to maintain city centre diversity and vitality, especially retail vitality on important shopping frontages

b) within the boundaries of Edinburgh Airport, the Royal Highland Centre and the International Business Gateway

c) in locations within the urban area with good public transport access to the city centre.

220 Tourism is the third biggest source of employment in Edinburgh, providing jobs for over 31,000 people. Maintaining and developing this key sector in the city’s economy relies upon sufficient provision of high-quality tourist accommodation. In 2006 a study looking at tourist accommodation demand and supply was commissioned by the Council and others. The study identified the particular importance of hotels to generating economic benefit from growth in tourism and satisfying the main sources of demand for accommodation. The study identified a theoretical requirement for 4,000 new hotel rooms in Edinburgh by 2015 to help meet predicted growth in demand. The city centre is the preferred location for most visitors, but accessible locations with good public transport accessibility within the urban area also offer opportunities for new hotel development.
5 Housing and Community Facilities

Edinburgh needs more housing to provide homes for an increasing population and support economic growth. More housing increases the need for community facilities such as schools, health care facilities and community centres in easily accessible locations. This plan looks beyond the amount of housing to be provided. It also aims to address issues of quality, affordability, environmental quality in existing housing areas and the housing needs of particular groups such as students, gypsies, travellers and travelling showpeople. Policies Hou 1 – Hou 10 will be used to assess planning applications to meet the following objectives:

Objectives

• To meet the requirement for additional housing in Edinburgh whilst protecting environmental quality in established housing areas
• To promote more sustainable, better balanced communities
• To ensure that provision is made for necessary community facilities

Policy Hou 1 Housing Development

1 Priority will be given to the delivery of the housing land supply and the relevant infrastructure* as detailed in Part 1 Section 5 of the Plan including:

a) sites allocated in this plan through tables 3 and 4 and as shown on the proposals map
b) as part of business led mixed use proposal at Edinburgh Park/South Gyle
c) as part of the mixed use regeneration proposals at Edinburgh Waterfront (Proposals EW1a-EW1c and EW2a-2d and in the City Centre)
d) on other suitable sites in the urban area, provided proposals are compatible with other policies in the plan

2 Where a deficit in the maintenance of the five year housing land supply is identified (as evidenced through the housing land audit) greenfield/greenbelt housing proposals may be granted planning permission where:

a) The development will be in keeping with the character of the settlement and the local area
b) The development will not undermine green belt objectives
c) Any additional infrastructure required* as a result of the development and to take account of its cumulative impact, including cross boundary impacts, is either available or can be provided at the appropriate time.
d) The site is effective or capable of becoming effective in the relevant timeframe.
Part 2 - Section 5 - Housing and Community Facilities

e) The proposal contributes to the principles of sustainable development.

* This should be addressed in the context of Policy Del 1, Tra 8 and the associated Supplementary Guidance.

Policy Hou 1 reflects the emphasis on delivery of the identified land supply. However, it also sets out a mechanism through which to bring forward additional land if a 5 year supply is not maintained. The criteria which apply reflect the considerations already established through SESplan (Policy 7) as well as the Scottish Planning Policy presumption in favour of sustainable development. Whilst the green belt is established by the plan this should not automatically preclude housing development where the relevant balance of considerations points to approval and the objectives of the city wide designation of green belt are maintained.

Policy Hou 2 Housing Mix

The Council will seek the provision of a mix of house types and sizes where practical, to meet a range of housing needs, including those of families, older people and people with special needs, and having regard to the character of the surrounding area and its accessibility.

It is important to achieve a good mix of dwelling types and sizes to avoid the creation of large areas of housing with similar characteristics. This approach supports more socially diverse and inclusive communities by offering a choice of housing and a range of house types to meet the needs of different population groups, from single-person households to larger and growing families.

Policy Hou 3 Private Green Space in Housing Development

Planning permission will be granted for development which makes adequate provision for green space to meet the needs of future residents.

In flatted or mixed housing/flatted developments where communal provision will be necessary, this will be based on a standard of 10 square metres per flat (excluding any units which are to be provided with private gardens). A minimum of 20% of total site area should be useable greenspace.

For housing developments with private gardens, a contribution towards the greenspace network will be negotiated if appropriate, having regard to the scale of development proposed and the opportunities of the site.

This policy ensures an appropriate level of greenspace provision in new housing developments.

This policy applies to mainstream housing, whether flatted or otherwise. All mainstream housing should be provided with either individual private gardens or communal areas of greenspace, or a combination of both. In some sites, some of the greenspace provision should be in the form of publicly accessible space to connect with the wider network. The site briefs for the new strategic housing proposals in West and South East Edinburgh show this type of provision.

The Council expects most housing development to meet these greenspace requirements in full within the site. However exceptions may be justifiable if there are good reasons why this cannot happen, for example where justified by the following policy on density. The Council’s Open Space Strategy sets standards for publicly-accessible large and local greenspace and play space and identifies actions to address any deficiencies or meet other needs. A proposal which does not meet the full requirements of policy Hou 3 on-site may be supported if appropriate provision or financial contribution is made to implement an identified action in the Open Space Strategy which will address a deficiency in the area.

The policy does not apply to housing built for occupation by particular groups such as students or the elderly. In these circumstances, provision appropriate to their particular needs will be negotiated.
Policy Hou 4 Housing Density

The Council will seek an appropriate density of development on each site having regard to:

a) its characteristics and those of the surrounding area
b) the need to create an attractive residential environment and safeguard living conditions within the development
c) the accessibility of the site includes access to public transport
d) the need to encourage and support the provision of local facilities necessary to high quality urban living.

Higher densities will be appropriate within the City Centre and other areas where a good level of public transport accessibility exists or is to be provided. In established residential areas, proposals will not be permitted which would result in unacceptable damage to local character, environmental quality or residential amenity.

228 The aim of this policy is to promote an appropriate density of development, taking account of site characteristics and location. There are many benefits of higher density development – it makes efficient use of urban land, helps maintain the vitality and viability of local services and encourages the effective provision of public transport. However higher densities are not always appropriate. Particular care will be taken in established residential areas to avoid inappropriate densities.

Policy Hou 5 Conversion to Housing

Planning permission will be granted for the change of use of existing buildings in non-residential use to housing, provided:

a) a satisfactory residential environment can be achieved
b) housing would be compatible with nearby uses
c) appropriate open space, amenity and car and cycle parking standards are met
d) the change of use is acceptable having regard to other policies in this plan including those that seek to safeguard or provide for important or vulnerable uses.

229 A significant contribution to housing needs has been made over the years by the conversion of redundant commercial buildings to housing. This has included office buildings in the New Town which were originally houses, warehouses in Leith and vacant hospital and school buildings. The recycling of buildings achieves sustainability goals and provides the essential means by which the historic character of different localities can be maintained. It can help to create the high density, mixed use environments which are appropriate for central sites. It is an objective of the Plan to resist the conversion of empty shop units to residential use, and to safeguard these for shopping and small business use (see Policy Ret 10). However, conversions to residential use could be supported where the shop unit has been vacant for a significant period of time and been actively marketed, where there is local need and demand for a range of housing types and for town centre living.
Policy Hou 6 Affordable Housing

Planning permission for residential development, including conversions, consisting of 12 or more units should include provision for affordable housing amounting to 25% of the total number of units proposed. For proposals of 20 or more dwellings, the provision should normally be on-site. Whenever practical, the affordable housing should be integrated with the market housing.

230 Government policy states that where a shortage of affordable housing has been identified, this may be a material consideration for planning and should be addressed through local development plans.

231 Affordable housing is defined as housing that is available for rent or for sale to meet the needs of people who cannot afford to buy or rent the housing generally available on the open market. Affordable housing is important in ensuring that key workers can afford to live in the city as well as helping meet the needs of people on low incomes.

232 A key aim is that affordable housing should be integrated with market housing on the same site and should address the full range of housing need, including family housing where appropriate. Provision on an alternative site may be acceptable where the housing proposal is for less than 20 units or if there are exceptional circumstances. Where planning permission is sought for specialist housing an affordable housing contribution may not always be required depending on the nature of the specialist housing being proposed and economic viability considerations.

233 Further information on affordable housing requirements is provided in planning guidance. The details of provision, which will reflect housing need and individual site suitability, will be a matter for agreement between the developer and the Council.

Policy Hou 7 Inappropriate Uses in Residential Areas

Developments, including changes of use, which would have a materially detrimental effect on the living conditions of nearby residents, will not be permitted.

234 The intention of the policy is firstly, to preclude the introduction or intensification of non-residential uses incompatible with predominantly residential areas and secondly, to prevent any further deterioration in living conditions in more mixed use areas which nevertheless have important residential functions. This policy will be used to assess proposals for the conversion of a house or flat to a House in Multiple Occupation (i.e. for five or more people). Further advice is set out in Council Guidance.

