## **EXPLANATORY NOTE**

*(This note is not part of the Order)*

The Council Tax (Substitution of Proportion and Valuation) (**Scottish Green Party**) (Scotland) Order 2016 amends both the multiplier and the valuation bands and includes provisions for a revaluation to be conducted during 2016-2017 to provide a new valuation date of 1st April 2017.

The effect of this Order is to introduce a revalued valuation roll by 1st April 2018 based on values as at 1<sup>st</sup> April 2017. It provides for Valuation Bands of £1000 with a tax-free allowance of £10,000. This means, for example, that a property worth £100,000 will be in Band 90 and will pay Council Tax at a rate to be set by the local authority based on £90,000 of property value. Such a property will pay twice the tax paid by a £55,000 house in Band 45 (90/45).

Scottish Greens also propose the introduction of another Order in 2017-18 to provide for a five-year transition from the 1991 valuation basis so that those households facing higher bills can phase the increase in over five years. Other elements of our proposed reforms (such as providing for split valuations between land and improvements) will require new legislation.