Policy Hou 8 Student Accommodation

Planning permission will be granted for purpose-built student accommodation where:

a) The location is appropriate in terms of access to university and college facilities by walking, cycling or public transport

b) The proposal will not result in an excessive concentration of student accommodation (including that in the private rented sector) to an extent that would be detrimental to the maintenance of balanced communities or to the established character and residential amenity of the locality.

235 It is preferable in principle that student needs are met as far as possible in purpose-built and managed schemes rather than the widespread conversion of family
housing. Increasing the amount of purpose-built student accommodation assists the growth of the universities and the attractiveness of the city as a centre for Higher Education. In general such provision can take place at relatively high densities. Open space and car parking provision can be tailored to reflect the nature of the proposed use. However these considerations should not compromise design quality.

236 Developments should be close to the universities and colleges and accessible by public transport. In assessing the degree of concentration of student accommodation, the Council will take into account the nature of the locality in terms of mix of land use and housing types, the existing and proposed number of students in the locality. Further advice is provided in Council guidance.

Policy Hou 9 Sites for Gypsies, Travellers and Travelling Showpeople

The development of a site for caravans for gypsies, travellers and/or travelling showpeople will be permitted provided:

a) it has been demonstrated that a site is needed in the location proposed
b) the site would not detract from the character and appearance of the area
c) the site would not detract from the amenity currently enjoyed by residents in the area
d) the site can be adequately screened and secured and provided with essential services
e) it has been demonstrated that the site will be properly managed.

238 To support the provision of a site or sites in appropriate locations for gypsies, travellers and travelling showpeople to meet their needs and help avoid the illegal and unmanaged use of land for this purpose, or the overnight parking of vehicles on roadside verges. There is a commitment to working in consultation with the gypsy and travelling community to identify an appropriate site(s) in the context of this policy.

Policy Hou 10 Community Facilities

Planning permission for housing development will only be granted where there are associated proposals to provide any necessary health and other community facilities relative to the impact and scale of development proposed. Development involving the loss of valuable health or other community facilities will not be allowed, unless appropriate alternative provision is to be made.

238 The intention of this policy is to ensure that new housing development goes hand in hand with the provision of a range of community facilities when this is practicable and reasonable, such as the development planned for regeneration areas. Facilities such as local doctor and dental surgeries, local shops, community halls and meeting rooms are necessary to foster community life. Equally, the Council will seek to retain facilities of proven value, if threatened by redevelopment proposals without prospect of replacement.
6 Shopping and Leisure

239 This section focuses on the important role of town, local and other centres in providing shopping, entertainment, places to eat and drink and local services in accessible locations. Centres which provide a strong mix of uses and a focal point for local residents contribute to creating and maintaining sustainable communities.

Objectives

- To sustain and enhance the city centre as the regional focus for shopping, entertainment, commercial leisure and tourism related activities and encourage appropriate development of the highest quality
- To maintain the existing and proposed broad distribution of centres throughout the city and sustain their vitality and viability
- To ensure that some basic convenience provision is made or retained within walking distance of all homes
- To improve the appearance, quality and attractiveness of all centres

New Retail Development

240 In line with national and strategic planning policy, Policies Ret 1 – Ret 6 apply a sequential approach to the identification of preferred locations for new retail development. They provide policy guidance to assist the assessment of proposals for retail development at different locations throughout the plan area - the City Centre Retail Core, town centres, commercial centres, local centres and out-of-centre locations (see Table 6 in Part 1).

Policy Ret 1 Town Centres First Policy

Planning permission will be granted for retail and other uses which generate a significant footfall including commercial leisure use, offices, community and cultural facilities and where appropriate libraries, education and healthcare facilities following a town centre first sequential approach in the following order of preference:

- Town centres (including city and local centres)
- Edge of town centre
- Other commercial centres as identified in the plan
- Out of centre locations that are or can be made accessible by a choice of transport modes

Where a retail or leisure development with a gross floorspace over 2,500sq.m. or occasionally for smaller proposals, if proposed outwith a town centre and contrary to the development plan, a retail impact analysis will be required sufficient to demonstrate that there is no significant adverse effect on the vitality and viability of existing town centres. Town and local centres within adjoining council areas will also be considered when assessing retail impact if they fall within the intended catchment area of the proposal.
City Centre Retail Core

Policy Ret 2 City Centre Retail Core

Planning permission for retail development in the city centre retail core will be granted having regard to the following considerations:

a) whether the proposal will provide high quality, commercially attractive units to a high standard of design that will strengthen the role of Edinburgh as a regional shopping centre, safeguard historic character and improve the appearance of the city centre

b) whether the proposal will reinforce the retail vitality of the shopping streets in the retail core

c) whether the proposal has paid special attention to upper floors if not to be used for retail purposes, and how these may be put to, or brought into beneficial use which will enhance city centre character

d) whether the proposal will help to create a safe and attractive pedestrian environment, safeguard historic character and improve the appearance of the city centre including the public realm.

Planning permission will be granted for retail development on sites which adjoin or can form an effective extension to the city centre retail core if it is clear that no suitable sites are available within the city centre retail core, and subject to considerations a) to d) above.

241  This policy supports proposals for additional retailing floorspace in or adjacent to the city centre retail core. It recognises that the success of this regional shopping centre depends not just on the quantity and quality of shopping facilities but also the appearance of the shopping environment taking account of its historic character and ease of movement, by pedestrians in particular.

242  A number of non-statutory planning documents have been prepared to guide development proposals in the city centre retail core and will be a material consideration in the determination of planning applications. These identify key issues which retail development proposals should address, for example encouraging a mix of uses on upper floors, promoting evening activity, providing flexible retail floorplates and enhancing public realm.

Town Centres

Policy Ret 3 Town Centres

Planning permission will be granted for retail development within a town centre, where it has been demonstrated that:

a) there will be no significant adverse effects on the vitality and viability of the city centre retail core or any other town centre

b) the proposal is for a development that will be integrated satisfactorily into the centre and will help to maintain a compact centre

c) the proposal is compatible, in terms of scale and type, with the character and function of the centre

d) the proposal will reinforce the retail vitality and improve the appearance, including public realm

e) or can form an effective extension to the centre by promoting linked trips with safe and easy access to the town centre, where it is clear the proposal will help to improve the accessibility of the centre for all transport modes.

Planning permission will be granted for retail development on sites which adjoin the boundary of a town centre or can form an effective extension to the centre, and if it is clear that no suitable sites are available within the town centre itself, and subject to considerations a) to e) above.
This policy applies to the following eight town centres – Corstorphine, Gorgie/Dalry, Leith/Leith Walk, Morningside/Bruntsfield, Nicolson Street/Clerk Street, Portobello, Stockbridge and Tollcross. The boundaries of each centre are shown on the Proposals Map and will be kept under review. Boundary changes may be recommended through the preparation of supplementary guidance.

This policy supports proposals for retail development in or adjacent to Edinburgh's eight town centres in recognition of their important role in providing shopping and services in locations well served by public transport. Development opportunities are seldom available within town centres, especially to meet the requirements of larger stores, and are more likely to arise on edge of town centre sites. Edge of centre development should benefit rather than compete with the town centre. Such proposals will need to demonstrate how the development integrates with the existing centre in terms of appearance and pedestrian connections.

### Commercial Centres

#### Policy Ret 4 Commercial Centres

Proposals for additional retail floorspace in a Commercial Centre (see Table 6 and Proposals Map) will not be supported unless it can be demonstrated that:

a) the proposal will address a quantitative or qualitative deficiency within its catchment area, and will be restricted to a scale which makes good this deficiency

b) all potential town centre and edge of town centre options (including the city centre retail core) have been thoroughly assessed and can be discounted as unsuitable or unavailable

c) the proposal will not have significant adverse individual or cumulative impacts on any other town, local or commercial centre and, in particular, will not impact adversely on the strategy and objectives for enhancing the vitality and retail attractiveness of the city centre retail core

d) the scale, format and type of development proposed is compatible with the future role of the centre as defined in relevant planning consents and outlined in Table 7.

e) the proposal will assist in making the centre more accessible by public transport, walking and cycling, contribute to less car travel, and will improve the appearance and environment of the centre.

Policy Ret 4 covers seven commercial centres in Edinburgh – Cameron Toll, Craigleith, Hermiston Gait, Meadowbank, Newcraighall/The Jewel (which includes Fort Kinnaird retail park and an Asda superstore) Ocean Terminal and The Gyle. The purpose of this policy is to indicate the circumstances in which additional retail floorspace in a commercial centre will be supported.

The plan supports and values the role of the commercial centres in providing shopping and leisure facilities. However, within a context of the economic downturn and anticipated decline in retail spending, there is not expected to be any significant gap in retail floorspace provision in the LDP period to justify expansion of any of the commercial centres.

The effect of this policy is to complement policies Ret 2 and Ret 3 by directing any new retail development to the city or town centres in the first instance. This approach will help support the role of the city centre and town centres and promote investor confidence in these locations.

Where there may be an opportunity for a centre to continue to evolve to meet the needs of the population it serves, this is indicated in Table 7 Commercial Centres.

### Local Centres

#### Policy Ret 5 Local Centres

Planning permission for retail development in or on the edge of a local centre will be
permitted provided the proposal:

a) can be satisfactorily integrated into the centre
b) is compatible, in terms of scale and type, with the character and function of the centre
c) makes a positive contribution to the shopping environment and appearance of the centre
d) would not have a significant adverse impact on the city centre retail core or any town or local centre
e) is easily accessible by public transport, foot and cycle.

Proposals for non-retail development in a local centre which would have a detrimental impact on the function of the centre will not be permitted.

249 This policy applies to the local centres listed in Table 6 in Part 1 Section 3 and in Appendix B. It supports new retailing development of an appropriate scale and type in local centres and protects local centres from development which would threaten their future existence or undermine their role. 'Edge of local centre' will only apply to sites physically adjoining the existing boundary of the centre. This policy also protects the network of existing local centres as these help contribute to the overall LDP objective relating to sustainable communities and quality of life.

Out-of-Centre Development

250 New retail development should be in locations which can be easily accessed on foot, by cycle and by public transport as well as by car and preferably in close proximity to other local services and community facilities to allow linked trips. This helps explain why existing and proposed centres are the preferred locations for new retail development. Policy Ret 6 will be used to assess proposals for retail development in out-of-centre locations.

Policy Ret 6 Out-of-Centre Development

Proposals for retail development in an out-of-centre location will only be permitted provided it has been demonstrated that:

a) the proposal will address a quantitative or qualitative deficiency or will meet the needs of an expanding residential or working population within its catchment area
b) all potential sites, either within or on the edge of an identified centre (see Table 6), have been assessed and can be discounted as unsuitable or unavailable
c) the proposal will not have a significant adverse effect, either individually or cumulatively with other developments, on the vitality and viability of any existing centre.
d) the site is or can be made easily accessible by a choice of transport modes and will reduce the length and overall number of shopping trips made by car.

251 This policy recognises that in exceptional circumstances, there may be retail proposals that can justify an out of centre location, for example smaller units to meet the needs of a growing population or where a gap in provision can be demonstrated. Proposals for non-local provision, for example a free-standing retail warehouse which would trade over a wide area and provide essentially for car-borne shopping, would not be acceptable in terms of this policy.

252 There are benefits in providing small scale, convenience stores (up to 250sq.m. gross floorspace) in locations easily accessible on foot or by cycle. These will complement the role of the identified centres and therefore for such proposals it is not necessary to demonstrate that there is no site suitable and available in or adjacent to an identified centre (criterion b) in Policy Ret 6). The other requirements of Policy Ret 6 do need to be satisfied. This will allow, for example, large scale housing proposals to include local shopping facilities to serve new residents. This will also help meet create more sustainable communities, one of the overall objectives of the plan.
Entertainment and Leisure Uses

253 Policies Ret 7 and Ret 8 apply a sequential approach to the location of entertainment and leisure uses such as cinemas, theatres, restaurants, night clubs, ten pin bowling, bingo halls and soft play centres. These policies will also be applied to proposals for visitor attractions supporting Edinburgh’s role as a major tourist destination and cultural centre of international importance.

254 The preferred locations for entertainment and leisure development are the City Centre (as shown on the Proposals Map), the eight nine town centres and as part of mixed use regeneration proposals at Leith Waterfront and Granton Waterfront.

Policy Ret 7 Entertainment and Leisure Developments - Preferred Locations

Planning permission will be granted for high quality, well designed arts, leisure and entertainment facilities and visitor attractions in the City Centre, at Leith and Granton Waterfront and in a town centre, provided:

- the proposal can be integrated satisfactorily into its surroundings with attractive frontages to a high quality of design that safeguards existing character
- the proposal is compatible with surrounding uses and will not lead to a significant increase in noise, disturbance and on-street activity at unsocial hours to the detriment of living conditions for nearby residents
- the development will be easily accessible by public transport, foot and cycle.

255 The purpose of this policy is to identify the preferred locations for entertainment and leisure development and to ensure that such proposals make a positive contribution in terms of the type of use and quality of design, are in accessible locations and do not introduce unacceptable noise and late night disturbance.

256 The City Centre has a mixed use character and provides a wide range of leisure uses, arts and cultural establishments and pubs and restaurants. Whilst recognising the importance of such uses to the local and national economy, the policy takes account of potential impact on the environment and local residents.

257 Entertainment and leisure uses will be a key component of the major regeneration proposals at Leith Waterfront and Granton Waterfront and are also appropriate in town centres, contributing to the diversity and vitality.

Policy Ret 8 Entertainment and Leisure Developments – Other Locations

Planning permission will be granted for entertainment and leisure developments in other locations provided:

- all potential City Centre, or town centre options have been thoroughly assessed and can be discounted as unsuitable or unavailable
- the site is or will be made easily accessible by a choice of means of transport and not lead to an unacceptable increase in traffic locally
- the proposal can be integrated satisfactorily into its surroundings with attractive frontages to a high quality of design that safeguards existing character
- the proposal is compatible with surrounding uses and will not lead to a significant increase in noise, disturbance and on-street activity at unsocial hours to the detriment of living conditions for nearby residents.

258 This policy sets out criteria for assessing proposals for entertainment and leisure developments in other locations, such as commercial centres, local centres and elsewhere in the urban area. Key considerations include accessibility by public transport, design quality and impact on the character of the area and local residents.
Alternative Use of Shop Units

Policy Ret 9 Alternative Use of Shop Units in Defined Centres

In the City Centre Retail Core and town centres, change of use proposals which would undermine the retailing function of the centre will not be permitted. Detailed criteria for assessing proposals for the change of use of a shop unit to a non-shop use will be set out in supplementary guidance. Supplementary Guidance will detail an approach tailored to different parts of the city centre retail core and each town centre to be informed by town centre health checks which will assess the centres strengths, vitality and viability, weaknesses and resiliencies.

The change of use of a shop unit in a local centre to a non-shop use will be permitted provided:

a) the change of use would not result in four or more consecutive non-shop uses and;

b) the proposal is for an appropriate commercial, community or business use, which would complement the character of the centre and would not be detrimental to its vitality and viability.

This plan aims to protect the important retailing function of defined centres but recognises the benefits of a wide range of complementary service, leisure and other community uses. The right mix of shopping and other uses will vary in the different centres and in the case of the city and town centres, in different parts of the centre. The policy applies to ground floor units only or basement/first floor units that are directly accessed from the pavement.

Within the City Centre Retail Core, a strong, high quality retail offer is a key aspect of sustaining and enhancing the city centre and policies are required to ensure that shopping continues to be the predominant use. However in order to achieve a diverse, thriving and welcoming city, a more flexible approach to the introduction of complementary uses that support the main shopping function and encourage use into the evening is proposed. Supplementary guidance will be prepared to guide the mix of uses in different parts of the City Centre Retail Core and set out criteria for assessing proposals for uses other than shops.

Previous local plans incorporated a standard approach to change of use applications in town centres based on identifying primary frontages where there should be a greater proportion of units in shop use. However, each town centre is different in terms of the current mix of uses and how well it is meeting the needs of those who live, work and shop in the surrounding area. In order to take account of these differences, this plan proposes a tailored approach for each town centre. Separate supplementary guidance will be produced to guide change of use applications in each of the nine town centres. The supplementary guidance may also recommend changes to the town centre boundaries to be included in the next Local Development Plan.

The policy aims to avoid areas of ‘dead frontage’ and reduced pedestrian flow which would detract from the character and vitality of the centre by requiring that at least one unit in every four is in shop use. Beyond this requirement, the policy applies a flexible approach to change of use applications in local centres provided the use will be beneficial to the local community such as providing services, hot food or entertainment facilities. In local centres, former shop units may also be suitable for business use, providing a beneficial use for vacant properties and opportunities for small start up businesses and job creation close to where people live.

Policy Ret 10 Alternative Use of Shop Units in Other Locations

Outwith defined centres, planning applications for the change of use of a shop unit will be determined having regard to the following:
a) where the unit is located within a speciality shopping street (defined on the Proposals Map and in Appendix B), whether the proposal would be to the detriment of its special shopping character

b) where the unit is located within a predominantly commercial area, whether the proposal would be compatible with the character of the area

c) whether the proposal would result in the loss of premises suitable for small business use

d) whether there is a clear justification to retain the unit in shop use to meet local needs

e) where residential use is proposed, whether the development is acceptable in terms of external appearance and the standard of accommodation created.

The purpose of this policy is to guide proposals for change of use involving shop units not located within defined centres.

Independent and specialist retailers may be found in secondary locations throughout the city. But their concentration in some streets in the Old Town and on the fringes of the City Centre has given these a distinctive shopping character and interest worthy of protection. The defined speciality shopping streets are Cockburn Street; High Street (parts) Lawnmarket and Canongate; Victoria Street and West Bow, Grassmarket; Jeffrey Street and St Mary’s Street; Stafford Street, William Street and Alva Street in the New Town. More detailed information on the frontages to which Policy Ret 10 applies is provided in Appendix B.

In parts of the city, mainly the City Centre and Leith, there are concentrations of commercial uses including retail, food and drink, and entertainment uses which, although not fulfilling the role of a local centre, do make a positive contribution to the vibrancy of the city. Proposals incompatible with the commercial character of such areas will be resisted.

Single convenience shops and parades of small shops play an important role in meeting neighbourhood shopping needs and creating a sense of community, particularly in areas not well served by the network of shopping centres. It may be necessary to resist the loss of shop units to ensure local needs, particularly for people without access to car, are met.

The Council’s Guidance for Business provides advice on relevant design and amenity considerations for the conversion of shop units to residential use.

Policy Ret 11 Food and Drink Establishments

The change of use of a shop unit or other premises to a licensed or unlicensed restaurant, café, pub, or shop selling hot food for consumption off the premises (hot food take-away) will not be permitted:

a) if likely to lead to an unacceptable increase in noise, disturbance, on-street activity or anti-social behaviour to the detriment of living conditions for nearby residents or

b) in an area where there is considered to be an excessive concentration of such uses to the detriment of living conditions for nearby residents.

The provision of food and drink establishments in areas where people live is a recognisable component of urban living. However, such uses can cause a number of problems for local residents. Particular care will be taken to prevent an excessive concentration of hot food shops, pubs and bars in areas of mixed but essentially residential character. The Council’s Guidance for Businesses identifies sensitive areas in this regard namely Tollcross, Grassmarket, Nicolson/Clerk Street and Broughton Place/Picardy Place and their environs.
Transport

The relationship between land uses and how people move between them is fundamental in promoting sustainable development. The policies in this section complement the Council’s Local Transport Strategy.

Objectives

- To minimise the distances people need to travel
- To promote and prioritise travel by sustainable means i.e. walking, cycling and by public transport.
- To minimise the detrimental effects of traffic and parking on communities and the environment
- To ensure that development does not prejudice the implementation of future road, public transport and cycle and footpath proposals.

Transport and New Development

All planning applications involving the generation of person-trips should provide information on the demands that will be made on the road network and transport system. A comprehensive Transport Assessment must be submitted with planning applications for proposals generating a significant amount of travel or in particularly traffic sensitive locations. The aim of an assessment is to ensure maximum feasible sustainable transport access to a development. It should include a prediction of the number of trips likely to be made to the development and the modal split, together with details of measures to improve or maximise access by public transport, walking and cycling and minimise and deal with impacts of car journeys associated with the proposal. The Assessment should include a reference to traffic reduction and mode share targets set out in the Local Transport Strategy, the LDP Transport Appraisal and other relevant transport studies current at the time of application. Where appropriate, Policy Del 1 will be used to secure developer contributions towards transport interventions necessary to mitigate the effects of development or meet sustainable travel targets.

Policy Tra 1 Location of Major Travel Generating Development

Planning permission for major development which would generate significant travel demand will be permitted on suitable sites in the City Centre. Where a non City Centre site is proposed, the suitability of a proposal will be assessed having regard to:

a) the accessibility of the site by modes other than the car
b) the contribution the proposal makes to Local Transport Strategy objectives and the effect on targets in respect of overall travel patterns and car use
c) impact of any travel demand generated by the new development on the existing road and public transport networks.

In general, applicants should demonstrate that the location proposed is suitable with regard to access by walking, cycling and public transport and that measures will be
taken to mitigate any adverse effects on networks and bring accessibility by and use of non-car modes up to acceptable levels if necessary.

271 The policy applies to major offices, retail, entertainment, sport and leisure uses and other non-residential developments which generate a large number of journeys by employees and other visitors. These developments should be accessible by a choice of means of transport which offer real alternatives to the car. For this reason, a location in the City Centre will normally be preferable. Major travel generating developments will also be encouraged to locate in the identified town centres and employment centres, provided that the scale and nature of the development is such that it can be reached conveniently by a majority of the population in its catchment area by walking, cycling or frequent public transport services.

272 Out-of-centre development will only be acceptable where it can clearly be demonstrated that the location is suitable, and that access by sustainable forms of transport and car parking provision and pricing mean that the development will be no more reliant on car use than a town centre location. This means that good public transport, walking and cycling accessibility will still need to be assured.

273 Applications should be accompanied by travel plans to demonstrate how development, particularly in out of centre locations, will meet the requirements of Policy Tra 1. Travel plans should accord with Scottish Government guidance and will be monitored to assess their impact on reducing demand for car travel and maximising use of existing and new transport infrastructure. Travel plans may also be relevant when assessing residential applications in terms of Policy Hou 4 Housing Density or Policy Tra 2 Private Car Parking.

Car and Cycle Parking

Policy Tra 2 Private Car Parking

Planning permission will be granted for development where proposed car parking provision complies with and does not exceed the parking levels set out in Council guidance. Lower provision will be pursued subject to consideration of the following factors:

a) whether, in the case of non-residential developments, the applicant has demonstrated through a travel plan that practical measures can be undertaken to significantly reduce the use of private cars to travel to and from the site

b) whether there will be any adverse impact on the amenity of neighbouring occupiers, particularly residential occupiers through on-street parking around the site and whether any adverse impacts can be mitigated through control of on-street parking

c) the accessibility of the site to public transport stops on routes well served by public transport, and to shops, schools and centres of employment by foot, cycle and public transport

d) the availability of existing off-street parking spaces that could adequately cater for the proposed development

e) whether the characteristics of the proposed use are such that car ownership and use by potential occupiers will be low, such as purpose-built sheltered or student housing and ‘car free’ or ‘car reduced’ housing developments and others providing car sharing arrangements

f) whether complementary measures can be put in place to make it more convenient for residents not to own a car, for example car sharing or pooling arrangements, including access to the city’s car club scheme.
The purpose of this policy is to ensure car parking provided as part of development proposals accords with the Council standards which are tailored to local circumstances, including location, public transport accessibility and economic needs, but generally fulfil the wider strategy of encouraging sustainable, non-car modes. The standards express the maximum amount of car parking that different types of development may provide.

The policy sets out the circumstances in which a lesser amount of car parking than the standards require may be appropriate to help reduce car use. This is only likely to be acceptable in locations where there are existing or planned on-street parking controls.

At least half the space saved by omitting or reducing car parking should be given over to landscape features and additional private open space (see Policy Hou 3), so that residents will have the amenity benefits of a car-free environment.

Policy Tra 3 Private Cycle Parking
Planning permission will be granted for development where proposed cycle parking and storage provision complies with the standards set out in Council guidance.

The provision of adequate cycle parking and storage facilities is important in meeting the objective of the Local Transport Strategy to increase the proportion of journeys made by bicycle. The Council’s parking standards set out the required levels of provision of cycle parking and storage facilities in housing developments and a range of non-residential developments.

Policy Tra 4 Design of Off-Street Car and Cycle Parking
Where off–street car parking provision is required or considered to be acceptable, the following design considerations will be taken into account:

a) surface car parks should not be located in front of buildings where the building would otherwise create an active frontage onto a public space or street, and main entrances to buildings should be located as close as practical to the main site entrance
b) car parking should preferably be provided at basement level within a building and not at ground or street level where this would be at the expense of an active frontage onto a public street, public space or private open space
c) the design of surface car parks should include structural planting to minimise visual impact
d) the design of surface car parking or entrances to car parking in buildings should not compromise pedestrian safety and should assist their safe movement to and from parked cars, for example, by the provision of marked walkways.
e) Space should be provided for small-scale community recycling facilities in the car parking area in appropriate development, such as large retail developments.

Cycle parking should be provided closer to building entrances than general car parking spaces and be designed in accordance with the standards set out in Council guidance.

This policy sets out important design considerations for car and cycle parking provision including environmental quality, pedestrian safety and security. Poorly located or designed car parking can detract from the visual appearance and vitality of the surrounding area. Car parking in front of supermarkets which widely separates entrances from main roads, is an added discouragement to public transport use and walking, and detracts from urban vitality and safety. A high standard of design for surface car parking will be sought, with landscaping to soften its visual impact, and in larger car parks the provision of marked walkways for ease of pedestrian movement and safety. New off-street car parking provides an opportunity to expand the city’s network of small recycling points to complement larger community recycling centres. Provision of well located high quality cycle parking suitable to the type of development and to users is an essential component of the Council’s efforts to encourage cycling.
Policy Tra 5  City Centre Public Parking

Planning permission will be granted for well-designed, short-stay, public off-street car parks at suitable locations in the City Centre to meet the needs of shoppers and leisure visitors, provided there will be no adverse effects for the historic environment.

Additional purpose-built off-street car parking can be justified in the city centre, to meet the needs of shoppers and leisure visitors primarily, to boost the city centre’s shopping functions and enable it to compete more effectively with other shopping centres. Off-street car parking provision is also to be preferred to the wide-spread use of streets in the city centre for parking; it is less visible and obtrusive and could enable pavements to be widened. The west and north-west edges of the city centre retail core have in particular been identified as areas where short- and medium-stay public off-street parking would be beneficial and reduce the amount of traffic circulating and seeking spaces to park. However, the location and design of built car parks in Edinburgh city centre’s historic environment is challenging. New off street car parks should include provision for motorcycles and cycles.

Policy Tra 6  Park and Ride

Park and ride facilities will be permitted on sites closely related to public transport corridors and railway stations provided visual impacts can be mitigated through careful design and landscaping.

Safe, convenient and secure park and ride facilities linked to efficient public transport services can help reduce congestion. Planning permission has been granted for an extension to the park and ride facilities at Hermiston. This policy sets out criteria which will be used to assess proposals for any additional new park and ride facilities. Where a green belt location can be justified to meet transport objectives, the Council will minimise any adverse effects on landscape setting through careful siting, design and landscaping.

Transport Proposals and Safeguards

The LDP identifies a number of transport proposals and safeguards. These are shown on the Proposals Map with details set out in Table 9 in Part 1. These proposals relate to the significant known transport infrastructure which is required to accommodate new development (and in particular housing development) proposed in the local development plan, and where land needs to be safeguarded by the plan in order to allow the transport interventions to take place. In addition, other more local potential transport interventions relating to specific development proposals are set out within the development principles and site briefs for these proposals, and these are generally intended to inform the master plan process for the particular development proposals concerned. Policy Tra 8 below ensures that development proposals address these transport interventions.

Policy Tra 7 Public Transport Proposals and Safeguards

Planning permission will not be granted for development which would prejudice the implementation of the public transport proposals and safeguards listed in Table 9 and shown indicatively on the Proposals Map.

To ensure that development proposals take account of committed and potential public transport proposals. These are required to reduce reliance on travel by private car and help meet climate change targets and sustainable development objectives.

Policy Tra 8 Provision of Transport Infrastructure

Development proposals relating to major housing or other development sites, and which would generate a significant amount of traffic, shall demonstrate through an appropriate transport assessment and proposed mitigation that:

a) Identified local and city wide individual and cumulative transport impacts can be timeously addressed in so far as this is relevant and necessary for the proposal.
b) Any required transport infrastructure in Table 9 and in the general and site specific development principles has been addressed as relevant to the proposal.

c) The overall cumulative impact of development proposals throughout the SESplan area (including development proposals in West Lothian, East Lothian and Midlothian) has been taken into account in so far as relevant to the proposal. Assessment should draw on the findings of the Cumulative Impact Transport and Land Use Appraisal Working Group once these become available.

283 The approach to the delivery of the required transport infrastructure is set out in Policy Del 1 (Developer Contributions and Infrastructure Delivery), and will be detailed within the Supplementary Guidance required through the policy.

284 Policy 8 of the SDP requires local development plans to take into account the cross boundary transport implications of all policies and proposals. Policy 9 of the SDP requires local development plans to provide policy guidance that will require sufficient infrastructure to be available, or its provision to be committed, before development can proceed, and pursue the delivery of infrastructure through developer contributions, funding from infrastructure providers or other appropriate means.

285 The proposals in Table 9 and transport interventions in the development principles and site briefs take into account the cumulative impact of development proposals within the Edinburgh Local Development Plan as far as known at this time. However, further assessment is required to inform the detail of the necessary transport proposals and other interventions. In addition, the effects of development elsewhere within the city region are being considered within the study by the Cumulative Impact Transport and Land Use Appraisal Working Group, which is led by Transport Scotland and involves the constituent authorities within the SESplan area.

286 The outcome of this study will inform local development plans about the cumulative effect of development on major roads within the city region, including the M9, M8/ A8, A720 (city bypass) and A1. Transport Scotland has identified potential transport improvements to the trunk road network which are detailed in the plan through the general development principles.

287 The Supplementary Guidance proposed through Policy Del 1 will address the delivery of the infrastructure required for the strategy of the plan in accordance with the SDP. The Council will update its action programme annually in order to detail the actions required, those responsible and the relevant timescales.

288 It will also detail the need for further transport assessment to address cumulative impacts and the suitability of any proposed mitigation setting out a robust framework for assessment of development on sites allocated in the plan, and development which may separately come forward, including housing development on windfall sites progressed through Policy Hou 1. The guidance will take into account the findings of the cross boundary Cumulative Impact Transport and Land Use Appraisal Working Group. In the event that the findings of the Cumulative Impact Transport and Land Use Appraisal Working Group are not available when the guidance is being prepared the guidance will set out an interim approach to ensure these matters are taken into account pending further consideration in the next review of the Local Development Plan.

Policy Tra 9 Cycle and Footpath Network

Planning permission will not be granted for development which would:

a) prevent the implementation of proposed cycle paths/footpaths shown on the Proposals Map

b) be detrimental to a path which forms part of the core paths network or prejudice the continuity of the off-road network generally

c) obstruct or adversely affect a public right of way or other route with access rights unless satisfactory provision is made for its replacement
d) prejudice the possible incorporation of an abandoned railway alignment into the off-road path network

289 Encouragement of walking and cycling is at the heart of government and Council proposals to promote more sustainable travel improve health and provide equally for people who for whatever reason do not own a car. Edinburgh has an extensive, highly attractive and, in some parts, relatively well connected off-road network based on abandoned railway alignments, paths along river banks and the canal towpath. Many of these are included in the Council’s Core Paths Plan. In addition to existing well-established paths, the Core Paths Plan identifies opportunities for extensions and connections.

290 This policy ensures that development proposals do not obstruct or damage existing cycle paths and footpaths and other routes with access rights and do not prejudice the future implementation of potential additions or improvements to off-road routes across the city.

Policy Tra 10 New and Existing Roads

Planning permission will not be granted for development which would prejudice the proposed new roads and road network improvements listed in Table 9 and shown indicatively on the Proposals Map.

291 The Council does not generally support new road construction or road improvements aimed at increasing capacity on the road network. However in some cases roads proposals are necessary to mitigate the effects of development on the road network or to improve existing congestion levels. The details of planned new roads and improvements to the road network across the LDP area are set out in Table 9. This policy ensures that future development does not prejudice the implementation of these roads proposals.

Policy Tra 11 Rail Freight

Planning permission will not be granted for development which would prejudice the retention of viable freight transfer facilities at Seafield and Portobello.

292 There are rail freight transfer facilities at a limited number of locations in Edinburgh: Powderhall, Portobello and in Leith Waterfront. The Powderhall facility is used only for road-to-rail waste transfer. If this use stops, the site is safeguarded for other potential waste management roles. The re-designation of Leith Docks for industrial purposes assumes that a rail-sea freight transfer capability will be retained. Keeping a reduced general freight rail head to the east in Seafield will complement the safeguard for a waste management facility in that location (see Policy RS 3). It is also prudent to retain the rail freight capability at Portobello.

Policy Tra 12 Edinburgh Airport Public Safety Zones

Development will not be permitted within the Airport Public Safety Zones, as defined on the Proposals Map. This includes new or replacement houses, mobile homes, caravan sites or other residential buildings. Depending on the circumstances of individual proposals, the following types of development may be permitted as an exception to this general policy:

a) extensions and changes of use or

b) new or replacement development which would be associated with a low density of people living, working or congregating.

In assessing applications, the Council will take account of the detailed guidance and assessment criteria in Circular 8/2002: Control of Development in Public Safety Zones.

293 Public Safety Zones are identified at either end of Edinburgh Airport’s main runway. In these zones, special development restrictions apply to control the number of people on the ground at risk of death or injury in the event of an aircraft accident on take-off or landing.
8 Resources and Services

The following policies relate to development proposals for the use of natural resources or for provision of certain services. Policies protecting natural resources are in Section 2 – Caring for the Environment. The policy requiring carbon reduction measures and space for recycling in new development is in Section 1 – Design Principles.

Objectives

- To support appropriate energy generation and waste management development to help meet national targets
- To support the provision of other necessary resources and services: mineral extraction, water and drainage and telecommunications.

Sustainable Energy

Policy RS 1 Sustainable Energy

Planning permission will be granted for development of low and zero carbon energy schemes such as small-scale wind turbine generators, solar panels and combined heat and power/district heating/energy from waste plants and biomass/woodfuel energy systems provided the proposals:

a) do not cause significant harm to the local environment, including natural heritage interests and the character and appearance of listed buildings and conservation areas

b) will not unacceptably affect the amenity of neighbouring occupiers by reason of, for example, noise emission or visual dominance.

This policy is intended to support developments of appropriately sited and designed freestanding wind turbines. All wind turbine proposals will be assessed for their individual and cumulative effect on the landscape and biodiversity, taking account of other turbines proposals approved or proposed in the surrounding area. Given the importance of protecting the landscape setting of the city, it is unlikely that wind turbines located in the green belt will accord with Policy RS 1 and Policy Env 10.

Proposals to fit micro-generation equipment onto existing buildings will be assessed using the above policy and non-statutory guidance for householders.

Where development for energy from waste or biomass is proposed, the Council expects the opportunity for local reuse of heat energy to be explored. Where potential uses for such heat are firmly identified, the necessary connections should either be implemented or safeguarded. Such proposals will be assessed for their
impact on air quality using Policy Env 22. Supplementary Guidance will be prepared regarding heat mapping and consideration of the potential to establish district heating and/or cooling networks and associated opportunities for heat storage and energy centres - as well as regarding how implementation of such initiatives could best be supported.

**Waste**

**Policy RS 2 Safeguarding of Existing Waste Management Facilities**

Development in the area immediately surrounding an existing or safeguarded waste management facility (as identified on the Proposals Map) will only be allowed if it is demonstrated that there will be no adverse implications for the approved waste handling operations.

**Policy RS 3 Provision of New Waste Management Facilities**

Planning permission for new waste management facilities will be granted:

a) on the existing sites safeguarded through Policy RS 2

b) on land designated ‘Business and Industry’ on the Proposals Map

c) on other suitable sites within the urban area provided there will be no significant adverse impact on residential amenity or the environment

d) on operational or former quarries including those identified through Policy RS 5, provided the waste management operation would not sterilise the identified mineral extraction potential.

Seafield is designated EW 1d on the Proposals Map for a waste management facility incorporating thermal treatment with energy recovery. Other development proposals at Seafield will only be permitted if they do not adversely affect this waste management option.

**Policy RS 4 Waste Disposal Sites**

Planning permission for new landfill or land raise sites will not be granted. An exception may be made where it is demonstrated that there will be significant environmental benefits and no dis-benefits and the proposal will address an identified shortfall in landfill capacity established at the national or regional level.

298 Policy RS 2 continues the safeguarding of the existing three Community Recycling Centres (Craigmillar, Seafield, Sighthill) and Powderhall Waste Transfer Station. It also safeguards an existing waste management site at Braehead Quarry, off Craigs Road, where there is sufficient separation from the new housing proposed in this Plan. The policy also applies to development proposals in the immediate vicinity of the safeguarded sites and is intended to ensure that such development does not introduce conflict between uses, for example in terms of noise or air quality.

299 Policy RS 3 supports the principle of new facilities at those sites. Modern waste management facilities are highly controlled and can be similar in impact to general or light industrial processes. Many waste management facilities would be appropriate in locations designated for industrial or storage and distribution uses. Accordingly, Policy RS 3 continues to support new facilities in industrial areas and introduces the scope for low impact waste management uses on suitable sites elsewhere in the urban area. These may include a fourth community recycling centre.

300 Land at Seafield (identified as EW 1d) has unique locational advantages: it is sufficiently remote from housing areas; it has the benefit of rail access; and it has an outlet in nearby regeneration and potentially industrial uses for energy recovered after thermal treatment. Accordingly, it’s potential as a location for energy from waste and combined heat and power uses should be retained in any development proposals.

301 Policy RS 3 identifies quarries as opportunities to locate new waste management facilities which comply with the minerals policy below. This could be done by
establishing such facilities on a temporary basis or by siting and designing them in a way which does not sterilise the mineral resource or significantly constrain quarrying operations.

302 This Plan does not identify opportunities for the disposal of residual municipal waste or other forms of waste to landfill sites. It similarly opposes (through Policy RS 4) land raise operations unless there will be demonstrable benefits to the appearance of the environment and no harmful impacts and the need for additional relevant landfill capacity in the Plan area has been established at the national or regional level.

Minerals

Policy RS 5 Minerals

Planning permission will be granted for development to extract minerals from the quarries identified on the Proposals Map: Hillwood, Bonnington Mains, Ravelrig and Craigiehall Quarry. Development which would prevent or significantly constrain the potential to extract minerals from these sites with economically viable mineral deposits will not be allowed.

303 It is important to protect economically viable mineral deposits from sterilisation by permanent development. The only mineral resource within the area likely to be economically viable in the Plan period is hard rock. There are three operational quarries in the LDP area - Hillwood (dormant), Bonnington Mains and Ravelrig. The above policy is intended to protect that resource, and to ensure that new development does not introduce conflict which would prejudice mineral operations.

304 The Plan area also includes deposits of coal in the west and south east and small areas of peat in the south west. Proposals for their extraction will be assessed for their environmental and traffic impact using other policies in this Plan. An additional consideration, when assessing proposals affecting peat, is its role as a carbon sink.

Water Supply and Drainage

Policy RS 6 Water and Drainage

Planning permission will not be granted where there is an inadequate water supply or sewerage available to meet the demands of the development and necessary improvements cannot be provided.

305 Scottish Water has replaced the main storage and treatment facilities in Edinburgh, at Fairmilehead and Alnwickhill, with a new facility at Glencorse in Midlothian. Further, smaller scale, enhancements of the water supply and sewerage network may be needed to serve new development. For larger developments this will be identified and delivered as described in Policy Del 1.

Telecommunications

Policy RS 7 Telecommunications

Planning permission will be granted for telecommunications development provided:

a) the visual impact of the proposed development has been minimised through careful siting, design and, where appropriate, landscaping

b) it has been demonstrated that all practicable options and alternative sites have been considered, including the possibility of using existing masts, structures and buildings and/or site sharing

c) the proposal would not harm the built or natural heritage of the city.

306 The provision of new telecommunications infrastructure is essential to economic competitiveness. The telecommunications industry must be enabled to expand and diversify, but this must be undertaken sensitively and imaginatively, and with minimum environmental impact. Telecommunications equipment such as antennas, mobile phone masts and base stations can have a significant visual impact on the urban landscape.
impact in both urban and rural areas. Telecommunications operators are therefore required to demonstrate that all practicable options to minimise impact have been explored, and the best solution identified.

307 There will be a limited number of locations, including city landmarks such as Arthur's Seat and Salisbury Crags, where the impact of an installation cannot be satisfactorily minimised, and where it will therefore be unacceptable in principle. In other locations, individual proposals may be acceptable but where there is a concentration of these uses, consideration will be given to the cumulative visual impact. Conditions will be imposed on any consent, requiring the removal of any mast or apparatus and the reinstatement of a site to its former condition when it becomes redundant.

308 Edinburgh is one of ten UK cities to receive early delivery of high speed broadband and large areas of wireless connectivity in public areas. The latter will require installation of new equipment, some of which may require planning permission or conservation area / listed building consent. These will be assessed using the above policy if appropriate and a separate non-statutory guideline on telecommunications.

</tbody>
</table>
Appendix E - Glossary

ACTIVE FRONTAGE
Ground floor building frontage designed to allow people to see and walk inside and out.

AFFORDABLE HOUSING
Housing that is for sale or rent, to meet the identified needs of people who cannot afford to buy or rent housing generally available on the open market.

AIR QUALITY MANAGEMENT AREAS
Designated parts of the city where the Council considers that air quality objectives are unlikely to be achieved.

BIODIVERSITY
The variety of life on earth, both plant and animal species, commonplace and rare, and the habitats in which they are found.

BIODIVERSITY DUTY
A duty placed upon every public sector body and office-holder to further the conservation of biodiversity in line with the Scottish Biodiversity Strategy. [Introduced by the Nature Conservation (Scotland) Act 2004]

BROWNFIELD
Land which has been previously developed. The term includes derelict land and land occupied by redundant buildings.

BULKY GOODS
Goods of such a size that they could not normally be transported by customers traveling by foot, cycle or bus and therefore need to be carried away by car or delivered to customers, and which require large areas to display them.

BUSINESS USE
Class 4 of the Town and Country Planning (Use Classes) (Scotland) Order 1997 which includes general office, light industry or research and development which can be carried out without detriment to the amenity of any residential area.

COMMERCIAL CENTRES
Centres of strategic importance which have a more specific focus on shopping or shopping/leisure uses and do not have the diverse mix of uses found in town centres.

COMMUNITY
The term community includes individuals and groups, and can be based on location (for example people who live in, work in or use an area) or common interest (for example businesses, sports or heritage groups).

CONSERVATION AREA
An area designated under the Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997 as being of special architectural or historic interest, the character and interest of which it is desirable to preserve or enhance.
CORE PATHS
Under the terms of the Land Reform (Scotland) Act 2003, the Council has prepared a plan for a system of ‘core paths’ to give people reasonable access throughout their area for walking, cycling, horse riding and to inland water.

COUNCIL GUIDANCE
Guidance (other than that which is supplementary guidance), prepared, consulted on and approved by the Council on a range of planning matters. Council guidance will a material consideration in determining planning applications.

COUNTRYSIDE
References to the ‘Countryside’ (with a capital letter) relate specifically to the ‘Countryside Policy Area’ shown on the Proposals Map. References to ‘countryside’ relate to open land in the rural area and may include both ‘green belt’ and ‘Countryside Policy Area’

COUNTRYSIDE RECREATION
Passive or active outdoor recreational pursuits or land uses. This may involve very limited buildings, which do not, of themselves, disrupt the peace and tranquility of the countryside (or neighbouring urban area) or threaten the character and amenity of the landscape and its enjoyment by others.

DENSITY
The floorspace or number of dwellings in a development divided by its land area.

DEVELOPMENT BRIEF
A document approved by the Council providing guidance on how a specific site of significant size or sensitivity should be developed in line with the relevant planning and design policies. It will usually contain some indicative vision of future development form.

EFFECTIVE HOUSING LAND SUPPLY
Land identified for housing which is free or expected to be free of development constraints in the period up to 2026 and will therefore be available for the construction of housing.

EMPLOYMENT USE
Generally businesses, general industry or storage and distribution uses, each defined in the Town and Country Planning (Use Classes)(Scotland) Order 1997.

EUROPEAN LANDSCAPE CONVENTION
A treaty which promotes the protection, management and planning of European landscapes and organises European co-operation on landscape issues.

GREEN BELT
Land defined in adopted local plans or local development plans which protects and enhances the landscape setting and identity of Edinburgh and protects and gives access to open space around the city and smaller settlements.

GREENFIELD
Land which has not previously been developed, or fully-restored formerly derelict land which has been brought back into active or beneficial use for agriculture, forestry, environmental purposes, or outdoor recreation.

GREEN NETWORK
The linking together of natural, semi-natural and man-made open spaces to create an interconnected network that extends outwith the urban area and provides
recreational opportunities, improves accessibility and enhances biodiversity and the character of the landscape and townscape.

GREENSPACE
Any vegetated land or structure, water or geological feature in the urban area including playing fields, grassed areas, trees, woodlands and paths

HOUSING IN MULTIPLE OCCUPATION (HMO)
The term ‘house in multiple occupancy’ in relation to houses, means accommodation which is the only or principal residence of more than five unrelated people. This approach also applies, in general, to flatted accommodation, although in smaller properties, proposals involving more than four unrelated people living together may be considered to constitute a HMO.

HOUSING LAND AUDIT
Assessment of housing land across The City of Edinburgh Council, East Lothian, Midlothian and West Lothian as at 31 March each year. It is undertaken jointly by the four councils in consultation with housing providers.

INFRASTRUCTURE
Physical networks which serve development such as roads, paths, street lighting, supplies of water, gas, electricity and waste water drainage and services for occupants of developments such as public transport measures, schools and healthcare.

LIFE SCIENCES
The scientific study of living things – plants, animals and humans

LISTED BUILDING
A building identified by Historic Environment Scotland as being of special architectural or historical interest as set out in the Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997. Categorised A, B, C(s) to reflect their relative importance.

LOCAL NATURE RESERVES
Area of nature conservation interest with value for education and informal enjoyment designated by a local authority under the National Parks and Access to the Countryside Act (1949) as amended.

LOCAL NATURE CONSERVATION SITES
Sites considered by the Council to be of local importance for wildlife or for their geological or geomorphological interest, usually following consultation with local voluntary nature conservation organisations, and therefore worthy of a measure of protection in this local plan.

LOCAL CENTRE
For the purposes of this Plan a local centre is a shopping centre, usually of 10 units or greater, serving a local retail function. The local centres are listed in Table 6. In some instances, centres of less than 10 units have been included in order to provide a local centre within 15 minutes walk of residents where possible.

LOCAL TRANSPORT STRATEGY
Document prepared by the Council setting outs its transport objectives and an implementation programme.

LOW AND ZERO CARBON TECHNOLOGY
Equipment provided on-site or integrated into buildings and which use solely
renewable sources, resulting in zero carbon dioxide emissions, or which include use of fossil fuels but with significantly lower carbon dioxide emissions overall, which may include combined heat and power (CHP) and/or a range of other methods.

**MAJOR OFFICE DEVELOPMENT**

Proposals for office development exceeding 1,000 sq.m. gross floorspace, and those proposals of less than 1,000 sq.m., which could be linked to existing or proposed developments on adjacent sites, to create combined developments which together exceed 1,000 sq.m.

**MASTER PLAN**

A detailed document that explains how a site or sites will be developed, usually prepared by or on behalf of the landowner, including a representation of the three-dimensional form of proposals and an implementation programme.

**MATERIAL CONSIDERATION**

Any consideration relevant to the use and development of land taken into account when determining a planning application.

**MODE SHARE TARGET**

The percentage of journeys made by different types of transport.

**NATIONAL PLANNING FRAMEWORK 3 (NPF)**

NPF 3 is the Scottish Government’s statutory strategy for Scotland’s long term spatial development.

**NATIONAL RENEWABLES INFRASTRUCTURE PLAN (N-RIP)**

A document prepared by Scottish Enterprise and Highlands and Islands Enterprise to assist the development of a globally competitive off-shore renewables industry in Scotland through the creation of infrastructure to support large scale manufacturing, assembly, deployment and operations, and maintenance of offshore renewable energy devices.

**NATURA 2000**

Sites selected by the European Commission for designation as Special Areas of Conservation (SACs) under the Habitats Directive or classified as Special Protection Areas (SPAs) under the Wild Birds Directive are referred to collectively in the Regulations as European sites. The network of sites across the European Community is known as Natura 2000.

**NON-SHOP USES**

Defined as uses not covered by Class 1 of the Town and Country Planning (Use Classes) (Scotland) Order 1997.

**OPEN SPACE**

Includes ‘greenspace’ (see definition) and ‘civic space’ consisting of squares, market places and other paved or hard landscaped areas with a civic function.

**PLACE-MAKING**

This is the process of creating better places, places that people enjoy being in. It is achieved through developers, public sector agencies and local communities working together.

**PLANNING ADVICE NOTES (PAN)**

A series of documents, produced by the Scottish Government, to provide advice and information on technical planning matters.
PLANNING CONDITIONS
Conditions attached to a planning permission that are enforced through planning legislation.

PUBLIC REALM
The parts of the city (whether publicly or privately owned) that are available for everyone to see and use without charge 24 hours a day, including streets, squares and parks.

PUBLIC TRANSPORT NODE
A point of interchange on the public transport network.

RENEWABLE ENERGY
Natural energy from sources which will never run out such as sunlight, wind, rain, tides, waves and geothermal heat.

SCHEDULED ANCIENT MONUMENTS
Section 1 of the Ancient Monuments and Archaeological Areas Act, 1979 requires the Secretary of State for Scotland to maintain a schedule of monuments of national importance and to publish from time to time a list of such monuments (referred to as Scheduled Monuments). This responsibility passed to Scottish Ministers on 1 July 1999.

SCOTLAND’S LANDSCAPE CHARTER
A voluntary charter which encourages action from all sectors of society to fulfil its vision that, within a generation, we can be proud of all our landscapes.

SCOTTISH GEODIVERSITY CHARTER
A voluntary charter which encourages signatories, including the City of Edinburgh Council, to raise awareness of geodiversity and integrate it into policy and decision-making.

SCOTTISH PLANNING POLICY (SPP)
SPP is the statement of the Scottish Government’s policy on nationally important land use matters.

SHOP UNIT
Premises accessed directly from the street and designed primarily for shop use.

SITE OF SPECIAL SCIENTIFIC INTEREST (SSSI)
Areas of land or water that are of special interest by reason of their flora, fauna or geological or physiographical features. Designated by SNH under the provisions of the Wildlife and Countryside Act 1981 and in accordance with specific guidelines to protect the special interest of the site from damage or deterioration.

SOUTH-EAST WEDGE
The South-East Wedge refers to the area to the south of the existing built-up areas of Craigmillar and Niddrie, east of Little France, and north and east of Danderhall. It includes parts of the City of Edinburgh and Midlothian Council areas.

SPECIAL LANDSCAPE AREAS (SLA)
An area designated by a local authority in development plans as being of special landscape character requiring special protection against inappropriate forms of development.

SPECIAL PROTECTION AREA (SPA)
An area of international importance for rare, threatened or migratory species.
of birds. Proposed developments must be considered against the risk to the ecological integrity of the site under the terms of EU Directive 79/409/EEC on the Conservation of Wild Birds (commonly known as the Birds Directive).

**STRATEGIC DEVELOPMENT PLAN**

In Scotland’s four city regions, Strategic Development Plans provide a long term vision, a spatial strategy and strategic policies and proposals, setting clear parameters for Local Development Plans.

**SUPPLEMENTARY GUIDANCE**

Guidance prepared, consulted on and adopted by the Planning Authority to deal with further information or detail in respect of particular LDP issues. Supplementary guidance must be expressly identified in the LDP and be submitted to Scottish Ministers. Once adopted, supplementary guidance forms part of the development plan.

**SUSTAINABLE DEVELOPMENT**

Development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

**SUSTAINABLE URBAN DRAINAGE**

A comprehensive approach to surface water management which aims through a combination of design measures to minimise the quantity and improve the quality of water before it is discharged from a development site so as to help prevent flooding and pollution.

**TOWN CENTRE**

Centres that provide a diverse and sustainable mix of activities and land uses which create an identity that signals the function and wider role.

**TOWNSCAPE**

The urban equivalent of landscape; for example, the appearance of streets.

**TRANSPORT ASSESSMENT**

Transport Assessment concerns person trips, not car trips. It is a comprehensive assessment that should enable all the potential transport impacts of a proposed development or redevelopment to be fully understood. The objective should be to encourage sustainable travel in relation to the transport mode hierarchy. The assessment should be presented in clear language so that lay people can understand the implications.

**TRAVEL PLAN**

Tool for an organisation to manage its transport needs to encourage safe, healthy and sustainable travel options. It is site based, reflecting the different needs and problems of different locations. The principal objective of a plan is typically to minimise car use associated with a development.

**TREE PRESERVATION ORDER (TPO)**

Made by a local authority under the Town and Country Planning (Scotland) Act 1997 to protect trees of importance for amenity.

**URBAN AREA**

The built up parts of the Council area i.e. the city and smaller settlements. The urban area is shown on the Proposals Map as those parts of the Council area not covered by green belt or countryside policy area designations.
URBAN DESIGN FRAMEWORK

Urban design frameworks show how planning and design policies should be implemented, and what principles should be followed by developers and their designers. They may be used to co-ordinate more detailed master plans and are likely to be prepared for any area where the likelihood of significant change calls for co-ordinated action.

VITALITY AND VIABILITY (OF TOWN CENTRES)

Vitality is a measure of how lively and busy a town centre is. Viability is a measure of its capacity to attract ongoing investment, for maintenance, improvement and adaptation to changing needs.

WASTE/WASTE MANAGEMENT

Includes any substance that constitutes a scrap material or an effluent or other unwanted surplus substance arising from the application of any process; and any substance or article that requires to be disposed of as being broken, worn out, contaminated or otherwise spoiled (but does not include explosives).

WINDFALL

A site which becomes available for development during the plan period which was not anticipated when the plan was being prepared.

WORLD HERITAGE SITE

A cultural or natural site considered by UNESCO World Heritage Committee to be of ‘outstanding universal value’ and therefore one that needs to be preserved as part of the world heritage of humankind. The historic core of Edinburgh, essentially the Old and New Town, was inscribed in 1995. The Forth Bridge was inscribed in 2015.
## Appendix F - Index of Policies

### Section 1  Delivering the Strategy

| Policy Del 1 | Developer Contributions and Infrastructure Delivery 89 |
| Policy Del 2 | City Centre 91 |
| Policy Del 3 | Edinburgh Waterfront 91 |
| Policy Del 4 | Edinburgh Park/South Gyle 92 |

### Section 2  Design Principles For New Development

| Policy Des 1 | Design Quality and Context 93 |
| Policy Des 2 | Co-ordinated Development 94 |
| Policy Des 3 | Development Design - Incorporating and Enhancing Existing and Potential Features 94 |
| Policy Des 4 | Development Design – Impact on Setting 94 |
| Policy Des 5 | Development Design – Amenity 95 |
| Policy Des 6 | Sustainable Buildings 95 |
| Policy Des 7 | Layout Design 96 |
| Policy Des 8 | Public Realm and Landscape Design 97 |
| Policy Des 9 | Urban Edge Development 97 |
| Policy Des 10 | Waterside Development 97 |
| Policy Des 11 | Tall Buildings – Skyline and Key Views 98 |
| Policy Des 12 | Alterations and Extensions 98 |
| Policy Des 13 | Shopfronts 98 |

### Section 3 – Caring for the Environment

| Policy Env 1 | World Heritage Sites 99 |
| Policy Env 2 | Listed Buildings – Demolition 99 |
| Policy Env 3 | Listed Buildings – Setting 100 |
| Policy Env 4 | Listed Buildings – Alterations and Extensions 100 |
| Policy Env 5 | Conservation Areas – Demolition of Buildings 100 |
| Policy Env 6 | Conservation Areas – Development 100 |
| Policy Env 7 | Historic Gardens and Designed Landscapes 101 |
| Policy Env 8 | Protection of Important Remains 101 |
| Policy Env 9 | Development of Sites of Archaeological Significance 101 |
| Policy Env 10 | Development in the Green Belt and Countryside 102 |
| Policy Env 11 | Special Landscape Areas 102 |
| Policy Env 12 | Trees 103 |
| Policy Env 13 | Nature Conservation Sites of International Importance 103 |
| Policy Env 14 | Nature Conservation Sites of National Importance 104 |
| Policy Env 15 | Nature Conservation Sites of Local Importance 104 |
| Policy Env 16 | Species Protection 104 |
| Policy Env 17 | Pentlands Hills Regional Park 105 |
| Policy Env 18 | Open Space Protection 105 |
| Policy Env 19 | Protection of Outdoor Sports Facilities 105 |
| Policy Env 20 | Open Space in New Development 106 |
| Policy Env 21 | Flood Protection 106 |
| Policy Env 22 | Pollution and Air, Water and Soil Quality 107 |
Section 4 – Employment and Economic Development
Policy Emp 1  Office Development 108
Policy Emp 2  Edinburgh BioQuarter 109
Policy Emp 3  Riccarton University Campus and Business Park 110
Policy Emp 4  Edinburgh Airport 110
Policy Emp 5  Royal Highland Centre 110
Policy Emp 6  International Business Gateway 111
Policy Emp 7  RBS Headquarters Gogarburn 112
Policy Emp 8  Business and Industry Areas 112
Policy Emp 9  Employment Sites and Premises 112
Policy Emp10  Hotel Development 113

Section 5 - Housing and Community Facilities
Policy Hou 1  Housing Development 114
Policy Hou 2  Housing Mix 115
Policy Hou 3  Private Green Space in Housing Development 115
Policy Hou 4  Housing Density 116
Policy Hou 5  Conversion to Housing 116
Policy Hou 6  Affordable Housing 117
Policy Hou 7  Inappropriate Uses in Residential Areas 117
Policy Hou 8  Student Accommodation 117
Policy Hou 9  Sites for Gypsies, Travellers and Travelling Showpeople 118
Policy Hou 10 Community Facilities 118

Section 6 - Shopping and Leisure
Policy Ret 1  Town Centres First 119
Policy Ret 2  City Centre Retail Core 120
Policy Ret 3  Town Centres 120
Policy Ret 4  Commercial Centres 121
Policy Ret 5  Local Centres 121
Policy Ret 6  Out-of-Centre Development 122
Policy Ret 7  Entertainment and Leisure Developments - Preferred Locations 123
Policy Ret 8  Entertainment and Leisure Developments - Other Locations 123
Policy Ret 9  Alternative Use of Shop Units in Defined Centres 124
Policy Ret 10  Alternative Use of Shop Units in Other Locations 124
Policy Ret 11  Food and Drink Establishments 125

Section 7 - Transport
Policy Tra 1  Location of Major Travel Generating Development 126
Policy Tra 2  Private Car Parking 127
Policy Tra 3  Private Cycle Parking 128
Policy Tra 4  Design of Off-Street Car and Cycle Parking 128
Policy Tra 5  City Centre Public Parking 129
Policy Tra 6  Park and Ride 129
Policy Tra 7  Public Transport Proposals and Safeguards 129
Policy Tra 8  Provision of Transport Infrastructure 129
Policy Tra 9  Cycle and Footpath Network 130
Policy Tra 10  New and Existing Roads 131
Policy Tra 11  Rail Freight 131
Policy Tra 12  Edinburgh Airport Public Safety Zones 131
Section 8 - Resources and Services

Policy RS 1  Sustainable Energy  132
Policy RS 2  Safeguarding of Existing Waste Management Facilities  133
Policy RS 3  Provision of New Waste Management Facilities  133
Policy RS 4  Waste Disposal Sites  133
Policy RS 5  Minerals  134
Policy RS 6  Water and Drainage  134
Policy RS 7  Telecommunications  134

You can find out more about the LDP at www.edinburgh.gov.uk/localdevelopmentplan
You can get this document on tape, in Braille, large print and various computer formats if you ask us. Please contact Interpretation and Translation Service (ITS) on 0131 242 8181 and quote reference number 16-1084. ITS can also give information on community language translations. You can request more copies of this booklet by emailing localdevelopmentplan@edinburgh.gov.uk

AIM1: Support the growth of the city economy

AIM2: Help increase the number and improve the quality of new homes being built

AIM3: Help ensure that the citizens of Edinburgh can get around easily by sustainable transport modes to access jobs and services

AIM4: Look after and improve our environment for future generations in a changing climate

AIM5: Help create strong, sustainable and healthier communities, enabling all residents to enjoy a high quality of life.
